# Arizona Adult Education Standards English Language Acquisition (ELAA)

#### **English Language Acquisition Introduction**

These Standards identify core elements of second (and other) language learning that are important, yet general enough to relate to adult education contexts throughout the state of Arizona. Listening and Speaking, Writing, and Reading are the primary indicators because they are the skills that permeate all language learning contexts. **Language functions**, such as *giving/following directions* reflect general purposes for language use. Crucial to the functions is **supporting grammar and mechanics**. Though they appear in list form, the functions and supporting grammar are not meant to be sequential or representative of greater or lesser importance. They are also not meant to be exhaustive. It is entirely possible that the functions/grammar listed could be covered in a different level, should the learning opportunity present itself and the teacher seize the teachable moment.

The descriptions for the levels in these standards are prescribed by the US Department of Education, Division of Adult Education and Literacy. However, classroom experience has shown that learners in Beginning Literacy may fall into one of these categories:

- ► Low speaking ability and low first language literacy
- ► High speaking ability and low first language literacy
- ► First language literacy, but a different alphabet or learned English by ear

These Standards are a revision of the Arizona Adult Education ESOL Standards first published in 1999. This revision was accomplished by a team of practitioners from Arizona Adult Education programs. The term **ELAA** (English Language Acquisition for Adults) is used in Arizona to identify the listening/speaking, reading, writing, functions, grammar and mechanics of the English language that are taught to adults who speak languages other than English. **ESOL** (English for Speakers of Other Languages) refers to our learners. It is used to acknowledge that our learners may be multi-lingual and that English is an additional language that they have learned or are learning. In short, **ELAA** is *what* and **ESOL** is *who*.

### **ELAA Beginning Literacy Proficiency Standards**Listening and Speaking

**Performance Conditions:** Learners at this stage comprehend simple statements and questions. They understand the general idea of basic messages and conversations that pertain to common, routine matters. Their interactions are short, face-to-face, informal, and with one person at a time or in small groups. Learners' speech is largely guided by questions and feedback from the instructor, although they can initiate and respond to basic statements. They rely heavily on repetition, gestures and other nonverbal cues to sustain conversations. Learners' speech is slow. Communications that learners listen to and comprehend are short and include familiar, routine words. Context strongly supports their utterances.
