

Entry ID	4. What should be done to ensure the success of students and/or schools? -- OTHER
39	Lower class sizes & increase funding with out all the strings.
57	Real world application of learning skills
65	High quality, well-trained educators
77	CTE courses!
82	More value placed on highly qualified teachers
86	All of the above, they are equally important
	Decrease class sizes. As teachers we need to differentiate for all of our students and this is very
101	difficult to do with large classes.
102	decrease class size
104	Increase school funding, provide quality professional development, and treat teachers with respect
112	Parent involvement
	Departmentalize subjects, pull out special Ed students to achieve success for them without brining
	down the rest of the class.msome of these students need life skills and not teachings on the
	ancient civilizations. Pull high students for enrichment and allow teachers to teach without testing
123	on a weekly basis.
131	Increase teacher pay and tech in ALL classrooms
138	Incentivize good teachers
	Being competitive with other states in the hiring and retention of highly qualified and successful
148	educators.
153	Increase school funding, expand school choice, and incorporate technology in classrooms
154	Increase school programs/curriculum choices
163	hire, train, and retain quality teachers
165	Parent involvement/accountability
	The above are band aids and have been proven to not be successful. We must invest in effective
169	educators and terminate those that are not effective.
	None of the above will effectively ensure the success of students and/or schools. Cell phones in
	the classroom will still be a problem. Lack of parental support and accountability will still be a
	problem. Lack of effective consequences for choosing to fail will still be a problem. Until these
172	issues are met head on, I am confident that we will not see very much improvement.
174	All three
183	If the student fails the parents pay back for the education.
	Greating increase teacher pay to attract a higher level of teachers. Give teachers an objective
192	competency test at periodic intervals.
193	put education in the hands of educators
	As a major part of school funding, having teacher pay commensurate with professional equivalents
197	in order to attract and maintain qualified and capable educators (and administrators).
199	More safety nets and mores (i.e. increasing the dropout age to 18).
200	increase teacher pay
206	high curriculum expectations
210	Let teachers teach

221 Develop a list (not long) of core expectations
235 Pay teachers
240 Ensure students attend school daily
247 continuing education and professional development for teachers
248 other
Create more unified districts and reduce the number of charter schools. Schools are cannibalizing each other and spending too much money on advertising and recruitment of students. Also, offer
261 more teacher mentoring and professional development opportunities.
262 Focus on teacher training and advance profession. More NBCTs in classroom.
264 smaller class sizes in all grade levels
265 Schools have plenty of money to be successful. Lots of it is wasted on unnecessary curr.
283 Increase school funding at the classroom level (classroom teachers).
290 Get parent buy in on the importance of working hard on academics.
293 smaller class sizes
305 Programs that supports students and helps them.
309 STOP social promotion
316 Teacher quality and parent involvement
317 Teacher quality and parent involvement
326 Parent involvement
328 Reduce Class Sizes
329 More teachers, smaller class sizes, more technology.
336 Enable students AND schools to be more successful by instituting a track-system
342 teacher's flexibility to meet the needs of the students in his/her class
344 Attract/retain high quality teachers
350 Smaller class sizes with increased choices of course study
Fully trained and certified teachers, solid curriculum based on standards that address learning and
355 success for all students.
Increase school funding so that schools can attract the most highly qualified math, science and
technology teachers. Arizona is losing math and science teachers in droves because we an not
360 compete with the salaries they can comand in the private sector.
Increase school funding but apply it to electives that interest students. Example: German, French,
370 Chinese languages.
390 Funding and training
393 Help create a desire for learning, not force it..
394 FAMILY INVOLVEMENT!!!
403 Use a level system instead of a grade system
419 Pay for it, both in terms of teacher salary and resources.
421 See following comment field
422 Offer mandatory tutoring and help for struggling students
430 See comment
431 Smaller class sizes
442 Find teachers that care about the future of their students and society

Equip classrooms with modern technologies to prepare for the modern world, and provide funding 443 and professional support and development to maximize the investment.
453 Emphasize deep thinking, analysis, and philosophical thought
459 None of these provide an option. They are all important.
461 Training for administration and principal in human relation skills and encouragement
462 Focus on intervention/ remediation
465 pay teachers more, attract and keep the best
466 increased teacher salary and incentives
467 small class size
470 Individual school goals
478 State Issues
502 Training and retaining quality educators
508 Combination of the first two choices
509 Local control
514 Smaller classes and increased teacher autonomy in the classroom
515 Increase student motivation
519 All of the above plus smaller classes.
525 All of the above.
531 Emphasize meaningful relationships with teachers
535 See below.
539 decrease school choice
540 more remediation classes allowed/funded
542 Ensure students feel valued
548 Less schooling, more parenting by parents
551 Individual treatment and educational resources for all students
559 Attach standardized testing to graduation
561 All are important
These as well as supporting the teachers in the classrooms, academically, creatively, financially, and 563 socially.
have levels of ability instead of grade level be the reason students move on and up so that students do not get left behind and allowed to continue without growth in subjects of math, writing and 569 reading
570 Move power to local government
574 See comment below.
Increase funding, implement proven best practices, and create an environment where innovation 580 can abound.
Hold students accountable for the academic performance and do not allow them to advance until 583 they have sufficiently mastered the skills being taught.
588 Pay teachers more competitive wages
596 Increase funding for support programs
602 See below.
Make sure every teacher is doing the best job possible, both academically and within the classroom 603 environment.
610 Better educators, and more trust in them.
Increase school funding & increase teacher salaries. We will continue to lose skilled teachers until 613 they are paid better.

614	Devise a plan to make students and parents accountable for poor behavior, including Title I schools
616	Accountability across the whole spectrum of public education
620	Fewer tests and more emphasis on individual students.
647	More time for students to learn and master a topic.
660	Highly-qualified teachers, smaller class sizes.
674	Funding specifically for a smaller student to teacher ratio and fewer hours in the classroom.
676	Goal oriented
689	Site based management
711	Money is NOT the whole answer. Technology is NOT the whole answer but is a combination between the two in addition to providing the teachers with necessary tools they request based upon research proven methods that are given time, not used and thrown away after one year.
721	Make sure that teachers, students, and parents are all held accountable for the education of our children.
726	Increase the level of respect for the profession of teaching and increase pay
728	Make sure that vocational classes are added back into the curriculum.
734	resources
744	Have the support to truly hold students accountable.
745	Have the support to truly hold students accountable.
752	Increase teacher pay to entice teachers to stay
758	student and parent accountability
760	Emphasize technology in the classroom and increase school funding.
763	Increase school funding and access for our students
770	It's not as simple as choosing one of the above. This is complex and will vary from school to school depending on demographics, age of school buildings, size etc.
773	Decrease class sizes and provide more planning time for teachers to properly assess and remediate for their students.
774	A combination of things
780	increase teacher pay
790	All public and charter school funded equally!!!!!!!!!!!!
797	Better management.
800	Adequate funding to implement programs to meet the needs and talents of all students with a strong emphasis on skills for this work environment.
804	Increase school funding and increase teachers' salaries and training. If you invest in your teachers, they become your best advocates and teaching instruments.
813	re-institute tracking and preparation for broader, post-secondary choices
816	Please stop funding unqualified charter schools.
828	all of the above
830	Establish and enforce rigorous curriculum and world-class teaching pedagogy
835	Teacher support
837	Increase education support
857	Parent/family involvement
860	How do we get these students to own their education? They have to want to learn, how do we keep them engaged?
866	Motivated teachers and Increased school funding

875 Access to quick data taking
883 Combining technology w/a rigorous curriculum
890 Increase school funding so more educational/career choices can be offered.
all of the above including specialized learning centers, keeping the excellent teachers in the
891 classroom and limiting the plethora of administrators.
895 Other, see explanation.
899 Increase school funding and teacher/admin pay
Increase school funding and let the district decide how to ensure their students success. Make it
905 mandatory that schools have at least one school counselor preferably 1 to 250 students.
923 Technology and resourceful application of demonstrating knowledge/learning
926 Funding is necessary to improve technology access and lower class size
Hold students and their parents accountable for coming to school and completing assignments as
928 required as well as attending any necessary tutoring or assistance offered to guarantee success.
930 Funding would make the other 2 possible.
932 Increase teacher pay and lower class size.
934 Develop a meaningful state assessment that actually holds students accountable.
935 Teacher support
Technology requires funding. Expanded school choice is only a viable concept when they are held
to the same standards of success as the public schools, including barring religious indoctrination
936 under federal funding. Religious schools should never be supported by tax dollars in this country.
937 All of the above.
938 Increase school funding, specifically, teacher/paraprofessional salaries.
Treat schools in every way like they are the most important communities in our world, as all
950 industry and citizenship comes from schools.
964 Give teachers time to actually teach instead of just test.
969 Both funding needs to be increased and school choices are important, too.
973 See below
978 smaller teacher-student ratio
983 Support your teachers in trust, monetary compensation, and education.
Increase funding to the classroom to be use by the teacher as they see fit. Little of such already
999 "earmarked" funding, finds its way to the teachers and therefore to the students. .
Provide ongoing relevant supports i.e. professional learning communities to increase teacher
1012 capacity for improved instruction and learning.
1015 Lower class size to no more than 24 kids.
1027 All of the above
1055 encourage continued educator training which is accessible (lots of locations and low or no costs)
1072 Play
1083 this should be based on the needs of the students
school choice only waters down everything. MAKE what we have work with better funding and
1091 accountability for charters
1118 Increase school funding, require technology in the classroom, smaller class sizes, require preschool

1179	PARENTS must stop helicoptering in to "save" their children. When parents do their jobs, we can do ours.
1190	Student/parent accountability
1198	small class sizes
1201	Every effort in school should be there for individual student success. Some times we forget the purpose of education. Not politics, not being the best in everything. Do the best we can for our students in Arizona!
1220	Treat teachers as professionals!
1235	Inspire parents to encourage their children to study.
1245	training and using Common Core
1249	Support teachers! They work so hard!
1250	Focus on quality instruction
1251	All the above
1263	Stop emphasizing "core" subjects and offer diverse course selections.
1266	Support public schools that offer new kinds of curricula and reflect the diversity and innovation of our culture
1268	Increase training to schools and teachers about special education and inclusion. Decrease class size and teacher workloads.
1273	Increase funding and school choice
1274	hold students accountable for their learning
1275	All of the above...
1283	See previous answer
1290	Emphasize STUDENTS in the classroom.
1306	Smaller classroom size
1308	A,B, and other
1311	with school funding we would be able to have more technology
1320	All of the above
1324	Funding to the classroom- salary & supplies
1329	monitoring
1332	all three - and more
1341	Smaller class sizes.
1344	continue to reach out to parents to help them support students
1345	Adequate pay for teachers. Pay is still a disgrace. That is why teachers are leaving in droves.
1357	See below
1359	More options doesn't ensure quality. Better to focus on a few diverse options and strengthen those.
1362	Give teachers the resources and help so they can spend their time teaching.
1365	Ensure teacher driven metrics are followed.
1367	Ensure that teachers are given the necessary materials to educate students
1382	Increase school funding for equitable access to resources including technology.
1385	Stop emphasizing standardised tests and allow children to explore and learn through real life experiences that challenge them.
1391	PARENTAL PARTICIPATION AND ACCOUNTABILITY!!!!!! LEGISLATIVE ACCOUNTABILITY!!!!!!!!! For goodness sake, don't make decisions about education unless you have been an educator.
1394	involvement by parents and community members

1402	Emphasize technology in the classroom by providing students with accessibility to laptops at anytime which can be possible with increased school funding.
1416	character education
1422	combination
1429	Increased school funding and ensure it goes to classrooms, teachers, and students.
1436	Teach reading comprehension, critical thinking and problem solving strategies from K to 12
1439	Allow educators to set standards and minimize standardized testing.
1444	Increasing funding is the only thing what would work.
1450	Hire well trained and effective teachers and respect them.
1455	Reduce class sizes
1460	Offer JTED courses and programs such as Project Lead The Way (PLTW)
1462	Increase school funding for smaller classes and additional staffing - teacher aides, support staff (social workers, school psychs, school counselors)
1466	Invest in quality
1482	Smaller classes
1488	Provide the resources (technology, reading specialist) to help those students that need the extra assistance.
1489	See below
1490	Career exploration and soft skills in the classroom
1498	Increase Public School Funding - not to include charters
1499	Allow teachers - the ones trained in education - make decisions on pacing and instructional delivery.
1504	student attendance
1506	See below
1514	Emphsize high-performance in all the basic skills
1517	See below
1520	Take better care of good teachers with benefits and pay!
1539	all of the above
1553	Increase school funding with an mandate that it go to teacher salary, teacher education, and students only.
1555	All of the above. I'm sorry, but I don't consider these exclusive to the dismissal of the others.
1556	Smaller class sizes
1560	Eliminate punitive standardized testing sanctions and stringent teacher evaluation practices
1561	STEM, school choice, equity, funding to get qualified teachers
1576	Standard Operating Procedures that are agreed upon (100% buy-in from all constituents), equitable, measurable and transferable. In short, a culture shift from tolerance to excellence.
1581	SMALLER CLASS SIZES!!!!!!!
1593	Allow teachers to teach to the needs of individual students.
1599	All of these options are good choices.
1610	Improve student-teacher ratio to class sizes of no more than 15 students per educator. Ideally, aim for 5 to 10 students per educator.
1615	Increase school funding and hire/retain highly qualified staff
1622	de-emphasize technology in classrooms and apply traditional means and expectations

1629 Attract more teachers
1634 Increase teacher pay, hire inspiring teachers, increase STEM.
1638 Teach Basic and Fundamentals
1642 keep students in school
1649 Individualize each student's education through individual education plans
1650 Teachers need to be valued by the district and state for their experience and expertise.
Emphasize technology at the schools. We don't need a full set of computers in our classrooms all day... We do need every school to have at least two full computer labs with enough computers for every child. 1 lab should be run by a certified computer teacher. The other lab should have scheduled time for the classes to go and for students to research, type final drafts, make power
1651 points, prezis, websites, practice skills, etc...
1655 Make the primary function of schools teaching.
1663 Increase school funding at the building level.
1665 Help teachers teach
1668 Increase number of teaching staff
Funding means nothing if it is not earmarked and on it spent on what it was issued for. All schools
1672 should have the same technology available to students.
1676 emphasize mastery of skills
Highly qualified Teachers and Principals in every classroom and in every school with supportive
1683 parents who are engaged in their student's success.
1691 Collaboration - share the wealth!
1692 interventions in schools that allow students to succeed
1693 Make education an attractive career choice for the best and brightest
1696 Quality teachers and smaller classrooms.
1699 Have students learn both in and out of the classroom.
1704 quality feedback to students regarding progress
1705 Quality instruction in math and Physical science
1708 work to engage all students
1710 Definitely all three. Technology needs extra training.
1713 Find a way to increase community support
1723 More art/academic opportunities for students to succeed.
1724 Increase school funding and smaller classrooms.
1731 small class size
1733 Make sure they have the necessary resources to meet the needs of their student population
1736 skilled teachers
1739 smaller class sizes
Meet the needs of the students how and where they come in and provide teachers the resources
1767 to meet these needs.
Support public schools, and stop spreading my taxpayer dollars thinly across too many unproven
1768 charter schools.
1770 More time on learning and less on benchmarks and standardized tests
1779 Investment in educators.
1791 Teacher salaries based on highly qualified, professional development and education

1792	Make teaching an attractive job with decent monetary compensation to attract the best of people to enter the profession and provide them enough resources and support to stay in the profession.
1793	Pay teachers more to attract and keep quality teachers
1808	More meaningful and useful professional development
1818	Teachers should be paid more.
1825	Provide more individualized instruction.
1831	Equalize school funding
1832	Keep the common core standards.
1847	Proactive discipline
1853	Get the students to school on time. Get the students to class on time.
1856	less standards and keeping qualified teachers
1857	Supporting the teachers through pay, smaller classes and additional help in the classroom.
1858	none of the items impact success adequately. School funding is a start but, money is a band-aid. We need to ensure the money is done through training.
1859	Schools in AZ want to be successful. Federal and state regulations are holding them back. Give more control to the county and local officials and parents.
1869	Technology and increase funding for relevant uses
1872	In depth support to teachers
1880	Make fine arts a core subject
1883	Equal funding for ALL schools/demographics
1885	Make sure administrators are qualified as well as being good leaders
1887	promote and focus resources on public education
1888	we need cut the fat and unify our school districts
1889	Teacher Salary
1896	The definition of "success" is different for various individuals and groups
1897	Pay for excellent teachers
1899	Provide effective educator training and work to increase teacher retention rates
1907	This is a question to ask the local community. I believe in more local control.
1908	cut the crap that only ensnares district personnel, especially administrators, in paperwork, thus cutting into the time, energy, and resources for working directly with teachers, parents, and students
1915	Ensure that teachers have the content knowledge, know how to lesson plan, instruct and evaluate learning. Principals must be instructional leaders. Many are just managers.
1917	Smaller classes & great teachers
1936	Highly educated, trained, and (evaluated to be) effective teachers
1937	Parent should see schools are opportunities for their children not as free babysitting.
1953	Create a fostering and involved culture in each school
1965	lower class sizes, more support for teachers in the classroom, certified staff for "specials"
1977	Get rid of common core and let teachers teach the way they were trained and with common sense.
1989	Teach students how to learn.
2000	Pay teachers their real worth
2011	stop state testing

2013	Lower student to teacher ratios and caring teachers.
2015	Oversight that school funding is actually getting to the classroom and not being eaten up by administrative salaries and bonuses before it gets to the hiring of that necessary Instructional aid in the classroom for example.
2017	have a level playing field for all schools (public and choice)
2022	Emphasize current, research-based, successful education methods
2023	Empower teachers
2026	Stop putting children who cannot function (SPED) in the General Education classrooms.
2027	I don't think there is one answer for each situation. Possibly more funding if a single answer is needed but just adding more doesn't mean better use of it.
2029	Care for the students
2035	increase teacher pay to attract and retain quality teachers.
2036	Pay teachers a respectable wage.
2039	Pay teachers more to attract good teachers
2042	smaller class size and increase the number of aides
2050	SUPPORT PUBLIC SCHOOLS!!!!!! NOT charters!!!!
2055	Funding is a hard one to figure out. Technology is great, but when the teachers are unsure how to use everything it does not help. A lot of student success starts at home and we are seeing less of parent involvement in the elementary setting. A lot less respect.
2056	Parental support is the key to student success
2060	Class size should be capped at 20 kids with 1 aide.
2076	Teachers working in teams to analyze student work and develop plans to monitor adjust curriculum
2081	stop putting new "projects/initiatives" on teachers each year
2084	Increase school funding for public education. Put strict caps on charter school funding. Eliminate the tax credit for charter and private schools altogether.
2087	Really great teacher training and application, good school climate, opportunities to pursue personal interests
2099	Quality teachers/administrators/leaders
2102	Mandatory monthly/quarterly meeting with school advisor to discuss goals and provide feedback
2103	Less Testing and more hands on learning.
2106	identify at-risk children and enroll in classes of interest to them - keep them in school.
2110	Pay employees more
2137	Employ curriculum that have a proven track record.
2150	Invest in your teachers who are the ones directly responsible for student engagement and success.
2153	Accountability of parents sending students to school
2157	Eliminate half day option for seniors
2162	Increase the relevance of the school experience
2175	Adopt Competency Standards for each subject
2176	Parent and student are responsible for student success.
2186	increase funding and focus on the essentials
2187	Emphasize all students reading at grade level, particularly at grade 3.

2209 Adult/students relationships
2211 Again, all of the above
2214 Stop trying to force a one-size-fits-all on to every student and teacher. Also, public schools and charter school should be on equal footing.
2219 stop testing so much and spend more time ensuring students understand material and can relate it to everyday life.
2220 All three
2224 Pay teachers more
2225 Expand CTE education and insure Core Ed supports career placement upon graduation
2230 Model public schools increasingly on successful charter methods
2236 Accountability
2262 Parent, student accountability
2263 Increase funds and provide technology
2268 Provide teachers time to plan, review, and prepare. The small amount of given prep time is always being "eaten" up by mundane tasks, or it is taken away for some other program, or because staffing is limited, or etc. tasks
2270 Make arts education a focus to ebbing creative thinking
2272 Make arts education a focus to ebbing creative thinking
2273 Stop trying to fit everything into one set of guidelines and let teachers have the flexibility to teach.
2277 Accountability
2278 Accountability
2291 Hold teachers personally accountable - standardized test scores
2300 Increase school funding on the "RIGHT" things.
2312 Qualified teachers
2325 let teachers do their jobs as professionals
2326 increase school days to 200
2327 Access and opportunity not just access
2345 All of the above with individualization and individual tutoring .
2346 Encrease the number of tecnical and trade courses that are available.
2348 Let teachers teach and then test what they are teaching.
2360 Increase funding and resources for publicly run and overseen schools in the neighborhoods where the children live, so we can again build both lives and communities.
2364 Hire, train, and keep quality teachers.
2372 Offer more After school programs
2373 Schools and teachers need more freedom to individualize curriculum
2374 Wish I knew.
2376 do a better job preparing teachers and administrators. The one size fits all curriculum at the three AZ institutions must be revamped and changed.
2380 Individual schools have individual needs
2382 All three above
2386 smaller classes means more attention to each child
2401 again all of the above
2404 Offering more rigorous college bound courses and a variety of vocational/technical skill classes so students can explore both.

2411	Pay Teachers better and fire teachers who are not excited about teaching. My daughter's HS received a grant for laptops. They removed the lockers but still have to carry text books along with their heavy laptops AND not teachers are forced to use technology. My daughter's 10th grade history teacher never lectured in her class- the students just read and answered questions on their laptop. History can be such a rich course filled with discussion and controversy.
2416	lower class size - increase funding
2420	Science-based, peer-review analytical studies
2421	TRULY exceptional teachers.
2428	employ qualified teachers not just bodies to fill a class
2433	All schools hvs the same tools and d money per student
2442	Hiring qualified teachers
2444	Getting rid of common core.
2462	Ensure teachers have adequate preparation time every school day. Increase support staff in schools/Increase support staff pay to ensure quality of staff.
2476	Teachers need to be paid a professional rate, otherwise they will leave the profession.
2481	None of these choices supported the individuality of students regarding learning differences, pace, and disability.
2499	Reprioritize
2515	Increase public school funding and insist charter schools have the same standards as public school education. Apples to apples!
2517	Dedicated teachers are the key.
2523	The best way to ensure the success of all students is to focus on improving public district schools by proper funding
2526	Increase pay salaries to keep staff rather than constant retraining of staff
2529	It will take multiple approaches including funding, curriculum options, and allowing excellent administrators and teachers to have more flexibility and creativity to produce. They also need to be held accountable.
2530	Number one: parents need to have their children ready to attend school and follow the teacher's directive.
2531	Increase funding to hire top teachers and expand vocational programs.
2538	Funding, yes, but other things are as important? Smaller class sizes, excellent teacher preparation, decent pay for teachers, create environments for respect, success in learning, varied curriculum and opportunities for students.
2548	Increase teacher salaries not administrative funding in order to draw the most competent interesting and gifted educators.
2556	All of the above, but also choosing the right person for the right positions has a huge effect of how schools are run and how they use their funding. Then expanding school choice could be considered.
2563	Paying teachers more and making separate programs for alternative teaching styles
2564	Ensure quality teachers are attracted to teaching in AZ
2570	Increase technology in classrooms and increase school funding.
2584	Smaller class size
2595	Better training and pay for Instructional Assistants, smaller classes, and SOCIAL skills every day.

2606	provide a rigorous curriculum with opportunities for additional support for students who need special education and/or more challenging content
2607	All of the above
2624	All of the above with an emphasis on the use of technology. Our students are graduating completely unprepared for the world of technology in the work force.
2625	Individualized instruction
2627	Continue to engage and possibly educate the parents
2630	smaller class sizes
2632	Put money where it should be going not to administration.
2633	expand school curriculum and learning methods
2649	PUBLIC school should receive ALL tax money. without public schools our democracy is in danger
2655	Teacher motivation and professional development
2665	Increase school funding across the board. Pay teachers a living wage. Make it rewarding to teach in AZ.
2669	stronger, more ethical leadership
2671	Work on expanding and improving the Empowerment Scholarship Program
2680	There is no one size fits all answer
2693	Increase staffing, keep good teachers with higher pay and other incentives.
2700	Manage our funding more effectively - reassess teacher performance evaluation systems
2701	Increase physical activity and make sure kids are getting proper nutrition and sleep.
2716	MORE EMPHASIS ON THE PARENTS DOING THEIR JOB AS PARENTS
2721	Both increasing funding and allowing the schools choice
2722	Pay teachers more, hire high quality full time teachers
2734	Please don't increase school funding but let's use the money more wisely. We don't need \$400 uniforms for the football team or fireworks, we need musical instruments and computers
2736	Give a damn about our kids, their futures and the future of our nation in a highly competitive global humanity.
2738	Value teachers as professionals
2751	Give teachers more autonomy
2764	Pay teachers enough to attract and keep highly qualified professionals.
2771	1:1 technology
2778	Smaller class sizes and highly qualified teachers
2799	increase school funding and distribute funding equally to all schools.
2823	smaller class sizes
2841	Decrease school funding. Survival of the fittest.
2846	help teachers with better salaries and more respect
2866	Continue developing alternatives to the 30 foot by 30 foot classroom.
2908	Rewarding excellent educators
2941	all should be addressed
2952	All of the above
2999	Smaller class sizes
3011	ensure that the needed resources are available.
3018	MORE money is always good, but it also needs to be spent wisely.
3021	School funding, JTED, and diverse course offerings to meet the needs of all students

Both expand school funding and give students a choice which encapsulates their interest not force credit taking down their throats and test them to death to stroke a districts ego. Let the braniacs do their thing let the working class learn theirs...America is made up of workers not the people at the top
3024
3041 Have courses in which students can enroll in. Give them more opportunities.
3043 Higher expectations in classrooms, more rigorous curriculum
3047 Rigorous Core!
3049 options/tailoring
3059 Increase teacher salary based on performance
3064 Pay teachers more
3069 # 1 and #2
3097 education as an option
Stop standardized testing and let the teachers provide appropriate education with follow-up
3102 testing
3105 emphasis on vocation
Increased pay for teachers who are qualified and show that they can produce academically
3117 successful and responsible students
3138 Emphasis on social interaction and conflict resolution
Review redistricting measures which force kids to take the bus across town for "immersion." many ride long distance and have to leave early, arrive home late ALL AT the CITY OF PHOENIX expense
3142 as they receive FREE bus passes.
3144 Increase teacher pay
3159 Change methods of delivery
3168 create an environment where students and teachers are valued
3174 make sure you are hiring qualified & enthused teachers
3178 teacher training
3228 Student buy-in
3241 Engaging teachers
Ensure all students receive quality Physical Education to ensure the health and safety, increase
3253 academic growth, readiness to learn, focus, and retention of information.
3262 Technology and school funding
