

Arizona Report of Public Agency Performance on Preschool Outcomes

Indicator 7: Preschool Outcomes

Percent of preschool children aged 3 through 5 with IEPs who demonstrate improved:

- A. Positive social-emotional skills (including social relationships);
- B. Acquisition and use of knowledge and skills (including early language/communication and early literacy); and
- C. Use of appropriate behaviors to meet their needs.

Measurement

Five progress categories for 7A, 7B, and 7C (the outcomes) measure the progress of preschool children on a scale ranging from no improvement to maintenance of functional levels comparable to same-aged peers. The five progress categories are summarized in two summary statements each for 7A, 7B, and 7C, resulting in six percentages.

The two summary statements are:

Summary Statement 1: Of those preschool children who entered the preschool program below age expectations in each Outcome, the percent who substantially increased their rate of growth by the time they turned 6 years of age or exited the program.

Summary Statement 2: The percent of preschool children who were functioning within age expectations in each Outcome by the time they turned 6 years of age or exited the program.

Data

The data are from school year 2011-2012. The preschool assessment data are reported by the public education agencies (PEAs) through a Web-based data collection system that is integrated with the Student Accountability Information System (SAIS).

Six percentages are reported for each PEA. These six numbers represent the results for the three outcomes (7A, 7B, and 7C) that are condensed in the two summary statements (SS 1 and SS 2).

A PEA is listed with NA (not applicable) when no preschool students with IEPs had scores in the progress categories that comprise the Summary Statement.

A PEA is listed with a number symbol (#) when the PEA was unable to report preschool assessment data due to technical problems beyond the PEA's control.

A PEA is listed with an asterisk (*) when the PEA had fewer than 10 students with IEPs with preschool assessment scores. In this instance, the data are not reported to ensure confidentiality.
