**Part B Arizona State Performance Plan (SPP) for 2005-2012****The Arizona Part B State Performance Plan  
for Special Education****FFY 2011 Revision****Introduction**

The Individuals with Disabilities Education Act (IDEA) of 2004 established a requirement that all States develop and submit to the U.S. Department of Education, Office of Special Education Programs (OSEP), a performance plan designed to advance the State from its current level of compliance with the statutory and regulatory requirements of the law and to improve the educational and functional outcomes for children with disabilities. The State plan must encompass baseline data, projected targets, and activities to achieve those targets. The State is required to submit an annual report in the years following the submission of the performance plan to inform OSEP and the public on the progress toward meeting those goals. This document fulfills the first step of that process—the State Performance Plan (SPP).

**FFY 2011 Update to the State Performance Plan**

The Arizona Department of Education/Exceptional Student Services (ADE/ESS) revised the State Performance Plan (SPP) in conjunction with the submission of the FFY 2011 Annual Performance Report (APR) due February 15, 2013. The revised SPP has, for each Indicator, annual targets and improvement activities for each year through FFY 2012.

Included in the FFY 2011 Revision are baseline data, target data, and new improvement activities for Indicator 6, and baseline data and target data for Indicator 7 and Indicator 14.

Targets, improvement activities, timelines, and resources were reviewed. The ADE/ESS sought input from the Special Education Advisory Panel (SEAP) and from education personnel in the field regarding the new SPP indicators and changes to the SPP. Various individuals and groups offered suggestions about indicators related to their fields of interest.

The revised State Performance Plan (SPP) will be available on the ADE/ESS Web site at <http://www.azed.gov/special-education/resources/spp-apr/> under the menu labeled State Performance Plan, beginning on February 15, 2013. The title of the SPP is *Arizona State Performance Plan FFY 2005-2012 Revised FFY 2011*.

The annual public reports list the performance of each school district and charter school in Arizona on the SPP targets. These reports will be available on the ADE/ESS Web site at <http://www.azed.gov/special-education/resources/> under the menu labeled School Year 2011–12 Public Reports, within 120 days of the February 15, 2013 submission of the APR.

**Overview of the State Performance Plan (SPP) Development**

The Arizona State Performance Plan was drafted internally by staff within the Arizona Department of Education, Exceptional Student Services (ADE/ESS), and presented to the Special Education Advisory Panel (SEAP) for consideration and input. The specific tasks requested of the SEAP by the ADE/ESS were:

- To consider baseline and trend data for each indicator when such information was available;
- To assist in determining appropriate targets for each indicator in which a target was required for the SPP;
- To review the planned activities, timelines, and resources and provide input into the likely efficacy of the strategies proposed;

**Part B Arizona State Performance Plan (SPP) for 2005-2012**

- To suggest additional approaches for the ADE/ESS to consider including in the planned activities.

Arizona maintains accountability systems for all public education agencies in the State including state-supported institutions, charter schools, school districts, and secure care facilities. Therefore, throughout this document, the term public education agency (PEA) will be used to reflect all of these iterations of educational institutions.

**Stakeholder Involvement**

In addition to the input process undertaken with the SEAP, ADE/ESS discussed and sought input to the SPP process, indicators, and activities at regional meetings of special education administrators and statewide conferences. Special focus groups provided input on some unique indicators related to their areas of interest, and their participation is noted in this report as part of the specific indicator(s). Mountain Plains Regional Resource Center (MPRRC) and the Data Accountability Center (DAC) assisted the agency in the development of appropriate baselines, targets, and improvement planning.

**Dissemination**

Following the submission of the State Performance Plan to the U.S. Department of Education, ADE/ESS will post the final version on the agency Web site and will alert constituency groups of its availability via existing electronic mailing lists. Hard copies will be provided to all SEAP members and any individual making a request for one. Hard copies also will be made available for public review at each of the ADE/ESS offices—Phoenix, Tucson, and Flagstaff. Public notice about the availability of the SPP will be made on the ADE/ESS listserv and in a press release to major Arizona newspapers.

## Part B Arizona State Performance Plan (SPP) for 2005-2012

**Monitoring Priority: FAPE in the LRE****Indicator 1: Graduation Rates**

Percent of youth with IEPs graduating from high school with a regular diploma.

(20 U.S.C. 1416 (a)(3)(A))

**Measurement:** States must report using the graduation rate calculation and timeline established by the Department under the ESEA.

**Overview of Issue / Description of System or Process**

Arizona uses a four-year cohort. Any student who receives a traditional high school diploma within the first four years of starting high school is considered a four-year graduate. A four-year rate is calculated by dividing the sum of all four-year graduates in a cohort by the sum of those who should have graduated and did not transfer to another qualified educational facility or die. Students who receive a diploma in the summer after their fourth year are included as part of the graduation cohort. This calculation of the graduation rate does not include dropouts as transfer students or those who obtain a Graduate Equivalent Diploma (GED).

The graduation data are reported by the public education agencies (PEAs) through the Student Accountability Information System (SAIS), a Web-based system for reporting all student-level details to the Arizona Department of Education. The graduation data are analyzed by the Arizona Department of Education's Accountability Division/Research and Evaluation Section (ADE/R & E) and the Information Technology Division (IT). The same graduation rate calculation is used and it is the same data as reported to the U.S. Department of Education under Title I of the Elementary and Secondary Act (ESEA).

**Baseline Data for FFY 2004 (2004–2005)**

	<b>2004 Graduates</b>
Graduation Rate of All Students	68.5% [N = 55,798 / 81,475]
Graduation Rate of Students with Disabilities	60.2% [N = 4,592 / 7,634]

**Discussion of Baseline Data**

FFY 2005 is the first year that the ADE can compare the graduation rates of students with and without disabilities. However, the graduation rate of students with disabilities as reflected in the OSEP § 618 data tables has been relatively stable over the last five years and is quite close to the rate calculated for students with disabilities using SAIS data.

Arizona offers only one graduation/diploma option and that option is available to all students. Beginning in January 2006, a requirement to "pass" the statewide assessment—known as Arizona's

## Part B Arizona State Performance Plan (SPP) for 2005-2012

Instrument to Measure Standards or AIMS—went into effect. During the 2005 session of the Arizona legislature, advocates successfully lobbied for a statutory change that allows students with disabilities to graduate without passing the AIMS unless their IEP teams have determined they must pass. A second bill was enacted that establishes a system whereby all students can improve their AIMS status by attaining good grades and completing appropriate high school courses. Therefore, beginning with the graduating class of 2006, students with disabilities are able to graduate and obtain a regular high school diploma after completing the required course work in one of the following ways:

1. Taking and passing all portions of the high school AIMS with or without accommodations;
2. Taking and passing some or all portions of the AIMS under the “extra credit” for course grades;
3. Taking, but being exempt from passing, some or all portions of the AIMS through an IEP team decision.

It is anticipated that the requirement to pass the AIMS for all students except those with disabilities will temporarily reduce the graduation rate for students without disabilities and may improve the rate for students with disabilities. The long-term impact of the legislative decision will be studied by the Arizona Department of Education and reported through the State’s Annual Performance Report.

Percent of youth with IEPs dropping out of high school.

(20 U.S.C. 1416 (a)(3)(A))

<b>Measurement:</b> States must report using the dropout data used in the ESEA graduation rate calculation and follow the timeline established by the Department under the ESEA.
--

**Overview of Issue / Description of System or Process**

For purposes of calculating and reporting a dropout rate, Arizona uses the annual event school dropout rate for students leaving a school in a single year determined in accordance with the National Center for Education Statistics' (NCES) Common Core of Data.

Consistent with this requirement, Arizona uses NCES' definition of high school dropout, defined as an individual who: 1) was enrolled in school at some time during the previous school year; and 2) was not enrolled at the beginning of the current school year; and 3) has not graduated from high school or completed a state- or district-approved educational program; and 4) does not meet any of the following exclusionary conditions: a) transfer to another public school district, private school, or state- or district-approved educational program (including correctional or health facility programs); b) temporary absence due to suspension or school-excused illness; or c) death.

Dropout rates are calculated for grades 9 through 12. The same definition and methodology for dropout rates apply to all students in Arizona.

The dropout data are reported by the public education agencies (PEAs) through the Student Accountability Information System (SAIS), a Web-based system for reporting all student-level details to the Arizona Department of Education. The dropout data are analyzed by the Arizona Department of Education's Accountability Division/Research and Evaluation Section (ADE/R & E).

**FFY 2005 Update to Baseline Data**

The need to adjust the FFY 2004 baseline data is predicated on an adjustment to the formula used by the ADE to calculate the dropout rate for all youth. End of summer status, i.e., students who do not return to school after the summer break, is captured in the new baseline thereby increasing the dropout rate.

**Adjusted Baseline Data for FFY 2005 (2005–2006)**

Youth Status	FFY 2005 (Adjusted Baseline)
All Youth	6.32% [N = 22,765 / 360,420]
Youth in Special Education	5.44%

## Part B Arizona State Performance Plan (SPP) for 2005-2012

	[N = 659 / 12,123]
--	--------------------

**Discussion of Baseline Data**

A grade-by-grade comparison of dropout rates in FFY 2004 for students with disabilities compared to all students reveals that, while there is some variability between the rates at all grades, the largest differences occur during the 11th and 12th grade years. The dropout rate for students with disabilities is significantly higher during the junior year and the dropout rate for all students is significantly higher during the senior year. Table 1 indicates the dropout rates during FFY 2004 for students with and without disabilities in the grades with significant differences between groups.

**Table 2.1: Junior / Senior Percent Dropout Rates FFY 2004**

Year	Students with Disabilities	All Students
Junior	7.16%	5.35%
Senior	5.77%	7.94%

The comparison of dropout rates by ethnicity shows that, for the most part, the dropout rate of students with disabilities does not differ substantially from that of all students within their ethnic group, as only white students with disabilities drop out at a rate greater than 1% higher than all white students.

The following is a new improvement activity for FFY 2007.

<sup>2</sup> This activity has been eliminated as of FFY 2006 because comparison with all students is no longer required.

<sup>3</sup> This activity has been eliminated as of FFY 2006 as the longitudinal data do not support the original premise that juniors dropout at a higher rate than do seniors.

<sup>4</sup> This activity has been discontinued as of FFY 2007 as the dropout reasons were not included in the original survey; baseline data has already been collected.

## Part B Arizona State Performance Plan (SPP) for 2005-2012

### Monitoring Priority: FAPE in the LRE

#### Indicator 3: Assessments

Participation and performance of children with IEPs on statewide assessments:

- A. Percent of the districts with a disability subgroup that meets the State's minimum "n" size that meet the State's AYP/AMO targets for the disability subgroup.
- B. Participation rate for children with IEPs.
- C. Proficiency rate for children with IEPs against grade level, modified and alternate academic achievement standards.

(20 U.S.C. 1416 (a)(3)(A))

#### Measurement

A. (choose either A.1 or A.2)

A.1 AYP percent =  $\left[ \frac{\text{(\# of districts with a disability subgroup that meets the State's minimum "n" size that meet the State's AYP targets for the disability subgroup)}}{\text{(total \# of districts that have a disability subgroup that meets the State's minimum "n" size)}} \right] \times 100$ .

A.2 AMO percent =  $\left[ \frac{\text{(\# of districts with a disability subgroup that meets the State's minimum "n" size that meet the State's AMO targets for the disability subgroup)}}{\text{(total \# of districts that have a disability subgroup that meets the State's minimum "n" size)}} \right] \times 100$ .

B. Participation rate percent =  $\left[ \frac{\text{(\# of children with IEPs participating in an assessment)}}{\text{(total \# of children with IEPs enrolled during the testing window, calculated separately for reading and math)}} \right]$ . The participation rate is based on all children with IEPs, including both children with IEPs enrolled for a full academic year and those not enrolled for a full academic year.

C. Proficiency rate percent =  $\left[ \frac{\text{(\# of children with IEPs scoring at or above proficient against grade level, modified and alternate academic achievement standards)}}{\text{(total \# of children with IEPs who received a valid score and for whom a proficiency level was assigned, and, calculated separately for reading and math)}} \right]$ . The proficiency rate includes both children with IEPs enrolled for a full academic year and those not enrolled for a full academic year.

#### Overview of Issue / Description of System or Process

Arizona's statewide assessment system is called Arizona's Instrument to Measure Standards (AIMS). AIMS is a standards based assessment and measures student proficiency of the Arizona academic content standards in mathematics, reading, writing, and science. Science is not included in the graduation requirement.

The alternate assessment is called Arizona's Instrument to Measure Standards Alternate (AIMS A). It is a standards based measurement and measures student proficiency of the Arizona alternate academic standards in mathematics, reading, and science. AIMS A is designed for students with significant cognitive disabilities.

Students in grades 3 through 8 and high school participate in all statewide assessments. The AIMS and AIMS A data are used to determine AMO and to report participation and performance.

The State uses four categories to classify the proficiency status of students (the FAME scale):

## Part B Arizona State Performance Plan (SPP) for 2005-2012

- Falls Far Below the Standard (F) (considered failing)
- Approaches the Standard (A) (considered failing)
- Meets the Standard (M) (considered passing)
- Exceeds the Standard (E) (considered passing)

Students who met the standard (M) or exceeded the standard (E) are counted as proficient.

The ADE/R & E Section and the IT Division analyze the assessment data. It is the same data as reported to the U.S. Department of Education under Title I of the Elementary and Secondary Act (ESEA).

### FFY 2004 (2004–2005)

The grades tested for FFY 2004 were 3rd through 8th, and 10th. The AIMS assessments were changed significantly for FFY 2004 when the State moved to a dual-purpose assessment for grades 3–8 (AIMS DPA). By incorporating selected items from the Terra Nova achievement test into the AIMS for these grades, nationally-normed information can be provided to parents and schools and the time devoted to testing during the school year can be reduced. With the advent of the new test, new cut scores were determined and, in some cases, lowered.

For FFY 2004, passing scores for students with disabilities were the same as for all other students.

The number of PEAs meeting the State's AYP objectives for progress for disability subgroup was calculated on the number of PEAs having a total count of students with disabilities of >40, which is the same number used for the determination of AYP for all other students.

The baseline data reported for participation and performance on the State assessment (Table 2) includes all students with disabilities who took either the AIMS (with or without standard accommodations) or the AIMS-A.

### Adjusted Baseline Data for FFY 2005 (2005–2006)

Arizona did not calculate and report FFY 2004 AYP rates for the special education subgroup by curriculum area in the State Performance Plan submitted in March 2006. These data were calculated for FFY 2005 and are reported in the amended State Performance Plan submitted in February 2007.

AYP Rate for PEAs with SWD—Math	18.92%
	[N = 14 / 74]
AYP Rate for PEAs with SWD—Reading	16.22%
	[N = 12 / 74]
AYP Rate for PEAs with SWD—Overall	12.16%
	[N = 9 / 74]

**Discussion of Baseline Data**

With the exception of 3rd grade reading, all grades showed substantial improvement over the FFY 2003 scores on the AIMS test for students with disabilities. The rate of the increase is believed to be unusual and difficult to repeat (Figures 3.1 and 3.2). Possible explanations for the increases lie in the rapidly changing face of assessment for students with disabilities in light of the testing and reporting requirement of the No Child Left Behind Act. The development of the new AIMS DPA and new cut scores is most likely responsible for a substantial portion of the year-to-year increase. However, in FFY 2003, Arizona eliminated out-of-grade-level testing and limited the use of nonstandard accommodations for students with disabilities. Therefore, during that year many students were assessed on materials on which they had not previously received instruction and in a manner unfamiliar to them. The improvement of scores in FFY 2004 may be an artifact of changing the tests and requiring instructional approaches and accommodations to catch up to the dictates of the federal statute. Figures 3.1 and 3.2 illustrate the change over time in the reading and math scores of children with disabilities in selected grades on the general statewide assessment.

## FFY 2011 Revision

The following are the mathematics and reading Annual Measurable Objectives (AMOs) as given in the State of Arizona ESEA Flexibility Request, dated July 13, 2012, which is the current Arizona Accountability Workbook. The mathematics and reading AMOs are the new AMOs established by the ADE that increase in annual equal increments and result in 100% proficiency no later than the end of school year 2019-2020.

	b) Collect and analyze third grade AIMS data by strand.		9/1/09 – 6/30/11	CSPD Staff
3) By the end of Year 1 and 2, teams will increase mathematics proficiency rate for students with IEPs, as determined by third grade AIMS data.	a) Provide training in the use of SETT (Student, Environment, Task, Tools) Process and the Star Model (ASAMA's model that demonstrates five strategies to differentiate math lessons) to improve accessibility of mathematics and enhance mathematics instruction.		9/1/09 – 6/30/11	CSPD Staff
	b) Provide training in creating a professional learning community that will help teams collaborate, analyze data, make instructional decisions, continue learning and/ or create a school-wide professional development plan.		9/1/09 – 6/30/11	CSPD Staff

The following are revised improvement activities for reading for FFY 2008.

Reading: The following are revised improvement activities for the Systemic Change in Reading (SCR) project. After ESS reviewed the report and data from FFY 2008 for SCR, it was determined that the same data was collected at several points due to repetition of the sub-activities within the

**Part B Arizona State Performance Plan (SPP) for 2005-2012**

improvement activities. The activities were revised (below) to condense the sub-activities and analyze the data by strands within the Arizona Academic Standards. This will allow the SCR team to analyze the outcomes of specific training sessions.

## Part B Arizona State Performance Plan (SPP) for 2005-2012

### Monitoring Priority: FAPE in the LRE

#### Indicator 4A: Suspension and Expulsion

Percent of districts that have a significant discrepancy in the rate of suspensions and expulsions of greater than 10 days in a school year for children with IEPs.

(20 U.S.C. 1416 (a)(3)(A); 1412 (a)(22))

#### Measurement

Percent = [(# of districts that have a significant discrepancy in the rates of suspensions and expulsions for greater than 10 days in a school year of children with IEPs) divided by the (# of districts in the State)] times 100.

Include State's definition of "significant discrepancy."

If the State used a minimum "n" size requirement, the State must report the number of districts excluded from the calculation as a result of this requirement.

#### Overview of Issue / Description of System or Process

The data are reported by the PEAs through the Arizona Safety Accountability for Education (AZ SAFE) application. The data are the same as the data reported under section 618, Table 5 (Report of Children with Disabilities Subject to Disciplinary Removal). The Child Count data are the same as the State's data reported under section 618, Table 1, Report of Children with Disabilities Receiving Special Education Under Part B of the Individuals With Disabilities Education Act.

The ADE/ESS assures the validity and reliability of the AZ SAFE data through the Annual Special Education Data Collection, which uses internal edit checks. The State requires an assurance from the PEAs through the submission of a signed verification form attesting to the validity of the data.

#### Definition of Significant Discrepancy and Methodology

Arizona uses Statistical Analysis Software (SAS) to calculate rates of suspension and expulsion for children with IEPs. Arizona uses the state bar method to determine significant discrepancy. The State rate of suspensions/expulsions greater than 10 days for all students with IEPs is 0.65%. The State bar, 5.65%, is five percentage points greater than the State rate.

A district or charter school has significant discrepancy when its suspension/expulsion rate greater than 10 days for students with IEPs is 5.65% or greater. There must be at least 50 students in the denominator of a suspension/expulsion rate for that district or charter school to be flagged as having significant discrepancy. The denominator represents the overall special education enrollment at the district or charter school.

Previously, Arizona used a minimum "n" size of 10 students in the numerator. In other words, at least 10 students with IEPs had to be suspended/expelled for greater than 10 days for a PEA to be identified as having significant discrepancy. However, due to new guidance from the Office of Special Education Programs (OSEP) and the Data Accountability Center (DAC) in the September 2011 technical assistance guide, Arizona decided to use a minimum "n" size in the denominator and, as a result, exclude fewer PEAs from the calculation.

## Part B Arizona State Performance Plan (SPP) for 2005-2012

Arizona compares the rates of suspensions and expulsions of greater than 10 days in a school year for students with IEPs among PEAs in the State.

### Baseline Data for FFY 2004 (2004–2005)

- A) 1.64% of the PEAs in Arizona had suspension rates of greater than 5% of their population of special education students  
[N = 9 / 549]
- B) New Indicator—No baseline established

### Additional Baseline Data for FFY 2005 (2005–2006)<sup>10</sup>

- B) 1.86% of the PEAs in Arizona had suspension rates of greater than 5% of their population of special education students in any racial/ethnic group  
[N = 10 / 549]

### Discussion of Baseline Data

The change in Arizona's definition of significant discrepancy makes longitudinal analysis unfeasible for FFY 2004; however, a review of the change over time in suspension/expulsion rates sheds light on the reason for the change in definition. Figure 3 illustrates the rapid decline in the number of education agencies with rates over 10% of their special education population from FFY 2000 through FFY 2004.

**Figure 4.1: Suspension Rate Decline over Time**

Numbers of PEAs with Suspension Rates >10%

Arizona had nine education agencies that met the FFY 2004 definition of significant discrepancy. The range for the percent of these suspensions > 5% was from 5.14% to 27.27% of the special education population. It should be noted that out of the 549 reporting agencies, 439 reported no suspensions of

<sup>10</sup> This indicator component has been suspended by OSEP as of the FFY 2006 submission.

## Part B Arizona State Performance Plan (SPP) for 2005-2012

students with disabilities for more than 10 days. The statewide average was 2.4%. A total of 907 students with disabilities were suspended for more than 10 days during FFY 2004.

### FFY 2005 Revision to Indicator 4

Arizona used the same definition of significant discrepancy when analyzing suspension data by race/ethnicity. Ten PEAs had at least one cell that met the > 5% of the SWD population and more than two students suspended.

FFY	Measurable and Rigorous Targets 4A	Measurable and Rigorous Targets 4B
2006 (2006–2007)	1.55%	
2007 (2007–2008)	1.50%

2011 (2011–2012)	1.25%	0%
2012 (2012–2013)	1.20%	0%

### FFY 2007 Update to the State Performance Plan

Arizona revised the definition of significant discrepancy for suspensions/expulsions for FFY 2007. The revised definition is a rate above 5% of the special education population with 10 or more students suspended, with an annual review of the data to determine if there is a significant discrepancy for each PEA.

### Monitoring Priority: FAPE in the LRE

#### Indicator 4B: Suspension and Expulsion by Race or Ethnicity

Percent of districts that have: (a) a significant discrepancy, by race or ethnicity, in the rate of suspensions and expulsions of greater than 10 days in a school year for children with IEPs; and (b) policies, procedures or practices that contribute to the significant discrepancy and do not comply with requirements relating to the development and implementation of IEPs, the use of positive behavioral interventions and supports, and procedural safeguards.

(20 U.S.C. 1416 (a)(3)(A); 1412 (a)(22))

#### Measurement

Percent = [(# of districts that have: (a) a significant discrepancy, by race or ethnicity, in the rates of suspensions and expulsions of greater than 10 days in a school year of children with IEPs; and (b) policies, procedures or practices that contribute to the significant discrepancy and do not comply with requirements relating to the development and implementation of IEPs, the use of positive behavioral interventions and supports, and procedural safeguards) divided by the (# of districts in the State)] times 100.

#### Overview of Issue / Description of System or Process

The data are reported by the PEAs through the Arizona Safety Accountability for Education (AZ SAFE) application. The data are the same as the data reported under section 618, Table 5 (Report of Children with Disabilities Subject to Disciplinary Removal). The Child Count data are the same as the State's data reported under section 618, Table 1, Report of Children with Disabilities Receiving Special Education Under Part B of the Individuals With Disabilities Education Act.

The ADE/ESS assures the validity and reliability of the AZ SAFE data through the Annual Special Education Data Collection, which uses internal edit checks. The State requires an assurance from the PEAs through the submission of a signed verification form attesting to the validity of the data.

#### Definition of Significant Discrepancy and Methodology

Arizona uses Statistical Analysis Software (SAS) to calculate rates of suspension and expulsion by race or ethnicity for children with IEPs. Arizona uses the state bar method to determine significant discrepancy. The State rate of suspensions/expulsions greater than 10 days for all students with IEPs is 0.65%. The State bar, 5.65%, is five percentage points greater than the State rate.

Any district or charter school that suspends or expels 5.65% or more of its students with IEPs of a given race/ethnicity for more than 10 days is flagged for significant discrepancy. There must be at least 50 students in the denominator of a suspension/expulsion rate for that district or charter school to be flagged as having significant discrepancy. The denominator represents the special education enrollment at the district or charter school for a given race/ethnicity.

Previously, Arizona used a minimum "n" size of 10 students in the numerator. In other words, at least 10 students with IEPs of a particular racial/ethnic group had to be suspended/expelled for greater than 10 days for a PEA to be identified as having significant discrepancy. However, due to new guidance from the Office of Special Education Programs (OSEP) and the Data Accountability Center

## Part B Arizona State Performance Plan (SPP) for 2005-2012

(DAC) in the September 2011 technical assistance guide, Arizona decided to use a minimum “n” size in the denominator and, as a result, exclude fewer PEAs from the calculation.

Arizona compares the rates of suspension and expulsion of greater than 10 days in a school year for students with IEPs among PEAs in the State.

### Discussion of Baseline Data for FFY 2009 (using 2008-2009 data)

Baseline data was calculated using the total number of PEAs in Arizona in FFY 2009 in the denominator (590). Arizona examined the PEAs’ data for each racial and ethnic category for suspensions and expulsions of greater than 10 days, and excluded PEAs with less than 10 students suspended or expelled for greater than 10 days. Using this minimum “n” size of 10, Arizona excluded 115 PEAs from the list of identified PEAs with significant discrepancy. The results of the calculation identified three PEAs with significant discrepancy by race or ethnicity.

### Review of Policies, Procedures, and Practices for FFY 2009 (using 2008-2009 data)

The State reviewed the policies, procedures, and practices of the PEAs related to the development and implementation of IEPs, the use of positive behavioral interventions and supports, and procedural safeguards by June 30, 2010, in accordance with 34 CFR § 300.170(b). Arizona identified three PEAs with significant discrepancy for race or ethnicity using 2008-2009 data.

Arizona required the PEAs to have special education policies and procedures in compliance with all regulatory requirements prior to having Part B-IDEA Basic Entitlement Grant funds approved by the ADE/ESS. The PEAs were required to resubmit the discipline policies and procedures for review by ESS program specialists to determine if they were in alignment with the requirements of 34 CFR § 300.530 through § 300.536.

The practices of the PEAs were reviewed by means of a self assessment. The PEAs conducted an assessment of their discipline practices, which consisted of a series of questions requiring narrative responses and a review of student files using the State's monitoring forms. ADE/ESS specialists conducted on-site visits and/or desk audits during the self assessment to validate the decisions made by the PEAs during the file reviews.

Upon completion of the self assessment, the PEAs had the option to begin immediately revising their policies, procedures, and practices related to the discipline process and to correct all self-identified noncompliance. The ESS specialists then interviewed the special education administrators and reviewed student files via on-site visits and/or desk audits to verify correction of instances of the self-identified noncompliance, including child specific, and to ensure that regulatory requirements were being implemented based on subsequent file reviews of updated data.

Arizona did not make any findings of noncompliance with Part B requirements as a result of the review required by 34 CFR § 300.170(b).

**Part B Arizona State Performance Plan (SPP) for 2005-2012**

Based upon the results of the self assessment completed by the PEAs with support from the ADE/ESS specialists, Arizona required each PEA to revise its policies, procedures, and practices related to the maintenance, collection, and reporting of data; development and implementation of IEPs; the use of positive behavioral interventions and supports; and, procedural safeguards. The ADE/ESS specialists assigned to each PEA conducted follow-up on-site visits and/or desk audits after the revisions to ensure that the policies, procedures, and practices complied with IDEA.

## Part B Arizona State Performance Plan (SPP) for 2005-2012

### Monitoring Priority: FAPE in the LRE

#### Indicator 5: School Age LRE

Percent of children with IEPs aged 6 through 21 served:

- A. Inside the regular class 80% or more of the day;
- B. Inside the regular class less than 40% of the day; and
- C. In separate schools, residential facilities, or homebound/hospital placements.

(20 U.S.C. 1416 (a)(3)(A))

#### Measurement

- A. Percent = [(# of children with IEPs served inside the regular class 80% or more of the day) divided by the (total # of students aged 6 through 21 with IEPs)] times 100.
- B. Percent = [(# of children with IEPs served inside the regular class less than 40% of the day) divided by the (total # of students aged 6 through 21 with IEPs)] times 100.
- C. Percent = [(# of children with IEPs served in separate schools, residential facilities, or homebound/hospital placements) divided by the (total # of students aged 6 through 21 with IEPs)] times 100.

#### Overview of Issue / Description of System or Process

The Special Education participation data are reported by the public education agencies (PEAs) through the Student Accountability Information System (SAIS), a Web-based system for reporting all student-level details to the Arizona Department of Education. The data are extracted from SAIS for the October 1 Child Count report and are the same as the State's data reported in the Educational Environments, Table 3, under section 618.

#### Baseline Data for FFY 2004 (2004–2005)

A. Removed less than 21% of the day	48.0%
B. Removed greater than 60% of the day	17.8%
C. Served in separate schools, residential placement, or home/hospital	2.7%

#### Discussion of Baseline Data

Arizona's placement options for students with disabilities aged 6–21 years are adequate to meet the diverse needs of individual students throughout the State. While the largest percentage of students is served in the regular classroom for most of their day, other options are clearly available and utilized by the public education agencies (PEAs) as appropriate. Table 3 compares Arizona rates for the most common placements to national rates as reported on the U.S. Department of Education Web site.

## Part B Arizona State Performance Plan (SPP) for 2005-2012

### Monitoring Priority: FAPE in the LRE

#### Indicator 6: Preschool LRE

Percent of children aged 3 through 5 with IEPs attending a:

- A. Regular early childhood program and receiving the majority of special education and related services in the regular early childhood program; and
- B. Separate special education class, separate school or residential facility.

(20 U.S.C. 1416 (a)(3)(A))

#### Measurement

- A. Percent =  $\left[ \frac{\text{(\# of children aged 3 through 5 with IEPs attending a regular early childhood program and receiving the majority of special education and related services in the regular early childhood program)}}{\text{(total \# of children aged 3 through 5 with IEPs)}} \right] \times 100$ .
- B. Percent =  $\left[ \frac{\text{(\# of children aged 3 through 5 with IEPs attending a separate special education class, separate school or residential facility)}}{\text{(total \# of children aged 3 through 5 with IEPs)}} \right] \times 100$ .

#### Overview of Issue / Description of System or Process

The Arizona Department of Education/Early Childhood Education (ADE/ECE) is responsible for the administration of the early childhood special education program (Part B, Section 619) for children aged 3–5 who are not yet eligible for kindergarten.

The ADE/ECE collects preschool least restrictive environment (LRE) data for children aged 3–5 receiving special education services through the Student Accountability Information System (SAIS) based on each year's October 1 public education agency (PEA) child count. Partnerships with other early childhood programs, such as First Things First, Head Start, Career and Technical Education, Title I, and Community Child Care, are promoted through the Early Childhood Quality Improvement Process (ECQUIP), a continuous improvement process to increase quality among PEAs' early childhood programs that receive early childhood State funds.

#### Data

##### Data Source

The data were collected through the October 1, 2011, Child Count report and are the same as the State's data reported under section 618, Table 3, Part B, Individuals with Disabilities Education Act Implementation of FAPE Requirements.

##### Valid and Reliable Data

The ADE/ESS assures the validity and reliability of the data because ESS collected, maintained, and reported the October 1, 2011, child count data and the placement data using internal edit checks. The State requires PEAs to assure their data is accurate and reliable by having them submit signed verification letters.

**Part B Arizona State Performance Plan (SPP) for 2005-2012**

**Baseline Data for FFY 2011**

The table below displays the baseline data for Indicators 6A and 6B and the total number of children aged 3–5 (including five year olds in kindergarten) reported on the October 1, 2011, child count.

FFY 2011 (2011–2012)	Indicator 6 Baseline Data	
	6A	6B
Number of children aged 3–5 reported for 10/1/11 Child Count	15,235	15,235
Number of children	7,315	7,029
Percentage of children	<b>48.01%</b>	<b>46.14%</b>

**Discussion of Baseline Data for FFY 2011**

The baseline data show that 48.01% of children aged 3–5 were attending a regular early childhood program and receiving the majority of their special education and related services in the regular early childhood or kindergarten program. The baseline data also show that 46.14% of children aged 3–5 were attending a separate special education class, separate school, or residential facility.

### Overview of Issue / Description of System or Process

The Arizona State Board of Education approved the use of a single, Web-based assessment, Teaching Strategies GOLD, in August 2010. All public education agencies (PEAs) serving preschool children with IEPs are required to use this assessment. GOLD was implemented statewide during school year 2011–2012 and replaced the four assessments previously used to report preschool outcomes.

Use of a single, Web-based assessment that is designed for children birth through kindergarten has enabled Arizona to:

- capture the progress of preschool children at all developmental stages;
- provide programs/districts with real-time access to meaningful data that will guide instructional and programmatic decisions;
- easily communicate progress to parents, related service providers, and other school staff;
- retain data on children as they transfer to other programs and districts in the State;
- consolidate professional development and technical assistance;
- increase collaboration between Head Start, private child care, general education preschool, and special education preschool programs.

Primary responsibility for data collection and submission belongs to the professional with the greatest degree of interaction with the child. Families and all relevant professionals supporting each child contribute to the body of information used to determine progress ratings within GOLD. Public education agencies are required to submit data 3 times per school year using a secure Web-based system hosted by Teaching Strategies, which is accessible by the Arizona Department of Education Early Childhood Education staff.

GOLD provides the ECSE unit with full, real-time access to district-level data, allowing targeted technical assistance to schools. An Early Childhood Data Collaborative (ECDC) stakeholders group meets regularly to address issues and to help the ECSE unit develop appropriate technical assistance.

The change to Teaching Strategies GOLD as the single assessment instrument in Arizona is expected to result in an improvement in data reliability as well as improved outcomes for preschool children. As a result of this change to GOLD, new baseline data has been established and is reported in the FFY 2011 APR.

### Data

#### Data Source

PEAs reported FFY 2011 preschool assessment data using Teaching Strategies GOLD, a Web-based data collection system. Sampling was not used for this Indicator as all preschool children with disabilities have their entry status and exit status assessed. Additionally, this assessment system is

## Part B Arizona State Performance Plan (SPP) for 2005-2012

statewide and inclusive of all children in state-funded preschool programs, as well as all Head Start programs and one Tribal Head Start program.

### Instruments

All early childhood programs must administer the one assessment tool approved by the Arizona State Board of Education for ongoing progress monitoring assessment. Teaching Strategies is the publisher of the GOLD assessment.

Trainings were provided to Arizona educators and administrators by Teaching Strategies staff in 2011 and 2012. These trainings continue to take place throughout the State for new users. Online training modules, including interrater reliability certification courses, are available through the GOLD subscriptions.

Ongoing technical assistance has been provided by the Arizona Department of Education/Early Childhood Education (ADE/ECE) staff. ADE/ECE staff also train PEAs on a continual basis regarding the use of progress monitoring tools to drive instruction and program improvement. Further guidance is provided through *Arizona's Early Childhood Assessment System for Ongoing Progress Monitoring* (<http://www.azed.gov/early-childhood/files/2012/02/arizonas-early-childhood-assessment-system-for-on-going-progress-monitoring-2012-13.pdf>) and monthly *GOLD Nugget* publications (<http://www.azed.gov/early-childhood/2011/11/14/teaching-strategies-gold/>).

### Data Analysis

The preschool outcome data was analyzed by Teaching Strategies.

### Valid and Reliable Data

The Arizona Department of Education/Early Childhood Special Education (ADE/ECSE) assures the validity and reliability of the early childhood outcomes (ECO) data by offering professional development on recording quality observations of children. PEAs have online access to an interrater reliability certification course provided by Teaching Strategies. Training is provided to administrators on accessing the Documentation Status Report that provides information on the number of observations used to assess the child and assign ratings.

The Early Childhood Quality Improvement Process (ECQUIP) also incorporates the early childhood outcomes assessment process in the districts' self-assessment rubric. The ECQUIP Manual is available at <http://www.azed.gov/early-childhood/files/2011/11/ecquip-binder-revision-8.29.pdf>.

**Discussion of Baseline Data for FFY 2011**

Baseline data indicate that 71.7%, 74.5% and 71.4% of children who entered the program below age expectations substantially increased their rate of growth by the time they exited the program in positive social-emotional skills, acquiring and using knowledge and skills, and taking appropriate action to meet their needs, respectively.

Data also indicate that, by the time they exited, 58.3%, 57.4% and 62.7% of children were functioning at a level comparable to same-aged peers in positive social-emotional skills, acquiring and using knowledge and skills and taking appropriate action to meet their needs, respectively.

**Proposed Targets for FFY 2012**

Targets were set based on the FFY 2011 baseline data and input from the stakeholder groups.

## Part B Arizona State Performance Plan (SPP) for 2005-2012

### Monitoring Priority: FAPE in the LRE

#### Indicator 8: Parent Involvement

Percent of parents with a child receiving special education services who report that schools facilitated parent involvement as a means of improving services and results for children with disabilities.

(20 U.S.C. 1416 (a)(3)(A))

#### Measurement

Percent = # of respondent parents who report schools facilitated parent involvement as a means of improving services and results for children with disabilities divided by the total # of respondent parents of children with disabilities times 100.

#### Overview of Issue / Description of System or Process

The data for this Indicator are taken from the Arizona Parent Survey. Arizona uses a 25-question parent survey developed by the National Center for Special Education Accountability Monitoring (NCSEAM). The survey is attached to this report.

The Arizona Parent Survey uses a Web-based data collection system to collect confidential demographic information and parental responses to the 25-question NCSEAM rating scale. A paper version of the survey is available in English and Spanish, and large font, if needed. Parents complete the demographic data and 25 survey items. The data are analyzed using WINSTEPS statistical software. Following NCSEAM guidelines, a threshold score of 600 has been established for a positive response to the item "The school explains what options parents have if they disagree with a decision of the school." The instrument measure implies that agreement with this threshold item indicates high likelihood of agreement with items located "under" it on the scale. A score of 600 is required for any parent's survey response to be considered positive.

Each school year a new cohort of PEAs is selected to administer the survey. The cohort is composed of PEAs:

- a) in the assigned year of the ESS monitoring cycle; or
- b) with a student population of 50,000 or greater; or
- c) which had < 10% response rate in the prior survey year; or,
- d) which are newly opened (typically, charter schools).

Every parent within these PEAs who has a child with an Individualized Education Program (IEP) is given an opportunity to complete the survey via either the Web-based data collection system or mail. ADE/ESS ensures all newly opened PEAs (typically, charter schools) are included in a cohort and administer the parent survey. Thus, within the cohort, a census of parents completes the survey. The use of these procedures will allow the State to meet the requirement to report on each PEA at least once during the SPP cycle.

The ADE/ESS Parent Information Network Specialists (PINS) offer extensive ongoing technical assistance to PEAs, including guidance on how to maximize their parental response and involvement rates. The PIN specialists also provide free consultation, training, print and electronic special education resources, and toll-free assistance to families throughout Arizona.

## Part B Arizona State Performance Plan (SPP) for 2005-2012

### Baseline Data for FFY 2005 (2005–2006)

44.9% [N = 1,375 / 3,061] of Arizona's parents of students with disabilities reported that schools facilitated parent involvement as a means of improving services and results for children with disabilities.

### Discussion of Baseline Data

The Web-based Parent Survey became available in May 2006; therefore, the State's baseline is calculated on all surveys submitted by parents between that date and December 2006. ESS offers PEAs technical assistance and routine parent response updates to encourage timely and full participation. The Assessment and Research and Evaluation Sections of the ADE assisted ESS in the analysis of the surveys submitted by parents through the use of the Winsteps measurement software program. Support for the ADE analysis was also provided by the National Center for Special Education Accountability and Monitoring (NCSEAM) staff and contractors through telephone and computer consultation.

The method of analysis identifies a threshold item on the survey that serves as the “cut point”—that is to say, the score at which it can be concluded that a school “facilitates parent involvement as a means of improving services and results for children with disabilities.” The threshold item was determined to have a scale score of 600 (out of 800). This means that 44.9% of the Arizona respondents strongly agreed (to very strongly agreed) with the threshold item and by assumption, other items below it. The threshold item on this survey is “The school explains what options parents have if they disagree with a decision of the school.”

While the percentage of schools participating in the current survey that reached the standard was only 44.9%, it is rewarding to note that the most commonly occurring rating by parents was the maximum score of 800 (457 / 3,061). Other ratings were fairly evenly distributed across the scale. The mean for all responses for FFY 2005 was 595 with a standard deviation of 140.

The short time frame between the end of the initial data collection period and the due date for the State Performance Plan made full analysis of response rates impractical. However, the ADE/ESS will conduct such analysis and adjust activities to ensure representative response rates among geographic, ethnic, and age groups for the FFY 2006 APR.

## Part B Arizona State Performance Plan (SPP) for 2005-2012

### Monitoring Priority: Disproportionality

#### Indicator 9: Racial / Ethnic Disproportionality

Percent of districts with disproportionate representation of racial and ethnic groups in special education and related services that is the result of inappropriate identification.

(20 U.S.C. 1416 (a)(3)(C))

#### Measurement

Percent = [(# of districts with disproportionate representation of racial and ethnic groups in special education and related services that is the result of inappropriate identification) divided by the (# of districts in the State)] times 100.

Include State's definition of "disproportionate representation."

Based on its review of the 618 data for FFY 2011, describe how the State made its annual determination that the disproportionate overrepresentation it identified of racial and ethnic groups in special education and related services was the result of inappropriate identification as required by §§300.600(d)(3) and 300.602(a), e.g., using monitoring data; reviewing policies, practices and procedures, etc. In determining disproportionate representation, analyze data, for each district, for all racial and ethnic groups in the district, or all racial and ethnic groups in the district that meet a minimum 'n' size set by the State. Report on the percent of districts in which disproportionate representation of racial and ethnic groups in special education and related services is the result of inappropriate identification, even if the determination of inappropriate identification was made after the end of the FFY 2011 reporting period, i.e., after June 30, 2012. If inappropriate identification is identified, report on corrective actions taken.

#### Overview of Issue / Description of System or Process

The ADE/ESS collects the data from the PEAs through the October 1 Child Count report. The data are the same as collected and reported on Table 1 (Child Count) of the Report of Children with Disabilities Receiving Special Education under Part B of the IDEA, as amended, for all children with disabilities aged 6–21 served under IDEA.

The data are analyzed using Statistical Analysis Software (SAS) to produce a weighted risk ratio (WRR) that identifies all racial/ethnic groups for all PEAs in the State. The ADE/ESS also uses SAS to calculate an alternate risk ratio (ARR) for PEAs that may have low numbers of students in either a particular ethnic group or other ethnicities, or both. The formula determines an ARR for PEAs if the PEA had more than 10 students in an ethnic group of interest, but less than 10 students in the comparable group. The ARR gives meaningful information about the multitude of small-sized rural school districts and public charter schools in Arizona, whereas risk ratios are more difficult to interpret based on small numbers of students.

Arizona revised the definition of disproportionate representation for FFY 2007. The revised definition of disproportionate representation is a weighted risk ratio of 3.00 or above for over representation and 0.30 or below for under representation, using a cell size of 30 for the target racial/ethnic group and 30 for the other racial/ethnic groups. The data are analyzed annually and PEAs flagged each year. When a PEA is flagged, then the policies, procedures, and practices of the PEA are reviewed annually to determine if the disproportionate representation is the result of inappropriate identification.

## Part B Arizona State Performance Plan (SPP) for 2005-2012

**Table 9.1: Definition to Flag PEAs for Disproportionate Representation**

Disproportionate Representation	Weighted Risk Ratio	# of Students in Target Racial/Ethnic Group	# of Students in Other Racial/Ethnic Groups in Special Education and Related Services
Over representation	$\leq 0.30$	30	30
Under representation	$\geq 3.00$	30	30

### Arizona's Procedures to Determine if Disproportionate Representation is the Result of Inappropriate Identification

Arizona revised and refined its State procedures in FFY 2008 to ensure that policies, procedures, and practices are reviewed annually for all PEAs in a consistent manner and meet the requirements of 34 CFR §§ 300.173, 300.600(d)(3), and 300.602(a).

The data are analyzed annually and PEAs are flagged each year for over representation, according to the State's definition. When a PEA is flagged, then the policies, procedures, and practices of the PEA are reviewed annually to determine if the disproportionate representation is the result of inappropriate identification.

### Arizona's Review of PEA's Policies and Procedures

On an annual basis, Arizona requires all PEAs to have special education policies and procedures in compliance with the requirements of 34 CFR § 300.111, § 300.201, and § 300.301 through § 300.311 prior to having Part B-IDEA Basic Entitlement Grant funds approved by the ADE/ESS. Each year, if the PEA makes any changes to the policies and procedures, the PEA must re-submit them to the State for review and acceptance. Each year, if the PEA does not make any changes to the policies and procedures, the PEA must submit a Statement of Assurance that says: "The PEA has not altered or modified the policies and procedures implementing the State and Federal requirements for services to children with disabilities previously submitted to and accepted by the Arizona Department of Education, Exceptional Student Services. If the PEA proposes to alter or modify the policies and procedures previously submitted to the Exceptional Student Services, the PEA must re-submit the policies and procedures to the Exceptional Student Services for review and acceptance."

### Arizona's Review of PEA's Practices

On an annual basis, Arizona calculates the WRR for each PEA and uses the data as a trigger to flag PEAs with disproportionate representation. If a PEA is flagged, then an investigation of the practices is required to determine whether the disproportionate representation is a result of inappropriate identification.

Review of practices when a PEA is flagged for over representation the first year:

- The ESS specialist reviews current monitoring data, if applicable.
- The PEA conducts a self assessment of the agency's child find, evaluation, and eligibility practices to determine whether the disproportionate representation is a result of inappropriate identification. The self assessment consists of a series of questions requiring narrative responses and a review of student files using the State's monitoring forms. The ADE/ESS

## Part B Arizona State Performance Plan (SPP) for 2005-2012

specialists conduct on-site visits and/or desk audits during the self assessment to validate the decisions made by the PEAs during the file reviews.

- Upon completion of the self assessment, the PEAs have the option to begin immediately revising their policies, procedures, and practices related to child find, evaluation, and eligibility and to correct any self-identified noncompliance. No more than 60 days after completion of the self assessment, the ESS specialists then interview the special education administrators and review student files via on-site visits and/or desk audits to verify correction of instances of the self-identified noncompliance, including child specific, and to ensure that regulatory requirements are being implemented based on subsequent file reviews of updated data.

Review of practices when a PEA is flagged for over representation for two or more consecutive years:

- If the PEA did not have disproportionate representation as a result of inappropriate identification the first year, then the ESS program specialist:
  - Reviews current monitoring data, if applicable, and;
  - Validates the prior year's self assessment by reviewing a sample of student files.
- If the PEA had disproportionate representation as a result of inappropriate identification the first year, then the PEA is required to:
  - Review current monitoring data, if applicable;
  - Review the prior year's self assessment, and describe the issues identified;
  - Describe the steps taken to resolve those issues;
  - Describe any current concerns regarding possible inappropriate identification;
  - Describe the resources and technical assistance utilized to help address the issues related to disproportionate representation within the agency; and,
  - Review individual student files using the State's monitoring forms.
    - The ADE/ESS specialists conduct on-site visits and/or desk audits during the file reviews to validate the decisions made by the PEAs.
    - The ESS specialists verify correction of instances of any self-identified noncompliance, including child specific, through on-site visits and/or desk audits.
    - The ESS specialist ensures that regulatory requirements are being implemented based on subsequent file reviews of updated data.

When Arizona makes findings of noncompliance as a result of the review of policies, practices and procedures, the PEA has one year from the date of written notification from the State to correct the noncompliance.

### Baseline Data for FFY 2005 (2005–2006) Revised

0.0% of Arizona PEAs had disproportionate representation of racial and ethnic groups in special education and related services that was a result of inappropriate identification. [N = 0 / 549]

### Discussion of Baseline Data

In order to comply with the OSEP requirements, Arizona is making significant modifications to its procedures for identifying PEAs with disproportionate representation of racial and ethnic groups that is the result of inappropriate identification. The State is submitting new baseline information for FFY 2005 based on the procedures.

Arizona met its target of having no PEAs with disproportionate representation in special education that was a result of inappropriate identification practices. While it is difficult to ascertain whether or not any over/under representation is a direct result of the inappropriate practices identified through monitoring, for the purposes of this report that assumption is made.

Part B Arizona State Performance Plan (SPP) for 2005-2012

Arizona has elected to use the same definition for “disproportionate representation” and for “significant disproportionality” in order to minimize confusion within the State and to maximize the efforts of the ADE/ESS staff in completing the required reviews of policies, procedures, and practices. ADE/ESS ensures that the PEAs with a WRR  $\geq 3.0$  reserve the maximum amount of their Part B allocation for early intervening services regardless of the appropriateness of procedures.

**Table 9.2: Number of PEAs with Disproportionate Representation by Ethnicity in FFY 2005**

WRR standard	American Indian	Asian	Black	Hispanic	White
$\geq 3.0$	2	0	1	0	2
<i>Additional over representation within above PEAs</i>					
$< .33$	1	0	0	2	0
<i>Additional under representation within above PEAs</i>					

**Table 9.3: Status Report PEAs with Disproportionate Representation by Race / Ethnicity**

WRR standard	American Indian	Asian	Black	Hispanic	White
$\geq 3.0$	2 PEAs: Disproportionality not a result of inappropriate practices		1 PEA: Disproportionality not a result of inappropriate practices		2 PEAs: Disproportionality not a result of inappropriate practices
$< .33$	1 PEA: Disproportionality not a result of inappropriate practices			2 PEAs: Disproportionality not a result of inappropriate practices	

In summary, the status of the 8 PEAs represented in Tables 9.2 and 9.3 is:

- In 8 PEAs, the disproportionate representation was not a result of inappropriate policies, procedures, or practices. These PEAs are not included in the numerator for this indicator.

## Part B Arizona State Performance Plan (SPP) for 2005-2012

### Monitoring Priority: Disproportionality

#### Indicator 10: Racial / Ethnic Disproportionality by Disability

Percent of districts with disproportionate representation of racial and ethnic groups in specific disability categories that is the result of inappropriate identification.

(20 U.S.C. 1416 (a)(3)(C))

#### Measurement

Percent = [(# of districts with disproportionate representation of racial and ethnic groups in specific disability categories that is the result of inappropriate identification) divided by the (# of districts in the State)] times 100.

Include State's definition of "disproportionate representation."

Based on its review of the 618 data for FFY 2011, describe how the State made its annual determination that the disproportionate overrepresentation it identified of racial and ethnic groups in specific disability categories was the result of inappropriate identification as required by §§300.600(d)(3) and 300.602(a), e.g., using monitoring data; reviewing policies, practices and procedures, etc. In determining disproportionate representation, analyze data, for each district, for all racial and ethnic groups in the district, or all racial and ethnic groups in the district that meet a minimum 'n' size set by the State. Report on the percent of districts in which disproportionate representation of racial and ethnic groups in specific disability categories is the result of inappropriate identification, even if the determination of inappropriate identification was made after the end of the FFY 2011, i.e., after June 30, 2012. If inappropriate identification is identified, report on corrective actions taken.

#### Overview of Issue / Description of System or Process

The ADE/ESS collects the data from the PEAs through the October 1 Child Count report. The data are the same as collected and reported on Table 1 (Child Count) of the Report of Children with Disabilities Receiving Special Education under Part B of the IDEA, as amended, for all children with disabilities aged 6–21 served under IDEA.

The data are analyzed using Statistical Analysis Software (SAS) to produce a weighted risk ratio (WRR) that identifies all racial/ethnic groups for all PEAs in the State. The ADE/ESS also uses SAS to calculate an alternate risk ratio (ARR) for PEAs that may have low numbers of students in either a particular ethnic group or other ethnicities, or both. The formula determines an ARR for PEAs if the PEA had more than 10 students in an ethnic group of interest, but less than 10 students in the comparable group. The ARR gives meaningful information about the multitude of small-sized rural school districts and public charter schools in Arizona, whereas risk ratios are more difficult to interpret based on small numbers of students.

Arizona revised the definition of disproportionate representation for FFY 2007. The revised definition of disproportionate representation is a weighted risk ratio of 3.00 or above for over representation and 0.30 or below for under representation, using a cell size of 30 for the target racial/ethnic group and 30 for the other racial/ethnic groups. The data are analyzed annually and PEAs flagged each year. When a PEA is flagged, then the policies, procedures, and practices of the PEA are reviewed annually to determine if the disproportionate representation is the result of inappropriate identification.

## Part B Arizona State Performance Plan (SPP) for 2005-2012

**Table 10.1 Definition to Flag PEAs for Disproportionate Representation**

<b>Disproportionate Representation</b>	<b>Weighted Risk Ratio</b>	<b># of Students in Target Racial/Ethnic Group</b>	<b># of Students in Other Racial/Ethnic Groups in Special Education and Related Services</b>
Over representation	$\leq 0.30$	30	30
Under representation	$\geq 3.00$	30	30

### **Arizona's Procedures to Determine if Disproportionate Representation is the Result of Inappropriate Identification**

Arizona revised and refined its State procedures in FFY 2008 to ensure that policies, procedures, and practices are reviewed annually for all PEAs in a consistent manner and meet the requirements of 34 CFR §§ 300.173, 300.600(d)(3), and 300.602(a).

The data are analyzed annually and PEAs are flagged each year for over representation, according to the State's definition. When a PEA is flagged, then the policies, procedures, and practices of the PEA are reviewed annually to determine if the disproportionate representation is the result of inappropriate identification.

### **Arizona's Review of PEA's Policies and Procedures**

On an annual basis, Arizona requires all PEAs to have special education policies and procedures in compliance with the requirements of 34 CFR § 300.111, § 300.201, and § 300.301 through § 300.311 prior to having Part B-IDEA Basic Entitlement Grant funds approved by the ADE/ESS. Each year, if the PEA makes any changes to the policies and procedures, the PEA must re-submit them to the State for review and acceptance. Each year, if the PEA does not make any changes to the policies and procedures, the PEA must submit a Statement of Assurance that says: "The PEA has not altered or modified the policies and procedures implementing the State and Federal requirements for services to children with disabilities previously submitted to and accepted by the Arizona Department of Education, Exceptional Student Services. If the PEA proposes to alter or modify the policies and procedures previously submitted to the Exceptional Student Services, the PEA must re-submit the policies and procedures to the Exceptional Student Services for review and acceptance."

### **Arizona's Review of PEA's Practices**

On an annual basis, Arizona calculates the WRR for each PEA and uses the data as a trigger to flag PEAs with disproportionate representation. If a PEA is flagged, then an investigation of the practices is required to determine whether the disproportionate representation is a result of inappropriate identification.

Review of practices when a PEA is flagged for over representation the first year:

- The ESS specialist reviews current monitoring data, if applicable.
- The PEA conducts a self assessment of the agency's child find, evaluation, and eligibility practices to determine whether the disproportionate representation is a result of inappropriate identification. The self assessment consists of a series of questions requiring narrative responses and a review of student files using the State's monitoring forms. The ADE/ESS

## Part B Arizona State Performance Plan (SPP) for 2005-2012

specialists conduct on-site visits and/or desk audits during the self assessment to validate the decisions made by the PEAs during the file reviews.

- Upon completion of the self assessment, the PEAs have the option to begin immediately revising their policies, procedures, and practices related to child find, evaluation, and eligibility and to correct any self-identified noncompliance. No more than 60 days after completion of the self assessment, the ESS specialists then interview the special education administrators and review student files via on-site visits and/or desk audits to verify correction of instances of the self-identified noncompliance, including child specific, and to ensure that regulatory requirements are being implemented based on subsequent file reviews of updated data.

Review of practices when a PEA is flagged for over representation for two or more consecutive years:

- If the PEA did not have disproportionate representation as a result of inappropriate identification the first year, then the ESS program specialist:
  - Reviews current monitoring data, if applicable, and;
  - Validates the prior year's self assessment by reviewing a sample of student files.
- If the PEA had disproportionate representation as a result of inappropriate identification the first year, then the PEA is required to:
  - Review current monitoring data, if applicable;
  - Review the prior year's self assessment, and describe the issues identified;
  - Describe the steps taken to resolve those issues;
  - Describe any current concerns regarding possible inappropriate identification;
  - Describe the resources and technical assistance utilized to help address the issues related to disproportionate representation within the agency; and,
  - Review individual student files using the State's monitoring forms.
    - The ADE/ESS specialists conduct on-site visits and/or desk audits during the file reviews to validate the decisions made by the PEAs.
    - The ESS specialists verify correction of instances of any self-identified noncompliance, including child specific, through on-site visits and/or desk audits.
    - The ESS specialist ensures that regulatory requirements are being implemented based on subsequent file reviews of updated data.

When Arizona makes findings of noncompliance as a result of the review of policies, practices and procedures, the PEA has one year from the date of written notification from the State to correct the noncompliance.

### Baseline Data for FFY 2005 (2005–2006)

3.8% of Arizona PEAs had disproportionate representation of racial and ethnic groups by disability in special education and related services that was a result of inappropriate identification. [N = 21 / 549]

### Discussion of Baseline Data

In order to comply with the OSEP requirements, Arizona is making significant modifications to its procedures for identifying PEAs with disproportionate representation of racial and ethnic groups that is the result of inappropriate identification. The State is submitting new baseline information for FFY 2005 based on the procedures.

Arizona did not meet its target of having no PEAs with disproportionate representation in any disability category that was a result of inappropriate identification practices. While it is difficult to

Part B Arizona State Performance Plan (SPP) for 2005-2012

ascertain whether or not any over/under representation is a direct result of the inappropriate practices identified through monitoring, for the purposes of this report that assumption is made.

ADE/ESS ensures that the PEAs with a WRR  $\geq 3.0$  reserve the maximum amount of their Part B allocation for early intervening services as required by CFR § 300.646 (b)(2) regardless of the appropriateness of their policies, procedures, and practices.

				yet reached	
--	--	--	--	-------------	--

In summary, the status of the 69 PEAs represented in Tables 10.2 and 10.3 is:

- In 48 PEAs, the disproportionate representation was not a result of inappropriate policies, procedures, or practices. These PEAs are not included in the numerator for this indicator.
- In 11 PEAs, disproportionate representation and inappropriate practices coexisted, however the PEA has corrected the practices; therefore any disproportionality that continues to exist is not considered to be a result of inappropriate practices. These PEAs are included in the numerator because they had inappropriate practices at the time of the monitoring and data collection for FFY 2005.
- In 10 PEAs, disproportionate representation and inappropriate practices coexist and the PEAs are in the process of correcting their practices but the one-year deadline for correction has not yet been reached. These PEAs are included in the numerator. The ADE/ESS will report on the status of these PEAs in the FFY 2007 APR.

**Monitoring Priority: Effective General Supervision Part B / Child Find**

**Indicator 11: Evaluation Timelines**

Percent of children who were evaluated within 60 days of receiving parental consent for initial evaluation or, if the State establishes a timeframe within which the evaluation must be conducted, within that timeframe.

(20 U.S.C. 1416 (a)(3)(B))

**Measurement**

- a. # of children for whom parental consent to evaluate was received.
- b. # of children whose evaluations were completed within 60 days (or State-established timeline).

Account for children included in a but not included in b. Indicate the range of days beyond the timeline when the evaluation was completed and any reasons for the delays.

Percent = [(b) divided by (a)] times 100.

**Overview of Issue / Description of System or Process**

The data for this indicator are collected through the ESS monitoring system. The 60-day timeline for initial evaluations is measured from parental consent for the collection of additional data to the date of the eligibility determination on the sampled files. The monitoring system includes a sample of children who were evaluated and found to be not eligible to ensure that the reporting on this indicator addresses both groups of students.

The monitoring system includes a root cause analysis when a PEA does not meet the 100% compliance status. Evaluations that exceeded the 60-day timeline are reviewed again following the monitoring to ensure that the evaluation was completed even though the timeline was exceeded. The monitoring system also requires that 100% compliance on this requirement be demonstrated either through extensive subsequent file sampling or database analysis prior to closing out a PEA's monitoring. Information related to the number of days beyond the 60-day timeline and the specific reasons for any delays are reported.

**Baseline Data for FFY 2004 and FFY 2005**

Year	# of initial evaluations	# completed within 60 days of consent	Percent compliant
FFY 2004	618	505	82%
FFY 2005	672	577	86%

**Discussion of Baseline Data**

Of the 672 initial evaluation files reviewed during the FFY 2005 monitoring, 86% met the 60-day requirement for evaluation. While this does not reach the target of 100%, it might be considered a respectable figure given that the 60-day timeline is a new federal requirement.

**Part B Arizona State Performance Plan (SPP) for 2005-2012**

The ESS monitoring system was modified for FFY 2005 to include a root cause analysis when a PEA did not meet the 100% compliance status. In addition, the monitoring system now requires that 100% compliance on this requirement be demonstrated either through extensive file sampling or data base analysis prior to closing out a PEA's monitoring. Information regarding the specific reasons for delays will be available for the FFY 2006 Annual Performance Report; however, anecdotal reports indicate that delays are caused by staff availability issues, inadequate tracking systems, parentally-caused delays, and the need for medical or other highly specialized evaluations that are difficult to schedule quickly.

### Monitoring Priority: Effective General Supervision Part B / Effective Transition

#### Indicator 12: Early Childhood Transition

Percent of children referred by Part C prior to age 3, who are found eligible for Part B, and who have an IEP developed and implemented by their third birthdays.

(20 U.S.C. 1416 (a)(3)(B))

#### Measurement

- # of children who have been served in Part C and referred to Part B for Part B eligibility determination.
- # of those referred determined to be NOT eligible and whose eligibility was determined prior to their third birthdays.
- # of those found eligible who have an IEP developed and implemented by their third birthdays.
- # of children for whom parent refusal to provide consent caused delays in evaluation or initial services or to whom exceptions under 34 CFR § 300.301(d) applied.
- # of children who were referred to Part C less than 90 days before their third birthdays.

Account for children included in a but not included in b, c, d or e. Indicate the range of days beyond the third birthday when eligibility was determined and the IEP developed and the reasons for the delays.

Percent = [(c) divided by (a - b - d - e)] times 100.

#### Overview of Issue / Description of System or Process

The Arizona Department of Education Early Childhood Education division (ADE/ECE) works with the Arizona Department of Economic Security/Arizona Early Intervention Program (DES/AzEIP), the State entity responsible for Part C early intervention services, to ensure children and their families experience a timely transition from Part C early intervention services to Part B preschool special education services.

The ADE/ECE collects census data for all children who are referred for DES/AzEIP services through the Annual Special Education Data Collection, an ADE Web-based system. For those children found eligible, PEAs report the number of children who have an Individualized Education Program (IEP) implemented by the third birthday. For children who are not provided FAPE or who are found non-eligible by age three, data are collected for the reason and number of days beyond the timeline that FAPE was provided.

The ADE/ECE has procedures to correct noncompliance within one year of written notification of noncompliance to the PEAs. If noncompliance is not corrected within one year from the date of written notification, enforcement action consists of interruption of funds until noncompliance is corrected.

#### Baseline Data for FFY 2004 (2004–2005)

ADE/ECE/ESS did not collect data isolating children referred by Part C for Part B eligibility in 2004–2005 through any statewide data collection system. However, the ESS did monitor for compliance

## Part B Arizona State Performance Plan (SPP) for 2005-2012

with transition requirements, including ensuring FAPE by age three during its standard monitoring cycle. Figure 4 reports the monitoring results over the last five years on this line item.

**Figure 12.1: FAPE by Age 3 Monitoring Results**

### Discussion of Baseline Data

See Indicator 15 for additional information on the ESS monitoring system.

Prior to 2005–2006, Arizona did not collect data through SAIS on IEP development by a child's third birthday. Beginning in 2005–2006, Arizona modified indicators in SAIS so that PEAs will indicate IEP development by a child's third birthday. Beginning in 2006–2007, SAIS will be further modified so that PEAs will indicate whether or not a child was served in Part C before becoming eligible for Part B services. Both enhancements to SAIS will enable ADE/ECE/ESS to capture data necessary from 100% of PEAs to accurately report on this indicator.

AzEIP is also enhancing their data system by adding the following indicator fields for all children referred by Part C to Part B: "transition meeting date," "date IEP developed," and "preschool start date." These additional fields will provide further checks on data reported by PEAs for this indicator in the future.

### FFY 2005 Data Update to the State Performance Plan

Prior to the 2005–2006 school year, the only data collection method that Arizona had for this indicator was monitoring statistics. The data reported in the SPP was based on a sample size of 236 files of children who were Part B eligible. With the publication of the requirements for the SPP, this method of calculation was no longer viable as it did not consider the timelines for children who were found ineligible for Part B, nor did it seem to represent sufficient sample size.

To respond to this problem, the ADE/ESS instituted a year-end report (to coincide with the collection of other § 618 data) that captured the data as it was required for the SPP. The reporting requirement was extended to all elementary and unified districts in the State, and thus, the data presented in the FFY 2005 APR is no longer based on a sample but on the entire population of children exiting Part C who were referred to Part B.

**Overview of Issue / Description of System or Process**

The data for this indicator are extracted from the ESS monitoring system. The National Secondary Transition Technical Assistance Center (NSTTAC) Indicator 13 Checklist was used as a guide for the eight components from which data are pulled. The eight items are:

- Measurable post-secondary goals
- Postsecondary goals updated annually
- Postsecondary goals based upon age appropriate transition assessment
- Transition services
- Courses of study
- Annual IEP goals related to transition service needs
- Student invited to IEP meeting
- Representative of participating agency invited to IEP meeting

A root cause analysis is included in the monitoring when compliance is less than 100% for any component related to this indicator. The monitoring system also requires that 100% compliance on this requirement be demonstrated through extensive subsequent file sampling prior to closing out a PEA's monitoring.

### Discussion of Baseline Data for FFY 2009 (using 2009-2010 data)

The data for Indicator 13 are from the Arizona monitoring system. Public education agencies (PEAs) are selected for monitoring each fiscal year based on the results of a review of the agency's data, including that from the SPP/APR, dispute resolution, audit findings, and annual determinations. While Arizona has maintained a 6-year monitoring cycle with assigned activities always occurring in year 4, PEAs can be moved into year 4 when the data reviews indicate systemic issues.

Data are collected from the PEAs during one of three types of monitorings:

- Data Review - PEAs review student files with a focus on Indicator 13. The ADE/ESS specialist validates the compliance calls. The student file forms are submitted to ESS for data entry.
- Self-Assessment - PEAs review student files and collect data for Indicator 13. The PEAs also focus on identified SPP/APR Indicators with agency results that have not met the State target. The ADE/ESS specialist validates the compliance calls. The student file forms are submitted to ESS for data entry.
- On-Site - PEAs and the ADE/ESS team reviews student files, collects data through surveys and interviews, and collects data for Indicator 13. The ADE/ESS staff inputs data.

During FFY 2009, a finding by incidence for Indicator 13 is defined as every individual source of information, and having a description of a Federal or State statute or regulation. A source of information for Indicator 13 is a student file. The finding by incidence is a written notification to the PEA by the State that the individual source of information is noncompliant.

During the summer of 2009, the ESS Monitoring Team and the ESS transition specialists aligned the line items in the monitoring system to the NSTTACC Indicator 13 Checklist items so that baseline data could be captured. The baseline data include all eight components from the NSTTAC checklist.

### FFY 2009 Findings of Noncompliance

# of findings by incidence of noncompliance	# of findings by incidence corrected prior to one-year timeline as of 1/15/11
87	65

Arizona made 87 findings of noncompliance in FFY 2009. Although the PEAs have one year to correct the noncompliance, 65 findings have been corrected as of January 15, 2011.

**Improvement Activities / Timelines / Resources**

**Improvement Activities Developed in FFY 2007 Completed, Discontinued, and/or Revised, with Justification, for FFY 2009**

The following improvement activities that were developed in FFY 2007 have been completed, discontinued, and/or revised for FFY 2008 and FFY 2009. Activities #1 (a), (b), and (c) are completed and revised; activities #2 (a) through (h) are completed and/or discontinued. Revisions to the improvement activities related to goal #1 are necessary because of the redesign of the comprehensive training plan for secondary transition and the inclusion of all required eight components into the Indicator 13 measurement. The discontinuation of improvement activities related to goal #2 are due to integration of the activities of the pilot Transition Mentor program into the ESS capacity building grant related to secondary transition in FFY 2009. Refer to the new improvement activities in separate section below.

**Improvement Activities Developed in FFY 2008 and Completed for FFY 2009**

The following are new and/or revised improvement activities developed and implemented during FFY 2008 and FFY 2009 to ensure compliance with the transition requirements. Arizona did not report on Indicator 13 in the FFY 2008 APR; thus, these activities were not reported. Revisions to the FFY 2007 improvement activities were necessary because of the redesign of the comprehensive training plan for secondary transition and the inclusion of all required eight components into the Indicator 13 measurement. A new goal and activities were written to incorporate the activities of the pilot Transition Mentor program into the ESS capacity building grant related to secondary transition in FFY 2008.

Using a scale of 1 to 5 (1 = low and 5 = high), 44% of STMP participants rated their entry level knowledge as a 4 or 5, compared to 95% of participants at exit from the STMP training experience. Additionally, 12% of participants indicated "low" entry level knowledge, compared with 0% of participants' post-STMP training.</p>

		<p>d) ADE/ESS also anticipated using pre/post Annual Site Visit (ASV) data as a measure to determine effectiveness of training and improved level of Indicator 13 compliance. ASV data was not collected on every STMP team between the conclusion of Year 1 training (April 2010) and June 30, 2010. However, of the five PEAs with spring ASV data, average compliance increased from 57% (from fall 2008 ASV data used for STMP eligibility) to 99%. ADE/ESS is reviewing and refining processes to determine if ASV data can be obtained and used as a pre/post measure. Current barriers to its use include: ability to collect post-training ASV data by ESS program specialists within the timeframe needed for SPP/APR reporting, number of files reviewed, and representativeness of IEPs written post-STMP training.</p> <p>e) Anecdotal information provided by STMP training participants and ESS program specialists indicates significant improvement in PEA knowledge and compliant practices.</p>

**Overview of Issue / Description of System or Process**

In the State Performance Plan (SPP) for FFY 2009, Arizona established a baseline for each of the three measures A, B, and C consistent with the language of the revised measurement table (May 2010), developed new targets for measures A, B, and C, and identified improvement activities through FFY 2012.

In the APR development for FFY 2011, anomalies in Indicator I4A and 14B were observed. The ADE/ESS drilled into the data and discovered a computer coding error that affected the hierarchical distribution of outcome categories. In an effort to assure valid and reliable data were reported, ADE/ESS corrected the coding error. Simultaneously, the ADE Information Technology (IT) division reviewed the National Post-School Outcomes Center's (NPSO's) "Calculations for Indicator 14 Using Post-School Outcome Survey" contained in the updated June 14, 2010, *Post-School Outcome Data Collection Protocol*, to assure there were no other IT coding inconsistencies. During this process, the IT division discovered three survey question response options that were not included in the NPSO guidance document. The ADE/ESS requested clarification on the missing response options, which resulted in the NPSO revising their calculation table.

## Part B Arizona State Performance Plan (SPP) for 2005-2012

The NPSO calculation table, dated October 26, 2012, was then used to revise and update the ADE/ESS PSO Survey online application and calculations to align fully with NPSO's revised *Post-School Outcome Data Collection Protocol*. When the hierarchy computer coding error was corrected and the new calculations applied, Arizona's measures A, B, and C changed, necessitating a reset of the FFY 2009 baseline data.

The FFY 2005–2012 State Performance Plan, FFY 2011 Revision, includes the new FFY 2011 baseline data and new FFY 2012 targets for measures A, B, and C.

To summarize:

- The FFY 2005–2012 State Performance Plan, FFY 2009 Revision, in which Arizona established a baseline for measures A, B, and C consistent with the language of the revised measurement table (May 2010), developed new targets for measures A, B, and C, and identified improvement activities through FFY 2013, has been revised for FFY 2011.
- The FFY 2011 data, discussion of outcomes, and FFY 2012 targets are based on December 2012 corrected data.
- The FFY 2005–2012 State Performance Plan, FFY 2011 Revision, reports new baseline data for measures A, B, and C, and new targets for FFY 2012.

### Data

#### **Data Collection Methods**

The ADE/ESS used a sampling procedure to collect Post School Outcome (PSO) data. Over the course of the State Performance Plan (SPP), each PEA serving students 16 years old and older is asked to collect and report post school outcomes data during the second year of the six-year monitoring cycle. The monitoring cycle is a representative sample of Arizona's districts and charter schools and the representative sample is based on the categories of disability, race, and gender. The ADE/ESS sampling plan was approved by OSEP.

FFY 2011 marked the beginning of cycle two of Arizona's PSO Data Collection requirement, in which all eligible PEAs are assigned to a collection year for inclusion in the SPP. Of Arizona's eligible PEAs, 54 were identified to participate in the PSO Survey requirement for FFY 2011. Of this number, 13 PEAs did not have any leavers who met the criteria (youth with a current IEP who aged out, graduated, or dropped out) to be eligible to participate in the PSO Survey during the 2010–2011 school year. This resulted in 41 PEAs that had eligible leavers and these PEAs were required to conduct the PSO Survey during FFY 2011. It should be noted that of these 41 PEAs, two were charter schools that closed during the 2010–2011 school year and no longer had staff available to complete the PSO Survey requirement for students who exited.

In order to participate in the PSO Survey, PEAs gather contact information on student leavers and either input the data into the online PSO data collection system or maintain contact information locally. The PSO data collection system uses a secure application as part of the ADE Common Logon. The application includes an auto-population of student demographic information and exit reason imported directly from the Student Accountability Information System (SAIS), a Web-based system for reporting all student-level details to the ADE. PEAs designate district or charter school personnel to contact student leavers or designated family members (i.e., parent, grandparent, or guardian), conduct phone interviews, and input survey data into the online PSO data collection system. Youth or family members were contacted between July 1 and September 30, 2012, after

## Part B Arizona State Performance Plan (SPP) for 2005-2012

being out of school for at least one year. Arizona's two PEAs with an average daily membership exceeding 50,000 are included in the data collection each year.

### Definitions

The following definitions are used by the ADE/ESS in the data collection and reporting for Indicator 14:

Higher Education includes youth who have been enrolled on a full- or part-time basis in a community college (two-year program) or a college/university (four- or more year program) for at least one complete term, at any time in the year since leaving high school.

Competitive Employment includes youth who have worked for pay at or above the minimum wage in a setting with others who are nondisabled for a period of 20 hours a week for at least 90 days at any time in the year since leaving high school. This includes military employment.

Other Postsecondary Education or Training includes youth enrolled on a full- or part-time basis for at least one complete term at any time in the year since leaving high school in an education or training program (e.g., Job Corps, adult education, workforce development program, or vocational technical school that is less than a two-year program).

Some Other Employment includes youth who have worked for pay or been self-employed for a period of at least 90 days at any time in the year since leaving high school. This includes working in a family business (e.g., farm, store, ranching, catering services, etc.).

Respondents are youth, young adults, or designated family members who answer the PSO Survey.

Leavers are youth or young adults who left school by graduating, aging out, or leaving school early (i.e., dropped out) or who were expected to return to school and did not.

### Response Rate and Representativeness

The response rate was 70%. Table 14.1 shows that Arizona's FFY 2011 sample included 2,032 youth who were eligible to take the survey. Interviews were conducted with 1,423 youth, young adults, or their family members. The FFY 2011 70% response rate represents a 9% increase in response rate over FFY 2010.

**Table 14.1 Response Rate Calculation**

Number of leavers in the sample	2,149
Subtract the number of youth ineligible (those who had returned to school, or were deceased, or whose data were uploaded by the PEA to the SAIS system in error)	$80 + 1 + 36 = 117$
Number of youth eligible to contact	2,032
Number of completed surveys	1,423
Response rate $(1,423 / 2,032) * 100$	<b>70%</b>

The ADE/ESS used the NPSO Response Calculator to calculate representativeness of the respondent group on the characteristics of (a) disability type, (b) ethnicity, (c) gender, and (d) exit status (e.g., dropout) to determine whether the youth who responded to the interviews were similar to, or different from, the total population of youth with an IEP who exited school during 2010–2011. According to the NPSO Response Calculator, differences between the Respondent Group and the

## Part B Arizona State Performance Plan (SPP) for 2005-2012

Target Leaver Group +/- 3% are important. Negative differences indicate an under representativeness of the group and positive differences indicate over representativeness. In Table 14.2, bolded text is used to indicate a difference exceeding a +/- 3% interval.

As shown in Table 14.2, respondents were slightly overrepresented in the category of all other disabilities (AO) and underrepresented in the category of dropout. All other categories are deemed representative of 2010–2011 target leavers. Although the dropout category continues to be underrepresented, the difference for FFY 2011 was significantly less than in FFY 2010 and FFY 2009 (–4.86% vs. –6.77% vs. –6.81%), respectively. Each year (FFY 2010 and FFY 2011), the number of youth responding to the PSO Survey from the dropout category has increased. The ADE/ESS is encouraged by the increase in representativeness in the dropout category. The ADE/ESS will continue its efforts to increase response rates, especially among youth who drop out.

### Missing Data

Arizona's PSO response rate for FFY 2011 was 70% (2,032 youth eligible to contact and 1,423 respondents). The FFY 2011 PSO Survey is missing data on 30% or 609 former students. An analysis of missing data indicated that the largest segments of missing data were the result of either schools' not being able to contact leavers after three attempts (303) or their not having correct contact information (237). In FFY 2010, approximately 150 surveys could not be conducted because contact information was not collected by the PEA. A marked improvement in this category was made in FFY 2011, with only 13 surveys identified as contacts not collected. The ADE/ESS attributes this improvement to increased efforts during trainings to prepare PEAs to participate in the PSO Survey and providing a sample form on the ADE/ESS Web site for collecting contact information.

### Selection Bias

The category of all other disabilities (AO) was slightly over represented by 0.22%. This result is evidence that Arizona PEAs are successfully reaching exiters for them to complete the survey. The under representativeness of youth and young adults in the category of dropout could be attributed to the fact that, in general, this group of youth is a difficult population to reach. Although the dropout category continues to be under represented, the difference between the number of youth and young adults who responded to the survey and were eligible for the survey in FFY 2011 was significantly less than in FFY 2010 and FFY 2009 (–4.86% vs. –6.77% vs. –6.81%). The ADE/ESS is encouraged by the increase in representativeness in the dropout category. The State will continue to work with NPSO to identify strategies to encourage survey responses from youth in the dropout category.

### Baseline Data for FFY 2011

## Part B Arizona State Performance Plan (SPP) for 2005-2012

FFY 2011 (2011–2012)	Indicator 14 Baseline Data		
	14A	14B	14C
Number of respondent leavers	371	849	1048
Percentage of respondent leavers	26.1%	59.7%	73.6%
Total respondents	1423		

**Discussion of Baseline Data for FFY 2011**December 2012 Corrected Data

There were 1,423 total respondents to the PSO Survey. Each leaver was counted once in the highest category:

- 1) 371 respondent leavers were enrolled in “higher education”
- 2) 478 respondent leavers were engaged in “competitive employment” (and not counted in number 1 above)
- 3) 114 respondent leavers were enrolled in “some other postsecondary education or training” (and not counted in numbers 1 or 2 above)
- 4) 85 respondent leavers were engaged in “some other employment” (and not counted in numbers 1, 2, or 3 above)

Thus:

14A = 371 (#1) divided by 1,423 (total respondents) = 26.1%

14B = 371 (#1) + 478 (#2) divided by 1,423 (total respondents) = 59.7%

14C = 371 (#1) + 478 (#2) + 114 (#3) + 85 (#4) divided by 1,423 (total respondents) = 73.6%

Figure 14.1, Arizona PSO Survey FFY 2011 Cohort, 2010–2011 School Year Exiters, shows the outcome categories, including the not engaged category, the number of leavers in each category, and the percentage of leavers in each outcome category. The table below the chart shows the percentages for each measure A, B, and C. As shown in Figure 14.1, the largest percentage of leavers was competitive employment with 33.6% (n = 478) of leavers counted in this category. The second largest percentage of leavers was not engaged with 26.4% (n = 375). The remaining categories, from largest percentage to smallest, were enrolled in higher education, 26.1% (n = 371); enrolled in other postsecondary education or training, 8% (n = 114); and some other employment, 6% (n = 85).

### Disaggregated Outcomes by Subgroups

The ADE/ESS used the NPSO Data Display Templates to allow for a thorough understanding of the post school outcomes of Arizona's youth and young adults. The outcomes were examined by each subgroup: gender, disability type, ethnicity, and exit type.

### Post School Outcomes by Gender

As displayed in Figure 14.2, Indicator 14: Arizona's Post School Outcomes by Gender, female leavers in Arizona had similar outcomes to males in the areas of some other employment and enrolled in other postsecondary education or training. Analysis of engagement in higher education and competitive employment reveals that females are slightly more likely (6%) to have enrolled in higher education (30% vs. 24%) and slightly less likely (7%) to be competitively employed than their male counterparts (29% vs. 36%). The ADE/ESS will share this information with PEAs and assist districts and charters in analyzing root causes for these gender discrepancies.

**Figure 14.2, Indicator 14: Arizona's Post School Outcomes by Gender**

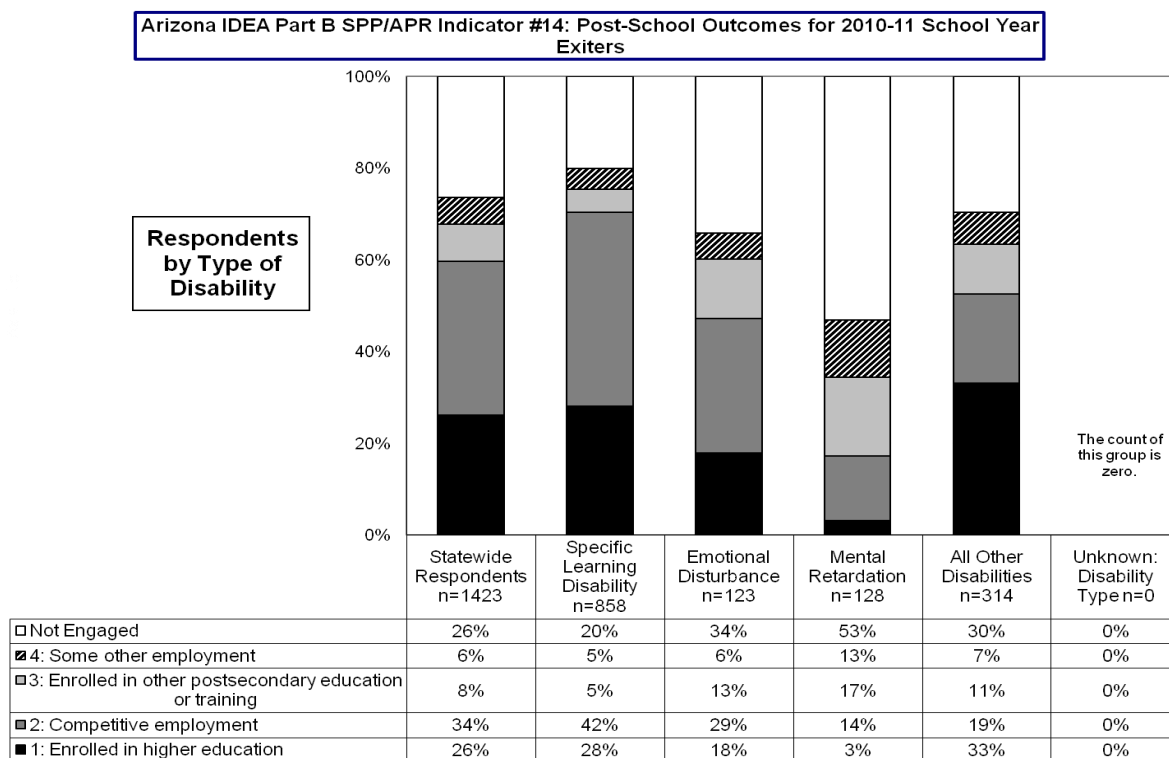

## Part B Arizona State Performance Plan (SPP) for 2005-2012

### Post School Outcomes by Disability Category

Figure 14.3, Indicator 14: Arizona's Post School Outcomes Respondents by Type of Disability, shows that individuals with a disability category of mental retardation (MR) were twice as likely to be not engaged (53%) than those in the overall State rate (26%). (It should be noted that the "mental retardation" category was used for this analysis since the terminology update to "intellectually disabled" (ID) in this disability category has not yet been reflected in the SAIS system.) Further analysis of the outcomes of these individuals indicates that of those who responded to the PSO Survey, 30% were engaged in some other employment (13%) or enrolled in other postsecondary education or training (17%) compared to the overall State respondent rate of 14% engagement in some other employment or some other postsecondary education. Furthermore, engagement rates in competitive employment (14%) and higher education (3%) for individuals with a disability category of MR is 17% compared to the statewide engagement rate of 60% (competitive employment = 34% and enrolled in higher education = 26%). Based on this information, in collaboration with our local and State community of practice/community transition teams, ADE/ESS will continue to work on developing strategies and resources to assist local PEAs to improve overall engagement for individuals with a disability category of intellectual disability.

Outcomes for individuals with a disability category of emotional disturbance (ED) were also less positive than the overall statewide average. With the exception of individuals with a disability category of MR, those with a disability category of ED were more likely to be not engaged (34%) than their peers with a specific learning disability (SLD) (20%) or individuals with all other categories of disability (30%). They were less likely to be enrolled in higher education (18%) or be competitively employed (29%) compared to their peers with a SLD (enrolled in higher education = 28% and competitively employed = 42%) or with individuals in all other disability categories who enrolled in higher education (33%).

**Figure 14.3, Indicator 14: Arizona's Post School Outcomes Respondents by Type of Disability**

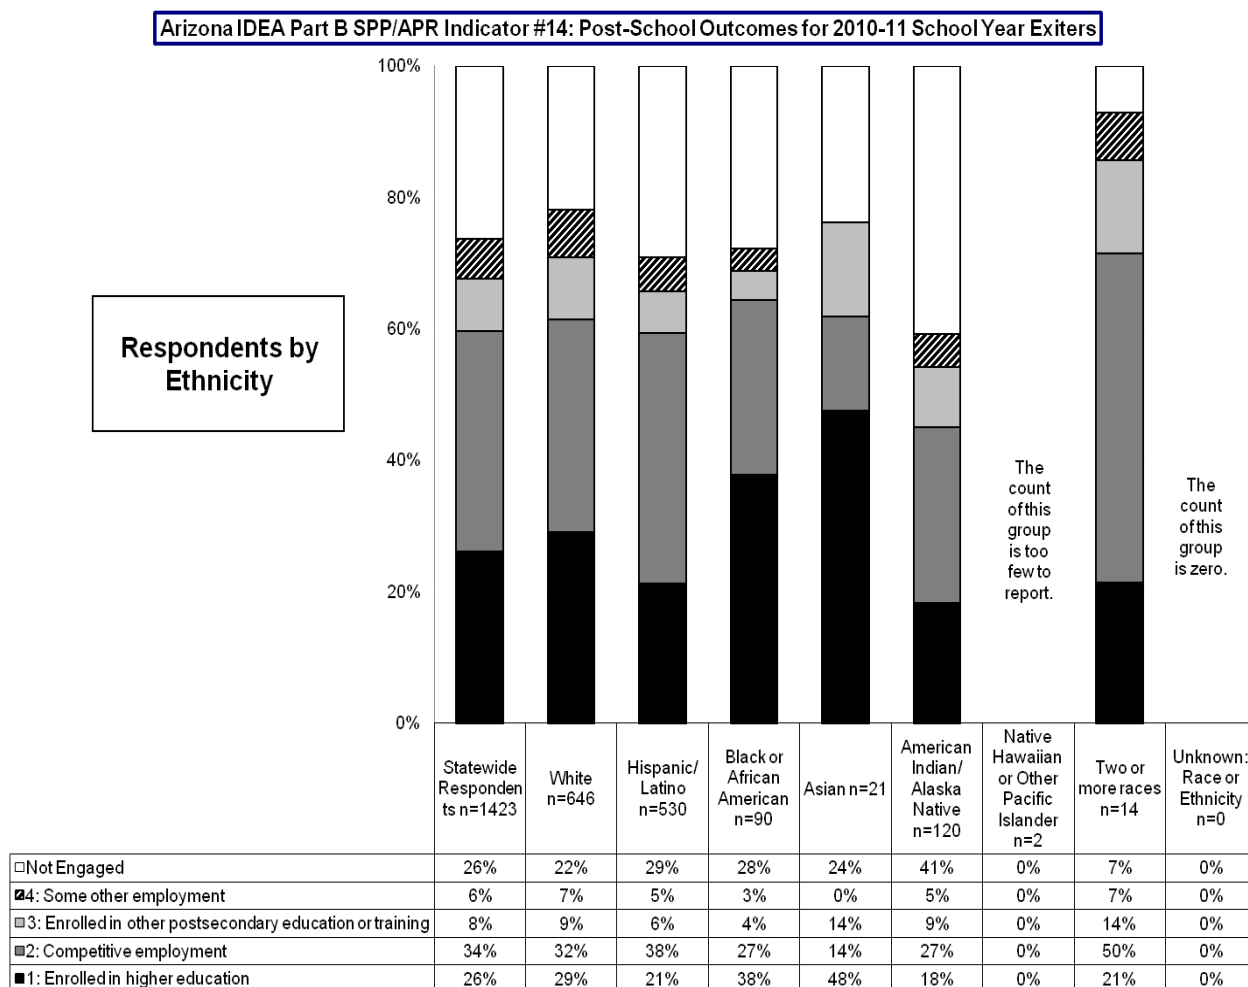

## Part B Arizona State Performance Plan (SPP) for 2005-2012

### Post School Outcomes by Ethnicity

As displayed in Figure 14.4, Indicator 14: Arizona's Post School Outcomes by Ethnicity, Arizona youth enrolled in higher education at a rate ranging from 48% for Asians to 18% for American Indian/Alaska Natives. Black or African Americans (38%) and Whites (29%) had enrollment rates higher than the average statewide rate of 26%, while Hispanic/Latinos had a rate of 21%, which is lower than the statewide rate. The ethnic group with the largest percentage of youth who were competitively employed was Hispanic/Latino (38%), as compared with peers who are White (32%), and Black/African American and American Indian/Alaska Native, both at 27%. The percentage of youth enrolled in other postsecondary education or some other employment was consistent across all groups, with Arizona reporting an engagement rate of less than 15% for all ethnic groups. Engaging youth who are identified as American Indian/Alaska Native continues to be a concern for ADE/ESS since those individuals experience the least successful outcomes compared to their peers in terms of engagement in higher education and competitive employment.

**Figure 14.4, Indicator 14: Arizona's Post School Outcomes by Ethnicity**

## Part B Arizona State Performance Plan (SPP) for 2005-2012

### Post School Outcomes by Type of Exit

Figure 14.5, Indicator 14: Arizona's Post School Outcomes by Type of Exit, discloses that individuals who earned a high school diploma had better outcomes, especially in the areas of higher education and competitive employment. Only 1% of dropouts enrolled in higher education compared to 29% of graduates; similarly, 27% of dropouts were engaged in competitive employment as compared to 34% of graduates. Dropouts had a lower rate of engagement (45%) compared to graduates (77%).

**Figure 14.5, Indicator 14: Arizona's Post School Outcomes by Type of Exit**

### Characteristics of Nonresponders

A review of the 609 leavers who did not respond to the survey by demographic subgroup indicates that 66% were male, 43% identified themselves as Hispanic/Latino, 74% exited with a high school diploma, and 65% were individuals identified with the disability category of specific learning disability. The ADE/ESS will continue to share this information with PEAs and encourage schools to target these subgroups for greater participation in the PSO survey.

### Trend Data

Since ADE/ESS is resetting the baseline using corrected data for FFY 2011, trend data will not be available until FFY 2012.

Part B Arizona State Performance Plan (SPP) for 2005-2012

Dissemination of FFY 2011 Data

To ensure broad dissemination of Indicator 14 results, ESS will post results on the ADE/ESS Post School Outcomes Web site at <http://www.azed.gov/special-education/special-projects/secondary-transition/post-school-outcomes-survey> by May 2013. The PEAs that participated in the 2012 PSO Survey will be invited to attend a 2012 PSO Results webinar, which will include State results and information on how to access and use local PSO results.

1) Develop, implement, and evaluate procedures and trainings needed to assure participation in Post School Outcomes (PSO) Survey by identified PEAs	a) Revise PSO application and survey questions to align with new Indicator 14 Table, requirements, and definitions	Activity completed 7/1/11 to 6/30/12.  Enhancements to the online PSO Survey application were completed and the training site was updated in June 2012. Enhancements included a data collection tracker (PSO response rate) by school and increased verification procedures to use before categorizing survey as "unable to contact."	7/1/10–6/30/13	ADE/ESS Transition Specialists  ADE/IT Specialists
	b) Provide training to PEAs on Indicator 14 changes and the ADE/ESS PSO Survey Application	Activity completed 7/1/11 to 6/30/12.  PEAs in the FFY 2011 PSO Survey participation cohort were identified and targeted for training.  Two trainings on Indicator 14 and the enhanced online PSO Survey application were provided at the annual ADE/ESS Directors Institute in August 2011. An additional two trainings on Indicator 14 and the enhanced online PSO Survey application were provided at Arizona's Eleventh Annual Transition Conference in October 2011. 4) Work with the National Post-School Outcomes (NPSO) Technical Assistance Center as an "intensive state"	a) Implement technical assistance received from NPSO	Activity completed 7/1/11 to 6/30/12.  ADE/ESS has taken steps to implement technical assistance received from NPSO as evidenced by enhancements made to the online PSO Survey application, updated trainings provided at conferences and via webinars to local PEAs, and incorporation of NPSO data collection and analysis tools.	5/1/11–6/30/13	ADE/ESS Transition Specialists  NPSO Technical Assistance Center
5) Revise Arizona's online PSO data collection system to include missing data and enable future trend analysis	a) Revise PSO online data collection system to include reason for PEA failure to collect survey information	Activity completed 7/1/11 to 6/30/12.  A review of the enhancements made to the PSO online data collection system showed that no additional changes were required related to PEA failure to collect	7/1/10–6/30/13	ADE/ESS Transition Specialists  ADE/IT Specialists

		survey information at this time. This activity is discontinued.		
	b) Revise PSO online data collection system to allow for the exploration of additional data related to non-engaged youth	Activities completed 7/1/11 to 6/30/12.  In FFY 2011, a plan for enhancing the online PSO Survey application to include data regarding nonengaged youth was researched and discussed. Further planning and implementation of this enhancement will begin in FFY 2012.	7/1/10–6/30/13	ADE/ESS Transition Specialists  ADE/IT Specialists
6) Increase the number of youth who respond to the post school outcomes survey from 61% (FFY 2010) to 67.5%	a) Design and implement a marketing plan to target increased participation by male and ethnic minority youth and young adults	Activities completed 1/1/12 to 6/30/12.  This activity was completed and the goal was exceeded, as the response rate for FFY 2011 was 70%, an increase of 2.5 percentage points above the target of 67.5%.	1/1/12–6/30/12	ADE/ESS Transition Specialists  Parent Information Network Specialists
	b) Enhance the online PSO Survey application to filter and group data by size of PEA and county	This activity will be completed during FFY 2012.	11/1/11–6/30/12	ADE/ESS Transition Specialists  ADE/IT Specialists
	c) Use the NPSO response calculator to track responses during the data collection to monitor response rates	Activity completed 7/1/11 to 6/30/12.  The Arizona PSO Online application was enhanced to enable it to track response rates.	7/1/12–9/30/12	ADE/ESS Transition Specialists
7) Increase the rate of engagement for students with a disability category of mental retardation from 47% (FFY 2011 baseline) to 48%	a) Offer 3 regional trainings a year specifically designed to increase awareness of available options for postsecondary education, training, and employment for students with intellectual disabilities	Activities completed 1/1/12 to 6/30/12.  This improvement goal is revised to reflect the new FFY 2011 baseline data.  Three regional trainings co-facilitated by ADE/ESS and the Division of Developmental Disabilities (DDD) were held highlighting local options for postsecondary engagement	1/1/12–6/30/13	ADE/ESS Transition Specialists  AZ Community of Practice on Transition (AZCoPT)

## Part B Arizona State Performance Plan (SPP) for 2005-2012

### Monitoring Priority: Effective General Supervision Part B / General Supervision

#### Indicator 15: Effective General Supervision

General supervision system (including monitoring, complaints, hearings, etc.) identifies and corrects noncompliance as soon as possible, but in no case later than one year from identification.

(20 U.S.C. 1416 (a)(3)(B))

#### Measurement

Percent of noncompliance corrected within one year of identification:

- a. # of findings of noncompliance.
- b. # of corrections completed as soon as possible but in no case later than one year from identification.

Percent = (b divided by a) times 100.

#### Overview of Issue / Description of System or Process

##### Compliance Monitoring

Exceptional Student Services (ESS) conducts compliance monitoring for IDEA procedural requirements on a six-year cycle. The activities conducted in each of the six years of the cycle for FFY 2009 were as follows:

- Ongoing technical assistance; PEA data review, including student files; Review of policies and procedures; Student Exit Form Data
- Ongoing technical assistance; PEA data review, including student files; Collection of post-school outcomes; Parent Survey data
- Ongoing technical assistance; PEA data review, including student files; Preparation for monitoring
- Ongoing technical assistance; Conduct monitoring activities
- Ongoing technical assistance; PEA data review, including student files; Corrective Action Plan close-out
- Ongoing technical assistance; PEA data review, including student files

The number of PEAs monitored each year of the six-year cycle ranges from 100 to 120 with a regional balance from year to year. Each year of the cycle also has a mix of elementary, unified districts, and high school districts, charter schools, and other agencies (such as secure care or accommodation schools). Except in those PEAs with less than 10 students with disabilities, a stratified sampling methodology is used to select the files to be reviewed for compliance. The sample always represents the range of grade levels, disabilities, service delivery types, and sites served by the PEA. If appropriate, the sample also includes students who have exited special education, been suspended or expelled, or placed in an out-of-PEA placement by the IEP team. Line items in the monitoring system align with the OSEP Related Requirements document.

## Part B Arizona State Performance Plan (SPP) for 2005-2012

The compliance monitoring system is standards-based with all forms, guide steps, enforcement, and reward options provided to PEAs at the beginning of each school year. The monitoring documents also are posted on the ADE/ESS Web site. Data collection may include file reviews and interviews.

There are three monitoring options for PEAs. The specific type of monitoring for each PEA is determined by ESS in consultation with the PEA by using information of PEA performance on OSEP compliance and results indicators, Dispute Resolution findings, and technical assistance provided by education program specialists related to annual student file reviews. The monitoring options are:

- Data Review: PEAs that meet all state targets for students with disabilities on results and compliance indicators identified by the U.S. Department of Education, have no dispute resolution findings, student file reviews indicate compliant practices.
- Self Assessment: PEAs with compliance issues in one or more of the areas listed above but no evidence of systemic concerns.
- On-site: PEAs that have systemic issues in any of the areas listed above.

Any PEA with systemic noncompliance can be moved into year 4 of the monitoring cycle for an on-site monitoring.

In FFY 2009 Arizona's monitoring system was revised to address compliance requirements categorized in the areas of Child Find, Evaluation, IEP, and Procedural Safeguards. The items in these categories are aligned with the OSEP Related Requirements document.

### Dispute Resolution System

In addition to monitoring, noncompliance with IDEA is identified through formal complaints and due process hearings.

ADE/Dispute Resolution employs four State complaint investigators who work under the supervision of the Director of Dispute Resolution. The director assigns incoming complaints, monitors the investigation progress, and reviews and signs all letters of finding. Upon a finding of noncompliance identified by a complaint investigator, corrective action is ordered in a letter of findings that either requires the immediate provision of services or the immediate cessation of noncompliance, whichever is necessary. The letter also outlines the necessary steps required to prevent the reoccurrence of noncompliance and states what is considered sufficient documentation to ensure that noncompliance has been addressed and to minimize the effects of the violations. ADE/Dispute Resolution employs a Corrective Action Compliance Monitor (CACM) to collect the required documentation, monitor timelines, and provide technical assistance, as necessary.

When both parties to a State administrative complaint agree that a mutually beneficial resolution can be reached without the need for a full investigation, the assigned complaint investigator may assist the parties in reaching an informal resolution. Although no formal resolution agreement is required, if the complaining party indicates that s/he is satisfied with the PEA's response to the complaint, the complaint investigator will issue a withdrawal letter. If the complaining party changes his/her mind about informal resolution and wants the investigation to go forward, the individual may notify the Dispute Resolution office within five business days and the investigation will move forward.

Beginning in August 2005, Arizona switched from a two-tiered due process system to a single-tier system. Due process hearings are conducted on behalf of the Arizona Department of Education by the Arizona Office of Administrative Hearings (OAH). The OAH employs full-time administrative law judges (ALJ), all of whom are attorneys licensed to practice law in Arizona. The ALJs assigned to

## Part B Arizona State Performance Plan (SPP) for 2005-2012

hear special education due process hearings are knowledgeable about the IDEA and receive yearly training.

Arizona has a system that allows for mediation of any dispute between parents and PEAs—it is not necessary for either to file a request for a due process hearing to utilize mediation services. Mediators are available statewide and have been trained on both mediation strategies and IDEA requirements.

### Incentives, Sanctions, and Enforcement

#### Incentives

During FFY 2011 the State offered the following incentives for PEAs that exhibited exemplary compliance with IDEA requirements upon completion of their monitoring.

1. ADE/ESS- two paid registrations for ESS Directors Institute or Transition Conference for PEAs that demonstrate 100% compliance on Indicators 11 and 13 in a data review monitoring.
2. ADE/ESS- one paid registration for ESS Directors Institute or Transition Conference for PEAs that have no findings at the completion of the self assessment monitoring.

#### Sanctions and Enforcement Related to Monitoring

Arizona uses a variety of methods to ensure that all public education agencies meet the requirements of State and federal statutes and regulations related to special education. The following is a listing of the State's enforcement steps that may be imposed based upon the severity of the remaining noncompliance:

- ESS development of a prescribed corrective action plan (CAP) with required activities and timelines to address the continuing noncompliance.
- Enforcement of CAP activities as outlined in the current CAP.
- Review and revision of the current CAP to develop targeted activities that address the continuing noncompliance.
- Assignment of a special monitor.
- Interruption of IDEA payments until adequate compliance is achieved. For charter schools not receiving IDEA funds, a request to begin withholding 10% of State funds.
- For charter schools, a request to the appropriate board for a notice of intent to revoke the charter.
- With Arizona State Board of Education approval, interruption of Group B weighted state aid or redirection of funds pursuant to 34 CFR § 300.227 (a).
- Request to the Arizona Attorney General for legal action.

#### Sanctions and Enforcement Related to Dispute Resolution

Upon a finding of noncompliance identified in a State administrative complaint, corrective action is ordered in a Letter of Findings, and documentation of the corrective action submitted will be reviewed by the Corrective Action Compliance Monitor (CACM). If the corrective action documentation received is incomplete, not completed as specified in the Letter of Findings, or if no documentation is received

## Part B Arizona State Performance Plan (SPP) for 2005-2012

from the PEA by the date specified in the Letter of Findings, then the following steps will be taken by the PEA and ADE/Dispute Resolution:

1. Within five business days following the due date specified in the Letter of Findings, the CACM will attempt to informally communicate with the PEA via phone calls and/or emails for the following purpose(s):
  - to inquire why the corrective action is incomplete and to direct the PEA to immediately submit the completed corrective action documentation;
  - to provide feedback on any concerns with the documentation submitted, to give clarification on the requirements, and to direct the PEA to revise and resubmit the corrective action documentation within a specified timeframe; or
  - to inquire why the corrective action has not been submitted and to direct the PEA to immediately submit the completed corrective action documentation.
  - If the delay in submitting the documentation is due to extenuating circumstances, and the CACM determines based on those circumstances that it is reasonable to negotiate a new due date for the corrective action to be submitted, the CACM will send a Letter of Understanding, with a copy to the complainant, detailing (a) the CACM's concerns and the PEA's explanation, (b) any decisions made to resolve the problem, and (c) a new negotiated due date.
2. If the concerns are not resolved using the informal procedures described above, the CACM will send a Letter of Inquiry to the PEA, with a copy provided to the complainant. A Letter of Inquiry may be sent for any of the following reasons:
  - The PEA is nonresponsive to the CACM's attempts at informal communication.
  - The CACM and the PEA are not able to resolve concerns with the content of corrective action documentation submitted or the PEA's failure to submit all required corrective action documentation through informal communication.
  - The CACM is not satisfied with the PEA's response to informal inquiries for reasons such as the PEA does not intend to complete and submit the corrective action, the PEA refuses to make needed changes to corrective action documentation, or the PEA's informal explanation of the circumstances causing the delay in submitting corrective action documentation is unacceptable to the CACM.
  - The PEA fails to submit new or revised corrective action documentation within the informally negotiated timeframe or by the new due date set forth in the Letter of Understanding.
  - In other cases determined necessary and appropriate by the CACM.
  - The PEA must provide a Letter of Explanation to ADE/Dispute Resolution within 3 business days of receipt of the Letter of Inquiry fully answering the inquiry and explaining the circumstances surrounding the non-submission of or failure to complete the corrective action documentation.
  - If the circumstances are acceptable, then the CACM will send a Letter of Understanding, with a copy to the complainant, detailing (a) the CACM's concerns and the PEA's explanation, (b) any decisions made to resolve the problem, and (c) a new negotiated due date. If the circumstances are unacceptable or the PEA does not respond to the Letter of Inquiry as noted above, then the CACM will compose a Letter of Enforcement.
3. If the corrective action documentation submitted was not completed as specified in the Letter of Findings and following informal communication between the CACM and the PEA the revised and resubmitted corrective action documentation is not satisfactory, the CACM will inform the PEA via Letter of Clarification, with a copy to the complainant, that the corrective action item in question must be revised. A new due date for the revised corrective action will be assigned in this letter and technical assistance will be offered.

## Part B Arizona State Performance Plan (SPP) for 2005-2012

4. If, after the steps outlined above have been taken, the corrective action documentation received remains incomplete, has not been received by ADE/Dispute Resolution, or the corrective action has not been completed as specified in the Letter of Findings, the CACM will send a Letter of Enforcement to the chief administrator of the PEA, with a copy to the special education director or coordinator and the complainant, detailing the corrective action items that are incomplete, the corrective action items that were not completed as specified in the Letter of Findings, or those items that have not been received.
  - The Letter of Enforcement will outline which of the following enforcement options will be taken:
  - Interruption of federal funds
  - Redirection of federal funds to ensure the child receives a free appropriate public education (FAPE)
  - If applicable, report violations to a sponsoring entity for charter schools and seek remedies through the appropriate board.

Once all corrective action documentation has been received, reviewed, and accepted by ADE/Dispute Resolution, a Letter of Completion will be sent to the chief administrator, the special education director or coordinator of the PEA, the ADE/ESS education program specialist assigned to assist the public education agency, and the complainant.

<b>TOTAL</b>	129	66.7% [N = 86 / 129]

\*These baseline data were recalculated from FFY 2004 as a result of a change in the measurement strategy required by the U.S. Department of Education, Office of Special Education Programs.

### Discussion of Baseline Data

#### Monitoring

The Office of Special Education Programs (OSEP) provided assistance to States in analyzing compliance monitoring findings relative to each of the federal indicators for the State Performance Plan in a document called the Part B Related Requirements and Investigative Questions Table. Arizona used this document to match line items from the State's compliance monitoring system with the appropriate federal requirement. In Table 14 below, the State reports the total number of individual data points and the total number of out-of-compliance findings from the FFY 2003 monitoring for the noted indicator(s).

Arizona tracks the date that each PEA closes out a corrective action plan: therefore, all items have the same "closeout" date within a specific year. Column D in Table 15.1 reflects the compliance status on the line items as of one year from the written notification of findings for all PEAs in the State. This equates to all of the PEAs that were in compliance during the original monitorings plus the

**Part B Arizona State Performance Plan (SPP) for 2005-2012**

53% of the noncompliant PEAs that were closed out within one year of the monitoring. Thus, the FFY 2004 rate of compliance on all of the PEAs under section A of this indicator was 80.5%.

Dispute Resolution

There was one agency that did not correct its noncompliance within one year of identification. The particular agency was found noncompliant system-wide and was issued significant corrective action.

Due to the necessity for system-wide changes, the agency was given an extended period of time to complete the corrective action.

(20 U.S.C. 1416 (a)(3(B))

**Measurement:**

Percent = 3.1(a) divided by (3.1) times 100.

**Overview of Issue / Description of System or Process**

ADE/Dispute Resolution has provided numerous training sessions to inform PEAs of their responsibility to convene a resolution session within 15 days of receiving a due process hearing request, unless the parties have agreed in writing to waive the resolution session, or unless the parties have agreed to participate in mediation. The presentation used at the various trainings is posted on the ADE/ESS Web site.

When a due process hearing is requested, the ADE/Dispute Resolution notifies the parties of the hearing dates and the contact information of the assigned ALJ by issuing a Notice of Hearing. The Notice of Hearing also includes information about the due process hearing system. Included with the Notice of Hearing is an information sheet about resolution session requirements and a Resolution Session Tracking Form that PEAs are required to submit during the resolution period in order to keep the ALJ and the ADE/Dispute Resolution informed about the timeliness and outcome of the resolution session or mediation.

**Baseline Data for FFY 2004 (2004–2005)**

57.9% [N = 11 / 19] of the hearing requests that went to resolution sessions were resolved through resolution session settlement agreements.

**Discussion of Baseline Data**

There were only 19 resolution sessions held in Arizona during FFY 2005. An informal inquiry into why this is the case revealed that parents who are represented by an attorney are generally advised to request mediation instead of agreeing to a resolution session. The justification for this is that parents and schools have been unsuccessful in the past in resolving the issues on their own and that a third party mediator is necessary in order to make any progress.

**Measurement:**

Percent = (2.1(a)(i) + 2.1(b)(i)) divided by (2.1) times 100.

**Overview of Issue / Description of System or Process**

Arizona has a system that allows for mediation of special education related disputes between parents and PEAs—it is not necessary for either to file a request for a due process hearing to utilize mediation services. Mediators are available statewide and have been trained on both mediation strategies and IDEA requirements.

**Baseline Data for FFY 2004 (2004–2005)**

82% of mediation requests resulted in a mediation agreement.

**Discussion of Baseline Data**

It is difficult to explain why only 82% of mediations resulted in a mediation agreement since mediations are conducted by contracted mediators and are confidential. Presumably, some parties are unable to come to resolution and must utilize the due process system to resolve their disputes.

### Monitoring Priority: Effective General Supervision Part B / General Supervision

#### Indicator 20: State Reported Data

State reported data (618 and State Performance Plan and Annual Performance Report) are timely and accurate.

(20 U.S.C. 1416 (a)(3)(B))

#### Measurement

State reported data, including 618 data, State Performance Plan, and Annual Performance Reports, are:

- a. Submitted on or before due dates (first Wednesday in February for child count, including race and ethnicity; and educational environments; first Wednesday in November for exiting, discipline, personnel and dispute resolution; December 15 for assessment; May 1 for Maintenance of Effort & Coordinated Early Intervening Services; and February 1 for Annual Performance Reports).

Accurate, including covering the correct year and following the correct measurement.

#### Overview of Issue / Description of System or Process

Arizona collects State reported data, including 618 data and annual performance reports, through the following sources:

- Student Accountability Information System (SAIS), a Web-based system for the collection of all student data from the PEAs;
- Arizona's Instrument to Measure Standards (AIMS) and Arizona's Instrument to Measure Standards Alternate (AIMS A), the statewide student assessment system used by the Arizona Department of Education for AYP and AZ LEARNS determinations;
- Arizona Safety Accountability for Education (AZ SAFE), a Web-based system for PEAs to submit data on the discipline elements;
- Annual Special Education Data Collection, a Web-based system for PEAs to submit data on the preschool transition, personnel, and exit elements;
- Teaching Strategies Gold, a web-based data collection system for PEAs to submit preschool outcome data;
- Arizona Parent Survey, a Web-based system for parents to submit survey responses;
- Arizona Monitoring System, a Web-based system to collect monitoring data; and
- Dispute Resolution spreadsheet to collect, maintain, and report all dispute resolution information.

Arizona has in place multiple validity and reliability checks and follows the principles of the Critical Elements document.

### Attachment 1: Sample Parent Involvement Survey

#### Arizona Parent Satisfaction Survey

Greetings!

The Arizona Department of Education, Exceptional Student Services (ADE/ESS) and local schools have a history of commitment to family involvement in the special education process. State and local activities focus on improving outcomes for students by promoting family and school partnerships. Parental feedback is regularly collected in a variety of ways to evaluate the success of education programs.

Our State Performance Plan includes a goal to measure how well your district/school has involved you to improve special education services and results for your child. Your input on the Web-based Parent Survey will help to enhance the relationship you have with your district/school.

This *confidential* survey was developed by the National Center for Special Education Accountability Monitoring (NCSEAM). The results will be tabulated annually for public distribution. Your district/school and family will benefit from knowing how well the needs of special education students and their parents are being met.

Listed below are instructions for the confidential survey. Please take a few minutes to answer questions about how your school has facilitated your involvement as a means to improve special education services and results for your child.

#### INSTRUCTIONS

- We prefer you complete the survey online at [www.ade.az.gov/parentsurvey](http://www.ade.az.gov/parentsurvey). It's easy! If that's not possible, complete this form.
- **ALL** of the statements in Section A and 25 questions in Section B must be answered.
- **Enter the confidential survey User ID and Password given to you by your child's school.**
- Check one box - ☒ - for each of the following statements and questions.
- **MAIL** the completed survey in the envelope provided by the school. Your survey will be sent to your district or school administrative office for data entry. Do not write your name or address on the survey or the envelope. Your survey is confidential.
