AZ01 - English Language and Literature

AZ01001 - English/Language Arts I (9th grade) - Part 1

Description:	This is the first part of a two course cycle, credit will be granted after completion of the second part (AZ01039) English/Language Arts I (9th grade) courses build upon students' prior knowledge of grammar, vocabulary, word usage, and the mechanics of writing and usually include the four aspects of language use: reading, writing, speaking, and listening. Typically, these courses introduce and define various genres of literature, with writing exercises often linked to reading selections.

AZ01002 - English/Language Arts II (10th grade) -Part 1

Description:	This is the first part of a two course cycle, credit will be granted after completion of the second part. (AZ01040) English/Language Arts II (10th grade) courses usually offer a balanced focus on composition and literature. Typically, students learn about the alternate aims and audiences of written compositions by writing persuasive, critical, and creative multi-paragraph essays and compositions. Through the study of various genres of literature, students can improve their reading rate and comprehension and develop the skills to determine the author's intent and theme and to recognize the techniques used by the author to deliver his or her message.

AZ01003 - English/Language Arts III (11th grade) -Part 1

Description:	This is the first part of a two course cycle, credit will be granted after completion of the second part. (AZ01045) English/Language Arts III (11th grade) courses continue to develop students' writing skills, emphasizing clear, logical writing patterns, word choice, and usage, as students write essays and begin to learn the techniques of writing research papers. Students continue to read works of literature, which often form the backbone of the writing assignments. Literary conventions and stylistic devices may receive greater emphasis than in previous courses.

AZ01019 - AS Level English Language and Literature

Description:	The purpose of this course is to provide students with an understanding of the semantic, structural, and rhetorical resources of the English language as well as the various styles, genres, and periods of English literature. Students will create critical and informed responses to texts in a range of forms, styles, and contexts while developing the interdependent skills of reading, analysis, and research. Students will demonstrate a knowledge and understanding of English language and its use in a variety of contexts. Students will engage in the careful reading and critical analysis of imaginative literature of various styles, genres, and periods, thus developing independent critical competency in the study of literature and fostering a high level of achievement in reading, writing, and speaking. Students will also acquire an understanding of the resources of the language and of the writer's craft. The course also provides a variety of writing opportunities calling for the use of different styles and tones. Students will write clearly, accurately, creatively, and effectively for different purposes/audiences, using different forms.

AZ01041 - ACT Quality Core English Grade 9

Description:	This course helps students find pleasure in reading, encourages them to read and think critically, and helps them to see that reading can have relevance to their lives. Students read stories in which characters make important decisions and compare these characters with themselves. They learn to ask critical questions about the points being made by the writer, about how the writer is trying to influence them, and about which characters' voices are privileged and which go unheard. Students write both formally and informally: personal narratives or autobiographies, expository or informative essays, short journal entries, casual notes or memos, persuasive columns, poetry and essays that analyze literature. By encouraging students to read critically, write recursively, discuss collaboratively and create, present and view projects that are relevant to their lives, this course helps students become active and responsible learners.

AZ01042 - ACT Quality Core English Grade 10

Description:	This course covers texts from a number of time periods and cultures and by a broad range of writers. Because the course's reading list is broad, it focuses on introducing students to interpretive strategies they can use to help develop deep understanding of any text they read. The course introduces students to Greek and Latin roots, suffixes and prefixes; provides them with strategies for annotating significant ideas; coaches them to use context clues to understand difficult passages; and explores theories of literary criticism. This course treats reading and writing as components of an ongoing, directed conversation about literature and language. By encouraging critical literacy and the development of their facility with language, this course enables students to take responsibility for their learning.

AZ01045 - English/Language Arts III (11th grade) - Part 2

Description:	English/Language Arts III (11th grade) courses continue to develop students' writing skills, emphasizing clear, logical writing patterns, word choice, and usage, as students write essays and begin to learn the techniques of writing research papers. Students continue to read works of literature, which often form the backbone of the writing assignments. Literary conventions and stylistic devices may receive greater emphasis than in previous courses.

AZ01053 - Literature

Description:	Literature courses offer the opportunity for students to study and reflect upon the themes presented in the body of literature being presented. Students improve their critical-thinking skills as they determine the underlying assumptions and values within the reading selection and as they understand how the work reflects society's problems and culture. Oral discussion is an integral part of literature courses, and written compositions are often required. Literature courses may survey representative works, reflect a particular genre or a specific theme, or survey works of a particular time or people.

AZ01077 - SEI- Oral English Conversation and Vocabulary

Description:	An Oral English Conversation and Vocabulary course for secondary English language learners. The content of the course is based on the specific teaching/learning objectives derived from the Arizona K-12 English Language Proficiency Standards. This course is intended to accelerate language acquisition and prepare students for the mainstream classroom, where they will be ready to access the content of instruction that is then driven by the Arizona English Language Arts Standards.

SCED Course Mapping:

Subject Area:	01 - English Language and Literature				
Course:	01008 - English as a Second Language				
Description:	English as a Second Language (ESL) courses are designed for the rapid mastery of the English language, focusing on reading, writing, speaking, and listening skills. ESL courses usually begin with extensive listening and speaking practice, building on auditory and oral skills, and then move on to reading and writing. These courses provide an explanation of basic structures of the English language, enabling students to progress from an elementary understanding of English words and verb tenses to a more comprehensive grasp of various formal and informal styles and then to advance to "regular" English courses. ESL classes may also include an orientation to the customs and culture of the diverse population in the United States.

AZ01081 - Cambridge AS Level English Literature I

Description:	The purpose of this course is to engage students in the careful reading and critical analysis of imaginative literature of various styles, genres, and periods, thus developing independent critical competency in the study of literature and fostering a high level of achievement in reading, writing, and speaking. Students will also acquire an understanding of the resources of the language and of the writer's craft. The content should include, but not be limited to the following: completing an in-depth study of literary works and authors selected from the Advanced International Certificate of Education list of prescribed texts and authors for Literature in English; using an in-depth reading process to construct meaning using technical, informative, and imaginative texts; using the writing process for various purposes with attention to style and format; using the research process and individual inquiry to locate, analyze, and evaluate information; using effective listening, speaking, and viewing strategies in informal and formal situations; understanding the power of language as it impacts readers, writers, listeners, viewers, speakers, and society as a whole; understanding and analyzing literary texts with a focus on particular structures, styles, themes, and literary techniques; responding critically and aesthetically to fiction and nonfiction; and understanding the content of literary texts as they relate to history and society.

AZ01082 - Cambridge AS Level English Literature II

Description:	The purpose of this course is to encourage an appreciation of, and an informed personal response to literature in English in a range of texts in different forms, and from different periods and cultures. Students will develop the interdependent skills of reading, analysis and communication. Students will also develop effective and appropriate communication through wider reading and an understanding of how reading may contribute to personal development. The content should include, but not be limited to the following: completing an in-depth study of literary works and authors selected from the Advanced Certificate of Education list of prescribed texts and authors for Literature in English; using an in-depth reading process to construct meaning using technical, informative, and imaginative texts; using the writing process for various purposes with attention to style and format; using the research process and individual inquiry to locate, analyze, and evaluate information; using effective listening, speaking and viewing strategies in informal and formal situations; understanding the power of language as it impacts readers, writers, listeners, viewers, speakers, and society as a whole; understanding and analyzing literary texts with a focus on particular structures, styles, themes, and literary techniques; responding critically and aesthetically to fiction and nonfiction; and understanding the content of literary texts as they relate to history and society.

AZ01083 - Honors Humane Letters I

Description:	The purpose of Humane Letters is to train students in how to think clearly and critically. Humane Letters trains students in habits of thought by demanding that they engage in three fundamental activities: reading, speaking, and writing. The work of Humane Letters begins with critical, active reading of history, literature, and philosophy from the best of what the Western tradition has to offer. The emphasis is on reading primary rather than secondary texts. The analytical approach taken to these primary texts is primarily a “new critical” approach: the primary text as a self-enclosed document speaks for itself. Secondary source material, whether of a historical, biographical, or literary nature, is extremely limited in order to promote the students’ approaching the text without preconceptions and in order to avoid undermining the main focus of Humane Letters: discussing the primary text at hand. Half of the content of this seminar is in the subject area of English Language and Literature. The other half of the content of this course fulfills the US and Arizona History and government standards and partially fulfills US Government standards. It is a comprehensive course that provides students with an overview of the history of the United States, examining time periods from colonialism through the Cold War. It includes a historical overview of political, military, scientific, and social developments and extensive analysis of key documents essential to the structure and foundations of US government

AZ01087 - Cambridge IGCSE English Literature

Description:	The purpose of this course is to enable students to communicate accurately, appropriately, and effectively in speech and writing. Students will also be able to understand and respond imaginatively to what they hear, read, and experience in a variety of media. Students will study in detail texts from a variety of genres to include poetry, prose, and drama. The selections will explore areas of universal human concern, thus leading to a greater understanding of themselves and others.

AZ01104 - Creative Writing

Description:	Creative Writing courses offer students the opportunity to develop and improve their technique and individual style in poetry, short story, drama, essays, and other forms of prose. The emphasis of the courses is on writing; however, students may study exemplary representations and authors to obtain a fuller appreciation of the form and craft. Although most creative writing classes cover several expressive forms, others concentrate exclusively on one particular form (such as poetry or playwriting).

SCED Course Mapping:

Subject Area:	01 - English Language and Literature		
Course:	01104 - Creative Writing		
Description:	Creative Writing courses offer students the opportunity to develop and improve their technique and individual style in poetry, short story, drama, essays, and other forms of prose. The emphasis of the courses is on writing; however, students may study exemplary representations and authors to obtain a fuller appreciation of the form and craft. Although most creative writing classes cover several expressive forms, others concentrate exclusively on one particular form (such as poetry or playwriting).

AZ01152 - Forensic Speech—Inclusive

Description:	Forensic Speech—Inclusive courses offer students the opportunity to learn how to use oral skills effectively in formal and informal situations. Students learn such skills as logic and reasoning, the organization of thought and supporting materials, and effective presentation of one's voice and body. Often linked to an extracurricular program, these courses introduce students to numerous public speaking situations, and they learn the methods, aims, and styles of a variety of events (e.g., formal debate, Lincoln-Douglas debate, expository speaking, radio broadcast, oral interpretation, and dramatic interpretation). Participation in competition is encouraged, but not always required.

AZ02004 - Cambridge IGCSE Mathematics II

Description:	The purpose of this second course in IGCSE Mathematics is to enable students to develop their mathematical knowledge, as well as oral, written, and practical skills; read mathematics and write and talk about the subject in a variety of ways; carry out calculations and understand the significance of the results obtained; apply mathematics in everyday situations and develop an understanding of the part that mathematics plays in the world around them; solve problems, present the solutions clearly, and check and interpret the results; develop an understanding of mathematical principles; recognize when and how a situation may be represented mathematically; identify and interpret relevant factors and, where necessary, select an appropriate mathematical method to solve the problem; use mathematics as a means of communication with emphasis on the use of clear expression; develop an ability to apply mathematics in other subjects, particularly science and technology; develop the ability to reason logically, to classify, to generalize, and to prove; appreciate patterns and relationships in mathematics; produce and appreciate imaginative and creative work arising from mathematical ideas; develop their mathematical abilities by considering problems and conducting individual and cooperative inquiry and experiment, including extended pieces of work of a practical and investigative kind; appreciate the interdependence of different branches of mathematics; acquire a foundation appropriate to their further study of mathematics and of other disciplines. This course builds on the skills developed in IGCSE Mathematics I, with increased emphasis on advanced application of the course content topics.

Course: 02047 - Foundation Mathematics—Independent Study			
Description: Foundation Mathematics—Independent Study courses, often conducted with instructors as mentors, enable students to explore topics of interest related to foundation mathematics. Independent Study courses may serve as an opportunity for students to expand their expertise in a particular application, to explore a topic in greater detail, or to develop more advanced skills.

AZ02022 - Cambridge IGCSE Mathematics I

Description: The purpose of this first course in IGCSE Mathematics is to enable students to develop their mathematical knowledge, as well as oral, written, and practical skills; read mathematics and write and talk about the subject in a variety of ways; carry out calculations and understand the significance of the results obtained; apply mathematics in everyday situations and develop an understanding of the part that mathematics plays in the world around them; solve problems, present the solutions clearly, and check and interpret the results; develop an understanding of mathematical principles; recognize when and how a situation may be represented mathematically; identify and interpret relevant factors and, where necessary, select an appropriate mathematical method to solve the problem; use mathematics as a means of communication with emphasis on the use of clear expression; develop an ability to apply mathematics in other subjects, particularly science and technology; develop the ability to reason logically, to classify, to generalize, and to prove; appreciate patterns and relationships in mathematics; produce and appreciate imaginative and creative work arising from mathematical ideas; develop their mathematical abilities by considering problems and conducting individual and cooperative inquiry and experiment, including extended pieces of work of a practical and investigative kind; appreciate the interdependence of different branches of mathematics; acquire a foundation appropriate to their further study of mathematics and of other disciplines.

AZ02023 - Cambridge IGCSE Additional Mathematics

Description:	The purpose of this course is to enable students to: consolidate and extend their elementary mathematical skills and use these in the context of more advanced techniques; further develop their knowledge of mathematical concepts and principles and use this knowledge for problem solving; appreciate the interconnectedness of mathematical knowledge; devise mathematical arguments and present them precisely and logically; integrate information technology to enhance the mathematical experience; develop the confidence to apply their mathematical skills and knowledge in appropriate situations; develop creativity and perseverance in the approach to problem solving; derive enjoyment and satisfaction from engaging in mathematical pursuits, and gain an appreciation of the beauty, power and usefulness of mathematics. By the end of this course, students will have a suitable foundation in mathematics for advanced mathematics courses and in related subjects.

- Integrated Math—multi-year equivalent						
Description:	Integrated Math courses emphasize the teaching of mathematics as problem solving, communication, and reasoning, and emphasize the connections among mathematical topics and between mathematics and other disciplines. The multi-period sequence of Integrated Math replaces the traditional Algebra I, Geometry, Algebra II sequence of courses, and usually covers the following topics during a three- or four-year sequence: algebra, functions, geometry from both a synthetic and an algebraic perspective, trigonometry, statistics and probability, discrete mathematics, the conceptual underpinnings of calculus, and mathematical structure.

AZ02081 - ACT Quality Core Mathematics Algebra I - Part 1					
Description:	This is the first part of a two course cycle, credit will be granted after completion of the second part. (AZ02085) This course is rooted in the examination of the structure of real numbers, in algebraic expressions, equations and inequalities and in the classes of functions. It presents these algebraic concepts through patterns and events that are best described and represented by linear equations, inequalities, functions and systems, quadratic equations and functions, polynomial expressions and equations, data analysis and probability. In the process of exploring these mathematical relationships, the course encourages students to rely upon problem-solving strategies and to use precise mathematical language to communicate ideas and interpret their solutions. The course emphasizes the skills students need to think logically and critically.

AZ02082 - ACT Quality Core Mathematics Geometry - Part 1					
Description:	This is the first part of a two course cycle, credit will be granted after completion of the second part. (AZ02087) This course begins with terms such as points, lines, planes, etc. from which all other terms are later defined; it identifies axioms or postulates; it then investigates problems and relationships that lead to theorems that must be proved. With these basic concepts, the course studies the properties of plane figures from line segments to rays, angles, polygons, and circles; the properties of solids; perimeter, area and volume; as well as similarity, congruence, and symmetry. This course presents these geometric concepts through several approaches to geometry (e.g., Euclidean, coordinate, transformational), and it introduces students to trigonometry. Students are asked to justify their reasoning and to construct formal proofs using the language and structure of mathematics.

AZ02084 - ACT Quality Core Mathematics Precalculus

Description:	Precalculus is a rigorous mathematics course that extends the concepts learned in Algebra II and adds new concepts, primarily trigonometry, with the intent of building a bridge to advanced calculus or college calculus courses. The primary goal is to learn analytical and problem-solving skills by using algebraic, graphical, and numerical techniques, thus developing the necessary foundation for success in advanced calculus.

AZ02086 - ACT Quality Core Mathematics Algebra II - Part 2

Description:	The intent of this course is to provide the students with the skills necessary to succeed in and to progress in the advanced study of mathematics. Topics appropriate to Algebra II will be presented, advanced topics will be introduced, and reinforcement of advanced skills in Algebra will be emphasized. The use of a graphing calculator and real-world applications will be integrated into this course.

AZ02087 - ACT Quality Core Mathematics Geometry - Part 2

Description:	This course begins with terms such as points, lines, planes, etc. from which all other terms are later defined; it identifies axioms or postulates; it then investigates problems and relationships that lead to theorems that must be proved. With these basic concepts, the course studies the properties of plane figures from line segments to rays, angles, polygons, and circles; the properties of solids; perimeter, area and volume; as well as similarity, congruence, and symmetry. This course presents these geometric concepts through several approaches to geometry (e.g., Euclidean, coordinate, transformational), and it introduces students to trigonometry. Students are asked to justify their reasoning and to construct formal proofs using the language and structure of mathematics.

AZ02143 - Cambridge AS Level Mathematics

Description:	This syllabus is intended for high ability candidates who have achieved, or are likely to achieve, a high grade in the A Level Mathematics examination. The A Level Further Mathematics syllabus enables students to extend the mathematical skills, knowledge and understanding developed in the A Level Mathematics course. The content of the syllabus covers the areas of Pure Mathematics, Mechanics and Statistics. Knowledge of the whole content of the A Level Mathematics syllabus is assumed.

AZ02144 - A Level Mathematics:PureMathematics,Mechanics,Probability&Statistics

Description:	The purpose of this course is to enable students to develop an understanding of mathematical principles and an appreciation of mathematics as a logical and coherent subject. The content themes or topics should include, but not be limited to, Pure Mathematics: quadratics, functions, coordinate geometry, circular measure, trigonometry, vectors, series, integration, differentiation, algebra, logarithmic and exponential functions, trigonometry, differentiation, integration, numerical solution of equations, vectors, differential equations. Other topics include: Mechanics I: forces and equilibrium, kinematics of motion in a straight line, Newton's laws of motion, energy, work, and power. Students will also study Probability and Statistics: representation of data, permutations and combinations, probability, the normal distribution.

AZ03031 - Cambridge AS Level Environmental Management

Description:	This syllabus covers environmental issues and their management, especially the human aspect. Through their studies, students will learn about environmental resources and their human exploitation, and about the goal of sustainable environmental management. Students also consider a range of case study material which can feature local, regional or global examples. Although AS Level Environmental Management extends and complements the relevant O Level and IGCSE syllabuses, candidates do not need to have studied the subject before starting the course.

AZ03032 - Cambridge AS Level Marine Science

Description:	A and AS Level Marine Science provides a coherent and stimulating introduction to the science of the marine environment. The content of the AS part of the course concentrates on the scientific study of the sea and its ecosystems, while the A Level part of the course concentrates on human activities that depend on the sea and have an impact on it. No prior courses at IGCSE or O Level are assumed. The emphasis throughout is on the understanding of concepts and the application of ideas to new contexts as well as on the acquisition of knowledge, and the course will foster creative thinking and problem-solving skills which are transferable to any future career path. It is expected that practical activities will underpin the teaching of the whole course, and students may be asked about practical activities in examination questions, but there is no practical paper and no coursework. A and AS Level Marine Science can form part of an ideal subject combination for students who want to study Marine Biology or Environmental Science at university or to follow a career in shipping, fisheries, tourism or aquaculture.

AZ03033 - Cambridge IGCSE - Biology

Description:	This syllabus is available only to Centers participating in the NCEE Excellence for All initiative in the USA. With an emphasis on human biology, the Cambridge IGCSE Biology (US) syllabus enables learners to understand the technological world in which they live, and take an informed interest in science and scientific developments. Learners gain an understanding of the basic principles of biology through a mix of theoretical and practical studies. They also develop an understanding of the scientific skills essential for further study at Cambridge International A Level, which are useful in everyday life. As they progress, learners understand how science is studied and practised, and become aware that the results of scientific research can have both good and bad effects on individuals, communities and the environment.

AZ03082 - Cambridge IGCSE Biology

Description:	The purpose of this course is to provide exploratory experiences, laboratory, and real-life applications in the biological sciences. Students will demonstrate knowledge and understanding of biological phenomena, facts, laws, definitions, concepts, and theories; biological vocabulary, terminology, and conventions (including symbols, quantities, and units); scientific instruments and apparatus, including techniques of operation and aspects of safety; scientific quantities and their determination; and scientific and technological applications with their social, economic, and environmental implications. Students will also learn to use oral, written, symbolic, graphical, and numerical forms of presentation, to locate, select, organize, and present information from a variety of sources; translate information from one form to another; manipulate numerical and other data; use information to identify patterns, report trends, and draw inferences about biological relationships; present reasoned explanations of biological phenomena, patterns, and relationships; make predictions and propose hypotheses; solve problems, including some of a quantitative nature. Students will apply this knowledge and skills to use techniques, apparatus, and materials (including the following of a sequence of instructions, where appropriate); make and record observations and measurements; interpret and evaluate experimental observations and data; plan biological investigations, evaluate methods, and suggest possible improvements (including the selection of biological techniques, apparatus, and materials).

Subject Area:	03 - Life and Physical Sciences				
Course:	03051 - Biology				
Description:	Biology courses are designed to provide information regarding the fundamental concepts of life and life processes. These courses include (but are not restricted to) such topics as cell structure and function, general plant and animal physiology, genetics, and taxonomy.				
AP:	False	IB:	False		
Elementary Mapping:	False	Secondary Mapping:	True	Other Mapping:	

AZ03083 - Cambridge AS Level Biology I

Description:	The purpose of this course is to provide exploratory experiences, laboratory experience, and real-life applications in the biological sciences in an accelerated fashion. The content should include, but not be limited to, the following: the nature of science; matter, energy, and chemical life processes; cells: biology, reproduction, and communication; levels of organization, classification, and taxonomy; evolution: biological selection, adaptations, and changes through time; structure, function, and reproduction of plants, animals, and microorganisms; and ecology: interdependence of organisms, humans, and the environment.

AZ03084 - Cambridge AS Level Physical Education

Description:	The Physical Education syllabus is both practical and theoretical. Students learn about anatomy and physiology, movement skills and contemporary studies in sport. They are also encouraged to try out a range of physical activities, including team and individual sports, games, and outdoor activities; students then use the theoretical knowledge they have gained to analyze the different factors influencing performance. The course also encourages students to understand and explain global trends in Physical Education and Sport.

AZ03085 - A Level Biology

Description:	The purpose of this course is to provide exploratory experiences, laboratory experience, and real-life applications in the biological sciences in an accelerated fashion. Students will become confident citizens in a technological world with an informed interest in scientific matters; recognize the usefulness (and limitations) of the scientific method and its application in other subjects and in everyday life; and be suitably prepared for studies in biological sciences in continuing higher education or professional courses. A Level Biology prepares students for the higher-order experimental skills of planning, analysis, drawing conclusions, and evaluation.

AZ03131 - ACT Quality Core Science Chemistry

Description:	This course covers the primary aspects of chemistry, including the makeup of the physical world, from the properties and structures of matter to the laws explaining the activity of gases and the chemical structures of elements, molecules and compounds. This course studies the periodic table of elements and the proper symbolic nomenclature of elements as well as the symbolic representation of chemical reactions in formulas and equations. Investigations into the microscopic world lead to deeper understanding of the macroscopic world, from atomic structure and bonding to the properties of salts, acids and bases. It explores the foundations and practices of science in general, teaches the basic processes of scientific inquiry, and emphasizes the importance of mathematics and measurement. This course emphasizes problem solving, critical thinking and decision making.

AZ03133 - Cambridge IGCSE Chemistry					
Description:	The purpose of this course is to provide exploratory experiences, laboratory, and real-life applications in the chemical sciences. Students will demonstrate knowledge and understanding of chemical phenomena, facts, laws, definitions, concepts, and theories; chemical vocabulary, terminology, and conventions (including symbols, quantities, and units); scientific instruments and apparatus, including techniques of operation and aspects of safety; scientific quantities and their determination; and scientific and technological applications with their social, economic, and environmental implications. Students will also learn to use oral, written, symbolic, graphical, and numerical forms of presentation, to locate, select, organize, and present information from a variety of sources; translate information from one form to another; manipulate numerical and other data; use information to identify patterns, report trends, and draw inferences about chemical relationships; present reasoned explanations of chemical phenomena, patterns, and relationships; make predictions and propose hypotheses; solve problems, including some of a quantitative nature. Students will apply this knowledge and skills to use techniques, apparatus, and materials (including the following of a sequence of instructions, where appropriate); make and record observations and measurements; interpret and evaluate experimental observations and data; plan biological investigations, evaluate methods, and suggest possible improvements (including the selection of chemical techniques, apparatus and materials).

AZ03156 - AP Physics C

Description:	Designed by the College Board to parallel college-level physics courses that serve as a partial foundation for science or engineering majors, AP Physics C courses primarily focus on 1) mechanics and 2) electricity and magnetism, with approximately equal emphasis on these two areas. AP Physics C courses are more intensive and analytical than AP Physics B courses and require the use of calculus to solve the problems posed.				
Comments:	College Board lists Physics C: Electricity and Magnetism and Physics C: Mechanics as two (2) separate courses and the National Center for Education Statistics (NCES) lists this course as one (1) course with its own SCED code (School Codes for Exchange of Data). Therefore, LEAs should map both Physics C: Electricity and Magnetism and Physics C: Mechanics to AP Physics C, but may create two (2) separate courses at the local level.

Subject Area:	03 - Life and Physical Sciences				
Course:	03161 - Conceptual Physics				
Description:	Conceptual Physics courses introduce students to the use of chemicals, characteristic properties of materials, and simple mechanics to better describe the world and nonliving matter. The courses emphasize precise measurements and descriptive analysis of experimental results. Topics covered may include energy and motion, electricity, magnetism, heat, the structure of matter, and how matter reacts to materials and forces.

AZ03182 - Cambridge AS Level Physical Science

Description:	The AS Level Physical Science syllabus builds on the skills acquired at IGCSE (or equivalent) level. The syllabus includes the main theoretical concepts which are fundamental to the subject, current applications of physical science, and a strong emphasis on advanced practical skills. Practical skills are assessed in a timetabled practical examination. The emphasis throughout is on the understanding of concepts and the application of physical science ideas in novel contexts as well as on the acquisition of knowledge. The course will foster creative thinking and problem-solving skills which are transferable to any future career path. AS Level Physical Science is ideal for students who want to study physical science or a wide variety of related subjects at university, or to follow a career in science.

AZ03185 - Cambridge IGCSE Physics

Description:	The purpose of this course is to provide exploratory experiences, laboratory, and real-life applications in the physical sciences. Students will demonstrate knowledge and understanding of physical phenomena, facts, laws, definitions, concepts, and theories; physical vocabulary, terminology, and conventions (including symbols, quantities, and units); scientific instruments and apparatus, including techniques of operation and aspects of safety; scientific quantities and their determination; and scientific and technological applications with their social, economic, and environmental implications. Students will also learn to use oral, written, symbolic, graphical, and numerical forms of presentation, to locate, select, organize, and present information from a variety of sources; translate information from one form to another; manipulate numerical and other data; use information to identify patterns, report trends, and draw inferences about physical relationships; present reasoned explanations of physical phenomena, patterns and relationships; make predictions and propose hypotheses; solve problems, including some of a quantitative nature. Students will apply this knowledge and skills to use techniques, apparatus, and materials (including the following of a sequence of instructions, where appropriate); make and record observations and measurements; interpret and evaluate experimental observations and data; plan physical investigations, evaluate methods, and suggest possible improvements (including the selection of physical techniques, apparatus, and materials).

AZ04005 - A Level Geography

Description:	The purpose of this course is for students to develop awareness of the relevance of geographical analysis to understanding and solving contemporary human and environmental problems; introduce students to the main elements of physical and human geography and the interrelationships between these components; and encourage understanding of the principal processes operating at different scales within physical and human geography. Students will develop a sense of relative location, including an appreciation of the complexity and variety of natural and human environments; demonstrate and explain the causes and effects of change over space and time on the natural and human environments; and show the importance of scale in understanding physical and human geography.

AZ04031 - Cambridge AS Level Geography

Description:	The Geography syllabus builds upon skills gained at IGCSE (or equivalent) level study. Students widen their knowledge and understanding of the subject, while developing their investigative abilities and their evaluation and decision-making skills. The syllabus is wide-ranging and comprises a variety of options. For example, students can learn more about topics such as hydrology and fluvial geomorphology, atmosphere and weather, rocks and weathering, population change and settlement dynamics. The syllabus considers a range of environments, from tropical to arid, and students can also study subjects such as environmental management, global interdependence and economic transition.

AZ04085 - AS Level History

Description:	The purpose of this course is to stimulate interest in and enthusiasm about the past for students. Students will demonstrate an understanding of the complexity of issues and themes within a historical period; distinguish and assess different approaches to, interpretations of, and opinions about the past; and express awareness of historical concepts such as change and continuity, as well as cause and effect. Students will also present clear, concise, logical, and relevant arguments based on their effective evaluation and interpretation of source materials as historical evidence.

AZ04131 - Cambridge AS Level U.S. History

Description:	The purpose of this course is to enable students to understand the development of the United States within the context of history with a major focus on the transformation of the USA from an isolated agrarian society of the 1840's to the world's leading superpower. Students will demonstrate an understanding of the complexity of issues and themes within a United States historical period, and distinguish and assess different approaches to, interpretations of, and opinions about the United States past. The course explicitly encourages the development of two fundamental historical skills, the construction of clear, concise, logical and relevant arguments and the evaluation and interpretation of source materials as historical evidence within the context of United States history. The content should include, but not be limited to, the following: develop an interest in the USA past and an appreciation of human endeavor; acquire an understanding and a sound knowledge of selected USA periods or themes; gain an awareness of historical concepts such as change and continuity, cause and effect within the context of USA history; appreciate the nature and diversity of historical sources and methods used by historians; develop the ability to construct relevant and logical explanations of historical phenomena developments and events; grasp a variety of approaches to aspects and periods of USA history and differing interpretations of particular historical issues; think independently and make informed judgments of issues within the context of USA history; and cultivate empathy with people living in diverse places in the USA and at different times.

AZ04132 - Cambridge IGCSE American History

Description:	The purpose of this course is to stimulate an interest in and enthusiasm about the past for students. Students will develop an ability to recall, select, organize, and deploy knowledge of American History appropriately. Students will also demonstrate an understanding of the past through explanation, analysis, and substantiated judgments of change and continuity; cause and consequence; similarity and difference; and historical significance. Students will analyze the motives, emotions, intentions, and beliefs of people in the past so that they can deploy the ability to understand, analyze, evaluate, and use critically a range of sources as evidence in their historical context. Students will be asked to consider American History through the lens of a local history. Students will use critically a range of sources to generate an interpretation of the significance of a local site or object in its historical context and provide appropriate acknowledgment of sources.

AZ04134 - IGCSE Global Perspectives

Description:	The purpose of this course is for students to develop the sorts of thinking skills and dispositions that active citizens of the future will need. This approach aims to help young people develop independent minds, at the same time as developing their sense of community, from local to global. Students will develop an awareness of how their thoughts and arguments differ from others. They will become familiar with the great complexity of human thought throughout the world and recognize the diversity of human experience and feeling. The emphasis of this course is on developing the ability to think critically about a range of global issues where there is always more than one point of view.

AZ04150 - ACT Quality Core Social Studies U.S. History

Description:	This course challenges students with a variety of instructional materials. Students are introduced to primary sources such as memoirs, diaries, letters and speeches along with secondary works (e.g., novels, historical studies) and graphic images (e.g., cartoons, charts, films, photographs) that document the past. Students read and analyze varied texts to develop close reading skills and see the past from more than one viewpoint. As students come to appreciate the past in a new way, they practice skills that allow them to articulate their understanding. Students write throughout the course, developing their interpretive skills and marshalling their research into sophisticated essays. In this course, students learn to work alone and with others, to evaluate a wide range of source materials, to analyze evidence and assess conflicting interpretations, to construct their own interpretations of the past, and to communicate their views to others. In the process, students discover that the study of history is about problem solving, gathering evidence and piecing together evidence to create a picture of the past.

AZ04181 - Cambridge AS Level Law

Description:	The main aim of the A and AS Level Law syllabus is to provide students with an introduction to the main principles of the law as it is practiced in England and Wales. As a result, students build their knowledge and understanding of the English legal system, and develop a critical awareness of its structure, personnel and operation. The syllabus also focuses on two areas of substantive law (contract and tort), and encourages students to develop skills of analysis and problem-solving through the application of legal rules.

AZ04208 - IGCSE Economics

Description:	The purpose of this course is to for students to show knowledge and understanding of economic facts, definitions, concepts, principles, and theories and use economic vocabulary and terminology confidently. Students will select, organize, and interpret data; apply economic knowledge and understanding in verbal, numerical, diagrammatic, pictorial, and graphical form; and use economic data to recognize patterns in such data and to deduce relationships. Students will develop the skills to distinguish between evidence and opinion, make reasoned judgments, and communicate those judgments in an accurate and logical manner; recognize that economic theory has various limits and uncertainties; and evaluate the social and environmental implications of particular courses of economic action. By the end of the course, students will be able to draw conclusions from economic information, critically evaluate economic data, and communicate conclusions in a logical and concise manner.

AZ04281 - Cambridge AS Level Psychology

Description:	A and AS Level Psychology students develop their appreciation of the subject by exploring the ways in which psychology is conducted. As part of their studies, students also review important research; this provides an insight into the ways in which psychology has been applied, thereby leading to a better understanding of key themes and issues. The syllabus reflects the five core areas of psychology, namely cognitive, social, physiological, developmental and the psychology of individual differences; it also relates psychology to education, health, organizations, the environment and abnormality.

AZ05080 - IB Theater

Description:	IB Theatre courses prepare students to take the International Baccalaureate (IB) Theatre exams at either the standard (SL) or higher level (HL). IB Theatre courses encourage students to examine the theory, history, and culture of theatre. These courses also help students develop the organizational and technical skills to express themselves through scripted performance, workshops, and independent project(s).

AZ05081 - Cambridge IGCSE Drama	
Description: The intent of this course is to develop students' understanding of drama through practical and theoretical study. The student will develop skills in drama, both individually and in groups, and will study ways of communicating ideas and feelings to an audience, stimulating the enjoyment of drama. Students should be able to understand performance possibilities of text and other stimuli while demonstrating an ability to devise dramatic material. Students will also be assessed on performance skills in drama.

AZ05114 - AP Music Theory

Description:	AP Music Theory courses are designed to be the equivalent of a first-year music theory college course as specified by the College Board. AP Music Theory develops students' understanding of musical structure and compositional procedures. Usually intended for students who already possess performance-level skills, AP Music Theory courses extend and build upon students' knowledge of intervals, scales, chords, metric/rhythmic patterns, and the ways they interact in a composition. Musical notation, analysis, composition, and aural skills are important components of the course.

AZ05125 - A Level Music

Description:	The purpose of this course is to enable students to foster a discriminating aural appreciation of, and an informed critical response to, music of the Western tradition from at least two representative genres and periods. Students will develop creative and interpretive skills through the disciplines of composing and performing in Western and/or non-Western traditions. Students will have the opportunity to deepen understanding of music in its wider cultural context. Students will communicate understanding and support judgments with arguments based on evidence. Students will be required to perform and/or compose music that reflects a single focus from any tradition, e.g., one substantial piece or a group of pieces that reflect a common theme, style, or purpose, on any instrument (or voice).

AZ05131 - Cambridge AS Level Music

Description:	A and AS Level Music students develop an appreciation of, and an informed critical response to, music of the Western tradition from at least two genres and periods. Students learn how to listen attentively and responsively in order to better understand the musical processes at work; they also learn how to communicate this understanding, supporting their judgments by evidence-based argument. As part of the course, students are encouraged to develop their own creative and interpretative skills through the disciplines of composing and performing in Western and/or non-Western traditions. This leads, in turn, to a deeper understanding of music in its wider cultural context.

AZ05132 - Cambridge IGCSE Music

Description:	This course prepares students to acquire and consolidate a range of basic musical skills, knowledge and understanding, through the activities of listening, performing and composing; develop a perceptive, sensitive and critical response to the main historical periods and styles of Western music; recognize and understand the music of various non-Western traditions, and thus to form an appreciation of cultural similarities and differences; develop an informed appreciation of music and provide a foundation for further study in music at a higher level. Students will demonstrate aural awareness, perception and discrimination in relation to Western music of the baroque, classical, romantic and 20th-century periods; identify and comment on a range of music from cultures in different countries; and show knowledge and understanding of one Western Prescribed Work and one Prescribed Focus from a non-Western culture. Students will develop technical competence on one or more instruments and an interpretative understanding of the music performed. Students will also demonstrate discrimination and imagination in free composition, and notation, using staff notation and, if appropriate, other suitable systems.

AZ05154 - Creative Art—Comprehensive

Description:	Creative Art—Comprehensive courses provide students with the knowledge and opportunity to explore an art form and to create individual works of art. These courses may also provide a discussion and exploration of career opportunities in the art world. Initial courses cover the language, materials, and processes of a particular art form and the design elements and principles supporting a work of art. As students advance and become more adept, the instruction regarding the creative process becomes more refined, and students are encouraged to develop their own artistic styles. Although Creative Art courses focus on creation, they may also include the study of major artists, art movements, and styles.

Subject Area:	05 - Fine and Performing Arts				
Course:	05175 - AP Studio Art—Three-Dimensional				
Description:	AP Studio Art—Three-Dimensional courses focus on a variety of concepts and approaches in 3-D design and creation, enabling students to demonstrate a range of abilities and versatility with media, technique, problem solving, and scope. They can demonstrate such conceptual variety through the use of one or several media. These courses enable students to refine their skills and create artistic works to submit via portfolio to the College Board for evaluation.

AZ05177 - Animation

Description:	Animation courses focus on the elements of art and principles of design as applied to two- or three-dimensional animation. These courses emphasize interactive use of drawing and design fundamentals, storyboarding, composition and imaging, shadows/shades, audio and sound creation, and editing. Courses may also include a study of the history of animation, aesthetic issues, roles and functions, and instruction in the critique process.

AZ05179 - A Level Art & Design

Description:	The purpose of this course is to enable students to communicate and express through visual perception and aesthetic experiences an artistic language in addition to those used by literary, mathematical, scientific, and factually-based subjects. This studio-based language will enable students to develop their abilities of observation and analysis of the visual world, sensitivity, skill, personal expression, and imagination. Students should also learn to relate these skills to an enhanced knowledge of their own and other cultures, past, and present, and an appreciation of practical design problems. Students will continue to develop skills gained in AS Level Art & Design, with new emphasis on manipulative, artistic, and analytical skills, as well as an appreciation of aesthetic qualities.

AZ05181 - Cambridge AS Level Art and Design-Graphic Design

Description:	The Art and Design syllabus considers expression and communication. Students learn about visual perception and aesthetic experience, and the ways in which art and design creates a language of its own. Most of the work for this syllabus is practical or studio based, so that students can develop their abilities of observation and analysis of the visual world, sensitivity, skill, personal expression and imagination. They also learn how to relate their skills to an enhanced knowledge of their own cultures, past and present, as well as an appreciation of practical design problems.

AZ05182 - Cambridge AS Level Art and Design-Textiles

Description:	A practical syllabus, the course examines the scientific, creative and artistic aspects of design and textiles, with plenty of opportunities for students to apply their learning by demonstrating their investigative, creative, design and make, and practical skills. Through the study of fibers and fabrics students learn about basic design, contemporary fashion, clothing manufacture and the use of commercial patterns to make a variety of garments. Students go on to explore textile applications and technology, looking at issues such as fitness for purpose, creative techniques, the application of color, and environmental impact. They also study the making and finishing of textile products, the care of clothing, and the use and care of a sewing machine.

AZ05183 - Cambridge AS Level Art and Design Fashion Design

Description:	The purpose of this course is to enable students to communicate and express through visual perception and aesthetic experiences a language in addition to those used by literary, mathematical, scientific and factually-based subjects. This studio-based language will enable students to develop their abilities of observation and analysis of the visual world, sensitivity, skill, personal expression and imagination. Students should also learn to relate these skills to an enhanced knowledge of their own and other cultures, past and present, and an appreciation of practical design problems. Students should explore personal solutions in designing garments or items for personal decorative adornment for different occasions and age groups. Students should be able to identify the requirements of dress for specific purposes and functionality. Designs should demonstrate knowledge of shape, line, color, and texture. Students should demonstrate knowledge of the changes in technology which make available different fashion items and awareness between function and conventions which influence fashion, in particular those factors that bring about change over time. Students should have knowledge of work of contemporary fashion designers, fashion shows, and garment construction factories. The content of the course should actively seek to develop, but not be limited to, the following abilities and qualities: the ability to perceive, understand and express concepts and feelings; the ability to record from direct observation and personal experience; the ability to communicate by using appropriate materials and techniques in a disciplined way; experimentation, innovation and the use of intuition and imagination; critical and analytical faculties; the ability to identify, research and evaluate problems in a systematic way; confidence, initiative and a sense of adventure and achievement; the acquisition of a relevant working vocabulary; and an awareness and appreciation of the interdependence of Art & Design and the individual within cultural contexts.

AZ05184 - Cambridge AS Level Art and Design Ceramics

Description:	The purpose of this course is to enable students to communicate and express through visual perception and aesthetic experiences a language in addition to those used by literary, mathematical, scientific and factually-based subjects. This studio-based language will enable students to develop their abilities of observation and analysis of the visual world, sensitivity, skill, personal expression and imagination. Students should also learn to relate these skills to an enhanced knowledge of their own and other cultures, past and present, and an appreciation of practical design problems. Students should be able to demonstrate knowledge of hand-bulking techniques, throwing and casting as well as the use of decorating slips, oxides, and pigments. Students should be able to demonstrate different methods of firing and finishing work to include glazes and glaze-mixing. Students should be aware of the links between form and function and their relationships to different forms of ceramics being produced today, expressive fine-art work, industrial ceramics, and traditional handcrafted pottery. Emphasis should be placed on the exploration of ideas and design work in the development of a personal style. The content of the course should actively seek to develop, but not be limited to, the following abilities and qualities: the ability to perceive, understand and express concepts and feelings; the ability to record from direct observation and personal experience; the ability to communicate by using appropriate materials and techniques in a disciplined way; experimentation, innovation and the use of intuition and imagination; critical and analytical faculties; the ability to identify, research and evaluate problems in a systematic way; confidence, initiative and a sense of adventure and achievement; the acquisition of a relevant working vocabulary; and an awareness and appreciation of the interdependence of Art & Design and the individual within cultural contexts.

AZ05185 - Cambridge AS Level Art and Design Painting and Related Media

Description:	The purpose of this course is to enable students to communicate and express through visual perception and aesthetic experiences a language in addition to those used by literary, mathematical, scientific and factually-based subjects. This studio-based language will enable students to develop their abilities of observation and analysis of the visual world, sensitivity, skill, personal expression and imagination. Students should also learn to relate these skills to an enhanced knowledge of their own and other cultures, past and present, and an appreciation of practical design problems. The following materials may be used, combined, or used in conjunction with other materials: oil color, water-color, acrylic, gouache, powder or poster paint, colored inks, pen and wash, pastels, oil pastels, and colored pencils. The work may include still life, portraiture, landscapes, abstract or figurative compositions and may be either expressive, interpretative, or realistic. Students should have a broad understanding of the history of painting. The content of the course should actively seek to develop, but not be limited to, the following abilities and qualities: the ability to perceive, understand and express concepts and feelings; the ability to record from direct observation and personal experience; the ability to communicate by using appropriate materials and techniques in a disciplined way; experimentation, innovation and the use of intuition and imagination; critical and analytical faculties; the ability to identify, research and evaluate problems in a systematic way; confidence, initiative and a sense of adventure and achievement; the acquisition of a relevant working vocabulary; and an awareness and appreciation of the interdependence of Art & Design and the individual within cultural contexts.

AZ05186 - Cambridge AS Level Art and Design Film and Video

Description:	The purpose of this course is to enable students to communicate and express through visual perception and aesthetic experiences a language in addition to those used by literary, mathematical, scientific and factually-based subjects. This studio-based language will enable students to develop their abilities of observation and analysis of the visual world, sensitivity, skill, personal expression and imagination. Students should also learn to relate these skills to an enhanced knowledge of their own and other cultures, past and present, and an appreciation of practical design problems. Students should demonstrate competency in the three stages of planning, recording, and editing sequences of images and sounds as it relates to advertising, reporting, recording, documentary, illustration or title sequence, and formal properties of film and video in order to communicate personal ideas. Students should be able to demonstrate skills in both live-action and animated recordings. In editing, students should be able to construct sequences by using both narrative continuity and montage. They should also be able to lay appropriate soundtracks to accompany their visual sequences. Students should have a knowledge of early and pre-cinematic experiments with moving images, early twentieth century films, development of animation, and contemporary practices. Additionally, student should also have an understanding of the theories of narrative, montage, and semiotics. The content of the course should actively seek to develop, but not be limited to, the following abilities and qualities: the ability to perceive, understand and express concepts and feelings; the ability to record from direct observation and personal experience; the ability to communicate by using appropriate materials and techniques in a disciplined way; experimentation, innovation and the use of intuition and imagination; critical and analytical faculties; the ability to identify, research and evaluate problems in a systematic way; confidence, initiative and a sense of adventure and achievement; the acquisition of a relevant working vocabulary; and an awareness and appreciation of the interdependence of Art & Design and the individual within cultural contexts.

AZ05187 - Cambridge IGCSE Art and Design Painting and Related Media

Description:	The IGCSE Art and Design Painting and Related Media course encourages personal expression, imagination, sensitivity, conceptual thinking, powers of observation, an analytical ability, and practical attitudes. It should lead to greater understanding of the role of the visual arts in the history of civilizations and widen cultural horizons and enrich the individual. In addition, it should combine a breadth and depth of study so that it may accommodate a wide range of abilities and individual resources. It encourages students to develop: an ability to record from direct observation and personal experience; an ability to identify and solve problems in visual and/or other forms; creativity, visual awareness, critical and cultural understanding; an imaginative, creative, and personal response; confidence, enthusiasm, and a sense of achievement in the practice of Art and Design; growing independence in the refinement and development of ideas and personal outcomes; engagement and experimentation with a range of media, materials, and techniques, including new media where appropriate; experience in working in relevant frameworks and exploration of manipulative skills necessary to form, compose, and communicate in two and/or three dimensions; knowledge of a working vocabulary relevant to the subject and an interest in, and a critical awareness of, other practitioners, environments, and cultures; investigative, analytical, experimental, interpretive, practical, technical, and expressive skills that aid effective and independent learning. In this area, students are expected to demonstrate skills in either a representational or descriptive manner, or they may be more imaginative and interpretive. In any case, work will evolve through investigation and development by the candidate. Responses may be based upon a directly observed starting point or subject, or they may be the candidate's personal response to a theme. Students should learn to use a sketchbook to make visual and/or other appropriate researches and develop their ideas. They should also show knowledge of Art and Design from other cultures or history and relate it to their own studies. Included in this area are painting and drawing, graphic media, printmaking, and other related forms.

AZ05188 - Cambridge IGCSE Art and Design Printmaking

Description:	The IGCSE Art and Design Printmaking course encourages personal expression, imagination, sensitivity, conceptual thinking, powers of observation, an analytical ability, and practical attitudes. It should lead to greater understanding of the role of the visual arts in the history of civilizations and widen cultural horizons and enrich the individual. In addition, it should combine a breadth and depth of study so that it may accommodate a wide range of abilities and individual resources. It encourages students to develop: an ability to record from direct observation and personal experience; an ability to identify and solve problems in visual and/or other forms; creativity, visual awareness, critical and cultural understanding; an imaginative, creative, and personal response; confidence, enthusiasm, and a sense of achievement in the practice of Art and Design; growing independence in the refinement and development of ideas and personal outcomes; engagement and experimentation with a range of media, materials, and techniques, including new media where appropriate; experience in working in relevant frameworks and exploration of manipulative skills necessary to form, compose, and communicate in two and/or three dimensions; knowledge of a working vocabulary relevant to the subject and an interest in, and a critical awareness of, other practitioners, environments, and cultures; investigative, analytical, experimental, interpretive, practical, technical, and expressive skills that aid effective and independent learning. This includes all aspects of printmaking that relate to image making rather than specific design for industrial processes such as repeat fabric design. Ideas and development will need to evolve through investigation, development, and experience gained from direct observation or be a personal response to a theme. Students should explore a variety of printmaking techniques and produce either a series of related images or one-off prints using methods such as monoprinting, relief printing such as lino and/or wood cut, etching, or screen printing.

AZ05189 - Cambridge IGCSE Art and Design Three Dimensional Studies						
Description:	The IGCSE Art and Design Three Dimensional Studies course encourages personal expression, imagination, sensitivity, conceptual thinking, powers of observation, an analytical ability, and practical attitudes. It should lead to greater understanding of the role of the visual arts in the history of civilizations and widen cultural horizons and enrich the individual. In addition, it should combine a breadth and depth of study so that it may accommodate a wide range of abilities and individual resources. It encourages students to develop: an ability to record from direct observation and personal experience; an ability to identify and solve problems in visual and/or other forms; creativity, visual awareness, critical and cultural understanding; an imaginative, creative, and personal response; confidence, enthusiasm, and a sense of achievement in the practice of Art and Design; growing independence in the refinement and development of ideas and personal outcomes; engagement and experimentation with a range of media, materials, and techniques, including new media where appropriate; experience in working in relevant frameworks and exploration of manipulative skills necessary to form, compose, and communicate in two and/or three dimensions; knowledge of a working vocabulary relevant to the subject and an interest in, and a critical awareness of, other practitioners, environments, and cultures; investigative, analytical, experimental, interpretive, practical, technical, and expressive skills that aid effective and independent learning. Students should create visual and/or other meaning through three-dimensional art by expressing functional and/or decorative responses. In sculpture, the work may be figurative or abstract; students can employ techniques of carving, modeling, or construction. There should be some awareness of the roles sculpture has played in various societies. Included in this area are sculpture, ceramics, theater design, environmental/architectural design, product design, and jewelry.

AZ05191 - Cambridge IGCSE Art and Design Graphic Communication

Description: The IGCSE Art and Design Graphic Communication course encourages personal expression, imagination, sensitivity, conceptual thinking, powers of observation, an analytical ability, and practical attitudes. It should lead to greater understanding of the role of the visual arts in the history of civilizations and widen cultural horizons and enrich the individual. In addition, it should combine a breadth and depth of study so that it may accommodate a wide range of abilities and individual resources. It encourages students to develop: an ability to record from direct observation and personal experience; an ability to identify and solve problems in visual and/or other forms; creativity, visual awareness, critical and cultural understanding; an imaginative, creative, and personal response; confidence, enthusiasm, and a sense of achievement in the practice of Art and Design; growing independence in the refinement and development of ideas and personal outcomes; engagement and experimentation with a range of media, materials, and techniques, including new media where appropriate; experience in working in relevant frameworks and exploration of manipulative skills necessary to form, compose, and communicate in two and/or three dimensions; knowledge of a working vocabulary relevant to the subject and an interest in, and a critical awareness of, other practitioners, environments, and cultures; investigative, analytical, experimental, interpretive, practical, technical, and expressive skills that aid effective and independent learning. Students should learn to use appropriate methods, materials, and techniques as well as presentational skills. All imagery should be the candidate's original work, although manipulation of secondary sources through various software packages and digital processes is acceptable, as long as it only represents a proportion of the overall work. Supporting portfolios should show ideas, themes, and sources used. Technical processes, including computer-generated imagery and personal digital media, should be clearly documented. The development of printmaking processes should be included, as should knowledge of both historical and contemporary graphics. Students should demonstrate the communication of visual meaning through images while being aware of problems and opportunities, as well as working toward appropriate solutions. They should analyze design briefs and tackle practical design tasks. They should study other examples of design, or the work of designers relative to their chosen field, preferably including some at first hand, and relate this experience to their own endeavors. Included in this area are graphic design with lettering, illustration, printmaking, and advertising.

AZ05192 - Cambridge IGCSE Art and Design Textile Design

Description:		The IGCSE Art and Design Textile Design course encourages personal expression, imagination, sensitivity, conceptual thinking, powers of observation, an analytical ability, and practical attitudes. It should lead to greater understanding of the role of the visual arts in the history of civilizations and widen cultural horizons and enrich the individual. In addition, it should combine a breadth and depth of study so that it may accommodate a wide range of abilities and individual resources. It encourages students to develop: an ability to record from direct observation and personal experience; an ability to identify and solve problems in visual and/or other forms; creativity, visual awareness, critical and cultural understanding; an imaginative, creative, and personal response; confidence, enthusiasm, and a sense of achievement in the practice of Art and Design; growing independence in the refinement and development of ideas and personal outcomes; engagement and experimentation with a range of media, materials, and techniques, including new media where appropriate; experience in working in relevant frameworks and exploration of manipulative skills necessary to form, compose, and communicate in two and/or three dimensions; knowledge of a working vocabulary relevant to the subject and an interest in, and a critical awareness of, other practitioners, environments, and cultures; investigative, analytical, experimental, interpretive, practical, technical, and expressive skills that aid effective and independent learning. Students should demonstrate an expressive, decorative, or functional response through the use of fabrics, dyes, and fibers. Within this area, students should be encouraged to explore a range of techniques, where available, such as traditional or new media or a combination of both. Students should develop their own designs and realize their finished work to a high standard. They may produce work in one area but should show knowledge of other areas. They need not produce garments, but function and suitability of design should be considered. Supporting portfolios may contain sketches, designs, samples, and photographs. There should be an awareness of culture and historical factors appropriate to their chosen area. Within this area, students may produce work in any of the following specialties: printed and/or dyed, constructed, or fashion.

AZ05195 - Interior Design

Description:	Interior Design courses emphasize applying the elements of art and principles of design and provide study of their application in interior design problems. Interior Design courses focus on technical aspects of the design process, including building codes, legal building restrictions, building lot requirements, sustainable materials and construction. These courses help students analyze and use a variety of materials, techniques, and processes in their interior design work. Courses may also include a study of the history of interior design, aesthetic issues, roles and functions, and instruction in the critique process.

AZ06114 - Cambridge IGCSE Spanish Language I

Description:	IGCSE Spanish Language I covers the first portion of the International General Certificate of Secondary Education (IGCSE) syllabus written and administered by the University of Cambridge's International Examinations Program. The purpose of this course is to enable students to acquire proficiency in Spanish through a linguistic, communicative and cultural approach to language learning. Emphasis is placed on the development of listening, speaking, reading and writing skills and on the acquisition of the fundamentals of applied grammar. The content and focus should include, but not be limited to, the following: develop the ability to use the language effectively for purposes of practical communication within the country of residence, where appropriate, and in all the countries where the language is spoken; form a sound base of the skills, language and attitudes required for further study, work and leisure; offer insights into the culture and civilization of the countries where the language is spoken; encourage fuller integration into the community, where relevant; encourage positive attitudes toward foreign language learning and towards speakers of foreign languages and a sympathetic approach to other cultures and civilizations; provide enjoyment and intellectual stimulation; and complement other areas of study by encouraging skills of a more general application (e.g. analysis, memorizing, drawing of inferences).

5 - Cambridge IGCSE Spanish Language III					
Description:	IGCSE Spanish Language III covers the last portion of the International General Certificate of Secondary Education (IGCSE) syllabus written and administered by the University of Cambridge's International Examinations Program. The purpose of this course is to enable students to acquire a higher proficiency in Spanish through a linguistic, communicative and cultural approach to language learning. Emphasis is placed on the development of listening, speaking, reading and writing skills and on the acquisition of the fundamentals of applied grammar. The content and focus should include, but not be limited to, the following: develop the ability to use the language effectively for purposes of practical communication within the country of residence, where appropriate, and in all the countries where the language is spoken; form a sound base of the skills, language and attitudes required for further study, work and leisure; offer insights into the culture and civilization of the countries where the language is spoken; encourage fuller integration into the community, where relevant; encourage positive attitudes toward foreign language learning and towards speakers of foreign languages and a sympathetic approach to other cultures and civilizations; provide enjoyment and intellectual stimulation; complement other areas of study by encouraging skills of a more general application (e.g. analysis, memorizing, drawing of inferences); communicate accurately, appropriately and effectively in speech and writing in present, past, future at an advanced intermediate level and with more advanced tenses at a novice level; understand and respond imaginatively at an advanced intermediate level of proficiency to what they hear, read and experience in a variety of media; enjoy the reading of literature and appreciate its contribution to aesthetic and imaginative growth; and explore areas of universal human concern, thus leading to a greater understanding of themselves and others.

AZ06117 - Cambridge AS Level Spanish Language

Description:	The purpose of this course is to develop students' ability to understand and communicate confidently and clearly in speech and written language. Students will be encouraged to read widely, to use relevant vocabulary, employ correct grammar, spelling and punctuation. The students will develop the ability to analyze, synthesize, make inferences, and organize arguments and ideas logically. The content should include but not be limited to, the following: prepare sustained speeches and presentations on a specific topic; express opinions, ideas, and feelings in a conversation; read and respond to a variety of literature; listen and respond to native Spanish, to many different kinds of broadcasts and recordings; and write at a variety of levels and for a variety of audiences.

AZ06118 - Cambridge AS Level Spanish First Language

Description:	Designed for students for whom Spanish is their mother tongue, First Language Spanish develops skills already established at IGCSE level, in order to further develop clear, accurate and effective communication in both speech and writing. Students learn how to employ a wide-ranging vocabulary, use correct grammar, spelling and punctuation, and develop a personal style and an awareness of the audience being addressed. Students are also encouraged to read widely, both for their own enjoyment and to further their awareness of the ways in which Spanish can be used. AS Level First Language Spanish also develops more general analysis and communication skills such as synthesis, inference, and the ability to order facts and present opinions effectively.

AZ06140 - A Level French

Description:	The purpose of this course is to develop students' ability to understand and communicate confidently and clearly in spoken and written French. Students will be encouraged to read widely, use relevant vocabulary, and employ correct grammar, spelling, and punctuation in French. The students will develop the ability to analyze, synthesize, and make inferences about literary texts in French. Students will be asked to respond to readings by organizing arguments and ideas logically in French.

Subject Area:	24 - Foreign Language and Literature				
Course:	24210 - Portuguese Literature				
Description:	Portuguese Literature courses prepare students to communicate authentically in Portuguese by interpreting (reading, listening, viewing), exchanging (speaking and listening; reading and writing), and presenting (speaking, writing) information, opinions, and ideas drawn from literature written in Portuguese. Emphasis is typically placed on critical and analytical reading and writing, understanding the integration of Portuguese cultures into literature, and exploring interdisciplinary connections.

AZ06178 - Cambridge AS Level Portuguese

Description:	A Level Portuguese builds on the language skills gained at IGCSE, O Level or AS Level, and is the ideal foundation for university-level study, or to improve career prospects. Students will learn how to use the language in a variety of situations. They will be expected to handle texts and other source materials, extracting information in order to respond to specific tasks. Through their studies, students can expect to achieve greater fluency, accuracy and confidence in the language.

AZ06179 - Cambridge AS Level Portuguese Literature

Description:	Students following the AS Portuguese syllabus will study a series of examples from Portuguese literature. The aim is to better understand these texts, and the issues raised by the authors, and to develop the skills to communicate this understanding in a clear and focused way. Students will study a variety of texts, including novels, poems and plays, looking both at the way the authors have conveyed their ideas, and discussing the wider issues that each text raises.

AZ06182 - Romance/Italic Language II

Description:	Romance/Italic Language II courses build upon skills developed in Romance/Italic Language I, extending students' ability to understand and express themselves in a Romance/Italic language not otherwise described (e.g., Catalan, Sardinian, or Haitian Creole) and increasing their vocabulary. Typically, students learn how to engage in discourse for informative or social purposes, write expressions or passages that show understanding of sentence construction and the rules of grammar, and comprehend the language when spoken slowly. Students usually explore the customs, history, and art forms of appropriate people to deepen their understanding of the culture(s).

Description:	German for Native Speakers courses prepare native and heritage speakers to communicate in German in all modes. These courses reinforce and expand students' skills to interpret (read, listen, view) and present (speak, write) information at the same level as they exchange (speak and listen; read and write) information, concepts, and ideas on a variety of topics. German for Native Speakers courses advance students' understanding of the relationships among the products, practices, and perspectives of the cultures included in the German-speaking world.

AZ06207 - German Field Experience

Description:	German Field Experience courses place students in environments in which they interact with native German speakers, typically in settings where German is the main language spoken. These courses enable students to strengthen their skills in exchanging (speaking/listening and writing/reading), interpreting (reading, listening, and viewing), and presenting information and their ability to interact in culturally appropriate ways.

AZ06213 - Cambridge IGCSE German I

Description:	The purpose of this first course in IGCSE German is to enable students to develop the ability to use the language effectively for purposes of practical communication within the country of residence, where appropriate, and in all countries where German is spoken. Students will form a sound base of the skills, language, and attitudes required for further study, work, and leisure. Students in this course will develop insights into the culture and civilization of German-speaking countries. The emphasis of this course is on the development of listening, speaking, reading, and writing skills in German and on the acquisition of the fundamentals of applied grammar.

Subject Area:	06 - Foreign Language and Literature		
Course:	06261 - Celtic Language I		
Description:	--This course was archived at the National level -- Designed to introduce students to a Celtic language (e.g., Gaelic or Welsh) and culture, Celtic Language I courses emphasize basic grammar and syntax, simple vocabulary, and the spoken accent so that students can read, write, speak, and understand the language at a basic level within predictable areas of need, using customary courtesies and conventions. Celtic culture is introduced through the art, literature, customs, and history of Celtic people.

AZ06262 - Celtic Language II

Description:	Celtic Language II courses build upon skills developed in Celtic Language I, extending students' ability to understand and express themselves in a Celtic language (e.g., Gaelic or Welsh) and increasing their vocabulary. Typically, students learn how to engage in discourse for informative or social purposes, write expressions or passages that show understanding of sentence construction and the rules of grammar, and comprehend the language when spoken slowly. Students usually explore the customs, history, and art forms of Celtic people to deepen their understanding of the culture(s).

AZ06266 - Celtic Language for Native Speakers

Description:	Celtic Language for Native Speakers courses support, reinforce, and expand students' knowledge of their own tongue. Because students understand at least the rudiments and structure of the language and have a working vocabulary (to a greater or lesser degree), Celtic Language for Native Speakers courses often move faster than do regular Celtic Language courses and emphasize literary development (with a study of literature and composition). These courses may also include the culture or history of the people and introduce translation skills.

AZ06413 - Cambridge IGCSE Chinese Language I

Description:	IGCSE Chinese Language I covers the first portion of the International General Certificate of Secondary Education (IGCSE) syllabus written and administered by the University of Cambridge's International Examinations Program. The purpose of this course is to enable students to acquire proficiency in Spanish through a linguistic, communicative and cultural approach to language learning. Emphasis is placed on the development of listening, speaking, reading and writing skills and on the acquisition of the fundamentals of applied grammar. The content and focus should include, but not be limited to, the following: develop the ability to use the language effectively for purposes of practical communication within the country of residence, where appropriate, and in all the countries where the language is spoken; form a sound base of the skills, language and attitudes required for further study, work and leisure; offer insights into the culture and civilization of the countries where the language is spoken; encourage fuller integration into the community, where relevant; encourage positive attitudes toward foreign language learning and towards speakers of foreign languages and a sympathetic approach to other cultures and civilizations; provide enjoyment and intellectual stimulation; and complement other areas of study by encouraging skills of a more general application (e.g. analysis, memorizing, drawing of inferences).

AZ06414 - Cambridge IGCSE Chinese Language II

Description:	IGCSE Chinese Language II covers the second portion of the International General Certificate of Secondary Education (IGCSE) syllabus written and administered by the University of Cambridge's International Examinations Program. The purpose of this course is to enable students to acquire a higher proficiency in Spanish through a linguistic, communicative and cultural approach to language learning. Emphasis is placed on the development of listening, speaking, reading and writing skills and on the acquisition of the fundamentals of applied grammar. The content and focus should include, but not be limited to, the following: develop the ability to use the language effectively for purposes of practical communication within the country of residence, where appropriate, and in all the countries where the language is spoken; form a sound base of the skills, language and attitudes required for further study, work and leisure; offer insights into the culture and civilization of the countries where the language is spoken; encourage fuller integration into the community, where relevant; encourage positive attitudes toward foreign language learning and towards speakers of foreign languages and a sympathetic approach to other cultures and civilizations; provide enjoyment and intellectual stimulation; complement other areas of study by encouraging skills of a more general application (e.g. analysis, memorizing, drawing of inferences); communicate accurately, appropriately and effectively in speech and writing in past, present, and future at a novice-high to intermediate-low level; and understand and respond imaginatively at a novice-high to intermediate-low level to what they hear, read and experience in a variety of media.

AZ06446 - Korean for Native Speakers

Description:	Korean for Native Speakers courses prepare native and heritage speakers to communicate in Korean in all modes. These courses reinforce and expand students' skills to interpret (read, listen, view) and present (speak, write) information at the same level as they exchange (speak and listen; read and write) information, concepts, and ideas on a variety of topics. Korean for Native Speakers courses advance students' understanding of the relationships among the products, practices, and perspectives of the cultures included in the Korean-speaking world.

AZ06586 - Southeast Asian Language for Native Speakers

Description:	Southeast Asian Language for Native Speakers courses support, reinforce, and expand students' knowledge of their own tongue not otherwise described (e.g., Malay, Thai, and Lao). Because students understand at least the rudiments and structure of the language and have a working vocabulary (to a greater or lesser degree), Southeast Asian Language for Native Speakers courses often move faster than do regular Southeast Asian Language courses and emphasize literary development (with a study of literature and composition). These courses may also include the culture or history of the people and introduce translation skills.

AZ06646 - Balto-Slavic Language for Native Speakers

Description:	Balto-Slavic Language for Native Speakers courses support, reinforce, and expand students' knowledge of their own tongue not otherwise described (e.g., Polish, Armenian, Serbo-Croatian, and Lithuanian). Because students understand at least the rudiments and structure of the language and have a working vocabulary (to a greater or lesser degree), Balto-Slavic Language for Native Speakers courses often move faster than do regular Balto-Slavic Language courses and emphasize literary development (with a study of literature and composition). These courses may also include the culture or history of the people and introduce translation skills.

AZ06682 - Iranian/Persian Language II

Description:	Iranian/Persian Language II courses build upon skills developed in Iranian/Persian Language I, extending students' ability to understand and express themselves in a Iranian/Persian language (e.g., Persian, Kurdish, and Pashto) and increasing their vocabulary. Typically, students learn how to engage in discourse for informative or social purposes, write expressions or passages that show understanding of sentence construction and the rules of grammar, and comprehend the language when spoken slowly. Students usually explore the customs, history, and art forms of appropriate people to deepen their understanding of the culture(s).

AZ06686 - Iranian/Persian Language for Native Speakers

Description:	Iranian/Persian Language for Native Speakers courses support, reinforce, and expand students' knowledge of their own tongue (e.g., Persian, Kurdish, and Pashto). Because students understand at least the rudiments and structure of the language and have a working vocabulary (to a greater or lesser degree), Iranian/Persian Language for Native Speakers courses often move faster than do regular Iranian/Persian Language courses and emphasize literary development (with a study of literature and composition). These courses may also include the culture or history of the people and introduce translation skills.

AZ06742 - Cambridge IGCSE Arabic I

Description:	The purpose of this first course in IGCSE Arabic is to enable students to develop the ability to use the language effectively for purposes of practical communication within the country of residence, where appropriate, and in all countries where Arabic is spoken. Students will form a sound base of the skills, language, and attitudes required for further study, work, and leisure. Students in this course will develop insights into the culture and civilization of Arabic-speaking countries. By the end of this course, students will be able to understand and respond to spoken and written Arabic and communicate in speech and writing, showing knowledge of a range and variety of vocabulary, as well as apply the grammar and structures of the Arabic language accurately. The emphasis of this course is on the development of listening, speaking, reading, and writing skills in Arabic and on the acquisition of the fundamentals of applied grammar.

Course:	24807 - Swahili for Native Speakers					
Description:	Swahili for Native Speakers courses prepare native and heritage speakers to communicate in Swahili in all modes. These courses reinforce and expand students' skills to interpret (read, listen, view) and present (speak, write) information at the same level as they exchange (speak and listen; read and write) information, concepts, and ideas on a variety of topics. Swahili for Native Speakers courses advance students' understanding of the relationships among the products, practices, and perspectives of the cultures included in the Swahili-speaking world.					
AP:	False	IB:	False			
Elementary Mapping:	False	Secondary Mapping:	True	Other Mapping:		
7 - Swahili Field Experience						
Description:	Swahili Field Experience courses place students in environments in which they interact with native Swahili speakers, typically in settings where Swahili is the main language spoken. These courses enable students to strengthen their skills in exchanging (speaking/listening and writing/reading), interpreting (reading, listening, and viewing), and presenting information and their ability to interact in culturally appropriate ways.

AZ06842 - Indic Language II

Description:	Indic Language II courses build upon skills developed in Indic Language I, extending students' ability to understand and express themselves in an Indic language (e.g., Hindi, Urdu, Panjabi, and Romany) and increasing their vocabulary. Typically, students learn how to engage in discourse for informative or social purposes, write expressions or passages that show understanding of sentence construction and the rules of grammar, and comprehend the language when spoken slowly. Students usually explore the customs, history, and art forms of appropriate people to deepen their understanding of the culture(s).

AZ06857 - Cambridge AS Level Urdu

Description:	A Level Urdu builds on the language skills gained at IGCSE, O Level or AS Level, and is the ideal foundation for university-level study, or to improve career prospects. Students will learn how to use the language in a variety of situations. They will be expected to handle texts and other source materials, extracting information in order to respond to specific tasks. Through their studies, students can expect to achieve greater fluency, accuracy and confidence in the language. Students will also learn how to translate material from English into the language.

AZ06862 - Malayo-Polynesian Language II

Description:	Malayo-Polynesian Language II courses build upon skills developed in Malayo-Polynesian Language I, extending students' ability to understand and express themselves in a Malayo-Polynesian language (e.g., Malay, Indonesian, Hawaiian, and Samoan) and increasing their vocabulary. Typically, students learn how to engage in discourse for informative or social purposes, write expressions or passages that show understanding of sentence construction and the rules of grammar, and comprehend the language when spoken slowly. Students usually explore the customs, history, and art forms of appropriate people to deepen their understanding of the culture(s).

AZ07031 - Cambridge AS Level Divinity			
Description:	The Divinity syllabus covers three core areas. In the first, The Prophets of the Old Testament, students gain an understanding of the way the prophets maintained the religious faith of Ancient Israel, while also studying a significant part of the Jewish and Christian Bibles. Students consider pre-canonical prophets, pre-exilic prophets, and study and comment on specific passages. They also study The Four Gospels, in order to gain a scholarly understanding of the life and teaching of Jesus. Finally, in studying The Apostolic Age, students learn about the history and development of the early Christian Church, as well as studying the authorship, composition and purpose of the Acts and Epistles detailed in the syllabus.

AZ09053 - Army Junior ROTC III

Description:	Army Junior Reserve Officer Training Corps (ROTC) III courses build upon prior Army Junior ROTC courses, giving more emphasis to leadership development. These courses serve to strengthen students' leadership skills (including planning, problem-solving, motivation, and performance appraisal) and management skills (with regard to time, personnel, and other resources) through allowing them to assume leadership duties. Students study topics introduced in earlier years—such as military history, map-reading and orienteering, marksmanship, and drill and ceremonies—at a more advanced level and are also provided with military service opportunities.

AZ10021 - Cambridge IGCSE Computer Studies

Description:	This course prepares students to demonstrate an appreciation of the range and power of computer applications; foster an interest in, enjoyment of, and confidence in the use of computing; develop the ability to solve problems using computing techniques; develop an awareness of the place of computing in society and issues computing raises in society; gain a firm understanding of the basic techniques and knowledge required for computing applications; and develop a desire to use computers within other interests. Students will explore the range and scope of information processing applications; the effects of the use of computers, both practical and social; the range of equipment, tools and techniques used to solve problems; the functions of the main hardware and software components of information-processing systems, and appropriate terminology. Students will be able to identify problems within the field of information processing; analyze problems by considering relevant functional, practical, human and economic factors; draw up specifications for the computer-based solutions of problems; select from a range of resources those which are most suitable for solving problems; develop solutions using appropriate methods; implement solutions using equipment, tools and techniques sensibly; test, evaluate and refine solutions systematically; and document solutions to problems. Students will recognize and present information in a variety of forms and communicate in appropriate ways information about applications of computers, problems and their solutions.

AZ10031 - Cambridge AS Level Applied Information and Technology

Description:	Students following this syllabus will develop, and learn to apply, a broad range of ICT skills, while also gaining an understanding of the way ICT is used in the world of work. The syllabus introduces students to the structure and use of ICT systems within a wide range of organizations, including the use of a variety of computer networks. As a result, students learn about ICT system life cycles, and how these affect the workplace. They also gain an understanding of the wider impact of ICT on society in general.

SCED Course Mapping:

Subject Area:	10 - Computer and Information Sciences				
Course:	10109 - Essentials of Network Operating Systems				
Description:	Essentials of Network Operating Systems courses provide a study of multi-user, multi-tasking network operating systems. In these courses, students learn the characteristics of the Linux, Windows 2000, NT, and XP network operating systems and explore a variety of topics including installation procedures, security issues, back-up procedures, and remote access.

AZ10110 - Microsoft Certified Professional (MCP)

Description:	Microsoft Certified Professional courses provide students with the knowledge and skills necessary to be employed as a network administrator in the latest Windows server-networking environment. Topics include installing, configuring, and trouble-shooting the Windows server. These courses prepare students to set up network connections; manage security issues and shares; and develop policies. Students are typically encouraged to take the MCP exam.

AZ10181 - Cambridge AS Level Computing

Description:	The aim of the A and AS Level Computing syllabus is to develop an understanding of how computers are used to solve a wide range of problems. Students learn about a variety of different computers, and also look at the ways in which computers are organized in terms of software, data, hardware, communications and people. Students develop the skills necessary to apply their understanding to the development of computer-based solutions. As they progress, students learn about the main principles of systems analysis and design, looking at different methods of problem formulation, and the planning of solutions. They also consider systematic methods of solution implementation, testing and documentation.

AZ10203 - Communications Media Technologies Fundamentals

Description:	CTE CIP Code: 10.0200.10 The focus of the course will be in line with the specific industry(ies) that are available and relevant to the student's future plans for post-secondary and/or business & Industry. Instruction will include: Analyzing the media industry, business practices and its role in the economy; investigating the Intellectual Property Law and Rights Management; demonstrating verbal and nonverbal communication skills required by the media industry; demonstrating written communication skills within the media industry, utilizing computer applications to manage media and applying knowledge of data capture and manipulation.

AZ10231 - Cambridge AS Level Computing

Description:	This syllabus encourages students to be innovative and creative and to develop their ability to design high quality products. Through their studies, students will develop an awareness of the significance of design and technology on society, whilst also learning more about production processes and industrial practices. Students will be encouraged the use ICT to build their design and technological abilities, and develop critical evaluation skills which they can employ in a variety of technical, aesthetic, economic, environmental, social and cultural contexts. As a result, students will also become discerning consumers of design and technology, able to make informed choices.

Description:	Audio/Visual Production courses provide students with the knowledge and skills necessary for television, video, film, and/or radio production. Writing scripts, camera operation, use of graphics and other visuals, lighting, audio techniques, editing, production principles, and career opportunities are typical topics covered within production courses. Students are usually required to produce their own program or segment. Additional topics such as broadcast industry regulations, radio/TV operation, power of the medium, photography, transmission technology, and so on may be included.

Subject Area:	13 - Manufacturing								
Course:	13202 - Metalworking								
Description:	Metalworking courses introduce students to the qualities and applications of various metals and the tools used to manipulate and form metal into products. Through one or more projects involving metals, students develop planning, layout, and measurement skills; gain experience in cutting, bending, forging, casting, and/or welding metal; complete projects according to blueprints or other specifications; and may also learn to polish and finish metals. Correct use of metalworking tools and equipment is stressed.								
AP:	False			IB:	False				
Elementary Mapping:	False			Secondary Mapping:	True		Other Mapping:		

AZ13203 - Precision Machining

Description:	CTE CIP Code: 48.0500.30 In this course students develop a clear understanding of mechanical systems including engines, pumps, medical devices; as well as the need for highly accurate parts via modern CAD-CAM systems to produce 3-D developed components. Students will learn how tighter tolerances require ultrahigh precision machining to be competitive in the aerospace industry. Students will have the opportunity to earn an industry recognized certificate verifying the student's practice of machine geometry, motion control and machining strategy.

AZ13231 - Automation/Robotics

Description:	CTE CIP Code: 48.0500.20 Students in this course will learn how automation reduces the need for human labor. Students will understand the math, science and technology of robots, their design, and application in industrial automation for manufacturing. Students will learn control systems, robotics and computer applications and how they are used to control machinery in industry. Students will gain a working knowledge of electronics, programming, mechanics, pneumatics and applicable software through technical skills in support of technicians and other personnel engaged with robotics.

AZ16081 - Cambridge AS Level Food Studies

Description:	Students following the A and AS Level Food Studies syllabus study both the theoretical and practical aspects of nutrition, food, and food preparation. They develop their knowledge and understanding of the composition of foods, digestion, and of the food manufacturing and service industries. Students also improve their practical skills, learning how to produce a variety of healthy meals designed to meet different nutritional requirements. As a result of their studies, students also develop an analytical and critical approach to decision-making and problem-solving.

AZ17006 - Woodworking

Description:	Woodworking courses introduce students to the various kinds of woods used in industry and offer experience in using selected woodworking tools. Students design and construct one or more projects and may prepare a bill of materials. Correct and safe use of tools and equipment is emphasized. As students advance, they focus on learning the terminology necessary to use power tools successfully, developing skills to safely use these tools in the workshop and becoming familiar with various kinds of wood-finishing materials. Advanced students typically design a project, prepare bills of materials, construct, and finish proposed projects.

AZ17018 - Building Maintenance II

Description:	CTE CIP Code: 46.0401.20 Building Maintenance courses train students to maintain commercial, industrial, and residential buildings and homes. Instruction is provided in the basic maintenance and repair of air conditioning, heating, plumbing, electrical, and other mechanical systems. Topics covered may include identifying and using hand and power tools safely; installing and repairing floor coverings, walls, and ceilings; installing and repairing doors, windows, screens, and cabinets; applying finishes to prepared surfaces; and repairing roofs, masonry, plumbing, and electrical systems.

AZ17020 - AutoCAD 1-Drafting 1						
	Description:	CTE CIP Code: 15.1302.10 The course provides an understanding of basic drafting fundamentals, drafting standards/conventions and the methods of graphic preparation, principles of drafting and design using Computer Aided Drafting (CAD), and the role that graphic language plays in the conception/analysis for the communication of ideas for industry. This course introduces a beginning level of AutoCAD features.

AZ17054 - Heating, Ventilation and Air Conditioning I

Description:	CTE CIP Code: 47.0200.10 This course will prepare students to use a wide variety of tools and equipment and maintain a safe work environment. The student will develop an understanding of construction math, financial operations, reading blueprints, basic rigging and basic layout techniques. The student will develop skills in oral and written communication as they relate to the industry. This course is designed to help students develop an enhanced understanding of teamwork, employability skills and career opportunities in the field.

SCED Course Mapping:

Subject Area:	17 - Architecture and Construction		
Course:	17101 - Exploration of Electricity/Electronics		

Description:	Exploration of Electricity/Electronics courses offer instruction in the theory of electricity and in the terminology, skills, and safety procedures common to careers involving electricity and electronics. Topics include (but are not limited to) Ohm's law, electrical equipment, wire systems, and so on; career exploration is often (but not always) an integral part of these courses.				
AP:	False	IB:	False		
Elementary Mapping:	False	Secondary Mapping:	True	Other Mapping:	

AZ17102 - Electrical Fundamentals

Description:	CTE CIP Code: 46.0300.10 This foundation course will prepare students to use a wide variety of tools and equipment and maintain a safe work environment. The student will develop an understanding of construction math, reading blueprints, install, operate, repair electric apparatus and systems such as residential, commercial and industrial electric power wiring; DC and AC motors controls, electrical distribution panels, and techniques. The student will develop skills in oral and written communication as they relate to the electrical industry. This course is designed to help students develop an enhanced understanding of teamwork, employability skills and career opportunities in the electrical field.

SCED Course Mapping:					
Subject Area:	17 - Architecture and Construction				
Course:	17102 - Electricity—Comprehensive				
Description:	Electricity—Comprehensive courses provide a survey of the theory, terminology, equipment, and practical experience in the skills needed for careers in the electrical field. These courses typically include AC and DC circuitry, safety, and the National Electrical Code and may cover such skills as those involved in building circuits; wiring residential, commercial, and/or industrial buildings; installing lighting, power circuits, and cables; and estimating job costs. As students progress, their projects become more complex and expansive. In these courses, safety is stressed, and a career exploration component may be offered.				
AP:	False	IB:	False		
Elementary Mapping:	False	Secondary Mapping:	True	Other Mapping:	

AZ17103 - Residential Electrician

Description:	CTE CIP Code: 46.0300.20 This course prepares the individual to apply and demonstrate advanced technical knowledge and skills to install, operate, maintain and repair electrical apparatus and systems such as residential electric power wiring; AC and DC motors, controls and electrical distribution panels. Includes instruction in principles of electronics and electrical systems, wiring, power transmission, safety, job estimation, electrical testing and inspection and applicable codes and standards.

SCED Course Mapping:					

Subject Area:	17 - Architecture and Construction				
Course:	17103 - Residential Wiring				
Description:	Covering many of the same topics as Electricity—Comprehensive courses, Residential Wiring courses apply the knowledge and skills that students acquire to the electrical systems found in family dwellings. Because these courses emphasize residential electricity, topics may also include cable installation, telephone systems, and the installation of lighting fixtures, outlets, and so on. Maintenance and repair skills are often included as course topics.				
AP:	False	IB:	False		
Elementary Mapping:	False	Secondary Mapping:	True	Other Mapping:	

AZ17104 - Industrial Electrician

Description:	CTE CIP Code: 46.0300.30 This course prepares the individual to apply and demonstrate advanced technical knowledge and skills. This lab based course will provide the students an opportunity to participate in maintaining and repairing local, long distance and rural electric power cables and communication lines, erect and construct pole and tower lines; install underground lines and cables, which will include installation and repair, fiber-optic technology, trenching, mobile equipment and crane operation, high voltage installations, maintenance and inspection, safety, remote communications, and applicable codes and standards. The planning, design and completion of project based activities. This course prepares students for advanced technical knowledge and skills using a variety of techniques and equipment.

Subject Area:	18 - Agriculture, Food, and Natural Resources		
Course:	18051 - Plant Production/Science		
Description:	Plant Production/Science courses provide knowledge about the propagation of plants for food and fiber. These courses may cover such topics as soil science, irrigation, pest and weed control, food and fiber processing, and farm operations. They may also cover the knowledge and skills needed to produce all types of crops or may emphasize a particular area of the agricultural industry.

Subject Area:		18 - Agriculture, Food, and Natural Resources													
Course:		18052 - General Horticulture													
Description:		General Horticulture courses expose students to the art and science of growing plants, shrubs, trees, flowers, fruits, and vegetables. In doing so, they cover a wide variety of topics, including greenhouse and nursery operations, soils and media mixtures, fruit and vegetable production, turf/golf course management, interior and exterior landscaping, irrigation systems, weed and pest control, and floral design.													
AP:		False				IB:		False							
Elementary Mapping:		False				Secondary Mapping:		True				Other Mapping:			
- Ornamental Horticulture															
Description:		Similar to General Horticulture, Ornamental Horticulture courses provide information regarding the care and propagation of plants, flowers, trees, and shrubs, but place a special emphasis on those used for decorative and aesthetic purposes. Because of this particular emphasis, Ornamental Horticulture courses usually concentrate on nurseries and greenhouses and on the floristry industry.

AZ19051 - Child Care

Description:	Child Care courses provide students with knowledge about the physical, mental, emotional, and social growth and development of children from birth through childhood. Main topics include the fundamentals of working with infants, toddlers, and older children; providing healthy environments; evaluating child care settings; and the practices, regulations, and opportunities in the child care industry. Often, Child Care courses provide students with practical experience in a child care center. Advanced topics may include various learning theories; development of activities; operation of a child care center; recognition of childhood diseases, abuse, and neglect; and first aid/emergency training.

AZ20054 - Boat Operation

Description:	Boat Operation courses typically cover operation and maintenance of marine vehicles, marine navigation, and emergency procedures, as well as other skills necessary or useful for work or life at sea (e.g., loading and unloading or cooking). Specific topics may include docking and undocking a vessel, engine maintenance, commercial fishing, firefighting aboard ship, and CPR.

AZ20055 - Pilot Training

Description:	Pilot Training courses prepare students to become pilots by participating in flight training, ground school, and simulator instruction. Topics covered typically include preflight operations; flight maneuvering with reference to ground objects; flying at critically slow air speeds and recovering from stalls; takeoffs and landings; controlling and maneuvering an aircraft; cross country flying; night flying; and emergency operation. Other course content may include meteorology, aerodynamics, navigation, physiology, and airfield and flight environments.

AZ20120 - Motorsports Technology

Description:	Motorsports Technology courses provide students with an understanding of the principles of race car fabrication and all facets of the racing industry. Technical aspects of the courses may include skill development in vehicle assembly of high-performance engines and components using specialty tools, welding, and auto body procedures. Course content may also explore the motorsports technology industry, address safety issues, and identify careers in the field.

AZ20121 - General Service Technician II

Description:	CTE CIP Code: 47.0600.65 This course prepares the individual to apply higher levels of technical knowledge and skills to maintain, diagnose and repair automobiles and light trucks. Students will gain in-depth knowledge needed to troubleshoot and identify malfunctioning components and sensors; and correct these problems in the areas of: suspension and steering, brakes, electrical/electronic systems, heating and air conditioning, and engine performance.

AZ21003 - Advanced Engineering Sciences

Description:	CTE CIP Code: 15.0000.30 Advanced Engineering Sciences prepares students to use critical thinking skills and apply formulations from pre-calculus to basic innovative engineering job functions of research, design, development, testing and analysis when preparing product. Students will apply concepts of math and science, and problem solving skills to the different systems using input, process, output and feedback. Students will further demonstrate the fundamentals of engineering and mechanics using scientific principles from materials to construct a project with consideration to environmental factors, economics and safety. This course is modeled to university criterion covering engineering theory through a hands-on approach.

Description:	Civil Engineering and Architecture courses provide students with an overview of the fields of Civil Engineering and Architecture while emphasizing the interrelationship of both fields. Students typically use software to address real world problems and to communicate the solutions that they develop. Course topics typically include the roles of civil engineers and architects, project-planning, site-planning, building design, project documentation, and presentation.

AZ21102 - Drafting and Design Technologies Fundamentals

Description:		CTE CIP Code: 15.1300.10 This course prepares students to apply technical knowledge and skills to plan and prepare scale interpretations of engineering, design and architectural projects. It includes instruction in creating layouts and designs, blueprints and renderings and in the use of computer-assisted design programs. In addition to knowledge of drafting technologies, students will have the opportunity to place special emphasis on more specific services and/or industries in which they have an interest.

SCED Course Mapping:

Subject Area:	21 - Engineering and Technology		
Course:	21102 - Drafting—General		
Description:	Drafting—General courses, usually offered as a sequence of courses, introduce students to the technical craft of drawing illustrations to represent and/or analyze design specifications and then refine the skills necessary for this craft. Drafting—General courses use exercises from a variety of applications to provide students with the knowledge and experience to develop the ability to perform freehand sketching, lettering, geometric construction, and multiview projections and to produce various types of drawings (working, detail, assembly, schematic, perspective, and so on). Computer-aided drafting (CAD) systems (if available) are typically introduced and used to fulfill course objectives.

AZ21103 - Architectural Drafting

Description:	CTE CIP Code: 15.1300.20 This course prepares students to apply technical knowledge and skills to develop working drawings and electronic simulations for architectural, civil and geological engineers. Instruction in basic construction, civil engineering principles, structural design, geological and seismographic mapping, machine and pipe drafting, architectural rendering, layout and designs, survey interpretation, blueprint interpretation, building materials and basic structural wiring diagramming.

Subject Area:	21 - Engineering and Technology				
Course:	21103 - Drafting—Architectural				
Description:	Drafting—Architectural courses introduce students to and help them refine the technical craft of drawing illustrations to represent and/or analyze design specifications, using examples drawn from architectural applications. These courses are intended to help students develop general drafting skills, but place a particular emphasis on interior and exterior residential (and light commercial) design, site orientation, floor plans, electrical plans, design sketches, and presentation drawings. In addition, students may prepare scale models.

AZ22001 - Standardized Test Preparation

Description:	Standardized Test Preparation courses help prepare students for national standardized tests such as the PSAT, SAT, and ACT. In particular, these courses assist students in developing and/or expanding their vocabulary, test-taking, and reasoning skills through study, lecture, and practice drills. Course topics may include vocabulary review; root words, prefixes, and suffixes; mathematical concepts, logic, and rules; and general problem-solving and test-taking strategies.

AZ22108 - IB Creativity, Action, Service					
Description:	Creativity, Action, and Service (CAS) courses are a required extracurricular component of the International Baccalaureate program. The CAS requirement emphasizes the importance of life outside of the world of scholarship, providing a refreshing counterbalance to feeling overwhelmed in a demanding academic program. Participation in theater productions, sports, and community service activities encourages young people to share their energies and special talents while developing awareness, concern, and the ability to work cooperatively with others. The goal of educating the whole person and fostering a more compassionate citizenry comes alive in an immediate way when students reach beyond themselves and their books.

AZ22131 - Cambridge AS Level Thinking Skills					
Description:	Thinking Skills develops a specific set of intellectual skills, independent of subject content, reflecting the need voiced by universities and employers for more mature and sophisticated ways of thinking. The Thinking Skills syllabus also enables students to approach their other subjects with an improved ability to understand, analyze and resolve problems. As a result, students will find the course of great benefit when preparing for higher education and for a wide range of careers, including law, scientific research, social science, journalism, medicine, business, accounting and engineering. The Thinking Skills syllabus encourages free and open debate, critical and investigative thinking, and informed and disciplined reasoning.

- Cambridge AS Level Global Perspectives								
Description:		Cambridge International AS Level Global Perspectives prepares learners for positive engagement with our rapidly changing world. Learners broaden their outlook through the critical analysis of - and reflection on - issues of global significance. The Cambridge International AS Level Global Perspectives syllabus is based on skills rather than on specific content. Learners develop research, thinking, reasoning and communication skills by following an approach to analyzing and evaluating arguments and perspectives called the Critical Path. The skills gained through study of Cambridge International AS Level Global Perspectives enable students to meet the demands of twenty first century learning and make a successful transition to study in higher education.

- Cambridge AS Level Global Perspectives & Research								
Description:		Universities tell us that Global Perspectives and Research (GPR) is an excellent preparation for undergraduate study as it gives real evidence of independent, critical thinking. GPR is taught as two successive one-year courses, with the Research Report growing seamlessly out of the skills introduced and developed as part of the Global Perspectives course. GPR is an excellent alternative to Critical Thinking, General Studies and the Extended Project, and is very attractive for schools looking for curriculum enrichment programs. It enthuses students by offering the opportunity for open debate and research on their own topic.

AZ51053 - Literature

Description:	Literature courses offer the opportunity for students to study and reflect upon the themes presented in the body of literature being presented. Students improve their critical-thinking skills as they determine the underlying assumptions and values within the reading selection and as they understand how the work reflects society's problems and culture. Oral discussion is an integral part of literature courses, and written compositions are often required. Literature courses may survey representative works, reflect a particular genre or a specific theme, or survey works of a particular time or people.

SCED Course Mapping:

Subject Area:	51 - English Language and Literature (prior-to-secondary)		
Course:	51008 - English as a Second Language		

Description:	English as a Second Language (ESL) courses are designed for English language acquisition, focusing on reading, writing, speaking, and listening skills. ESL courses usually begin with extensive listening and speaking practice, building on auditory and oral skills, and then move on to reading and writing. These courses provide a foundation of the basic structures of the English language, enabling students to progress from an elementary understanding of English words and verb tenses to a more comprehensive grasp of various formal and informal styles, to succeed in content classrooms, and to move into "regular" English courses. ESL courses may also include an orientation to the customs and culture of the diverse population in the United States.

AZ51075 - Montessori MS Language A

Description:	The language curriculum follows the reading and writing workshop model established by the Teachers College Reading and Writing Project of Columbia University. It encompasses an integrated study of vocabulary, literature, grammar and mechanics, and writing. The curriculum seeks to teach students to value reading and writing well, to self-initiate reading and writing in their own lives, and to see reading and writing as tools to change themselves and the world around them. Students read and write in a wide range of genres for a variety of authentic purposes and learn to communicate with a variety of audiences. Vocabulary and etymology is presented across the curriculum and is tested each cycle. Grammar is studied daily within the context of literature and writing. With special emphasis on critical analysis, students practice daily a variety of types of writing in response to literature.

0 - Montessori MS Speech A							
Description:		Speech includes a daily communications lab that focuses on grace and courtesy, listening skills, notetaking, active participation in group discussions by articulating ideas, and making formal presentations. Students learn a variety of communication skills such as acknowledging others, using “I” messages, active listening, goal setting, and group decision making. Students also participate in activities developed from Covey’s Seven Habits of Highly Effective Teens; Costa and Kallick’s Sixteen Habits of Mind and The Heroic Journey. Each year the class develops a mission statement or constitution. Students are able to practice communication skills daily by working in community meetings, class committees, small group cooperative projects, and peer and cross-age teaching activities. Students individually give presentations each cycle.

Description:	Mathematics (grade 4) courses typically emphasize number, operation, and quantitative reasoning; patterns, relationships, and algebraic thinking; geometry and spatial reasoning; and measurement. Course content may include activities that help students increase operational fluency, make connections between abstract symbols and concrete events or concepts, or present conclusions based on data. Specific content depends upon state standards for grade 4.				
AP:	False	IB:	False		
Elementary Mapping:	True	Secondary Mapping:	False	Other Mapping:	False

AZ52015 - 5th Grade Montessori Math

Description:	The students completing fifth grade level will have a clear understanding of all the basic four processes as applied to decimals, fractions and positive and negative numbers. Students refine their analytical and recording skills. Math is approached from both of the following methods; the Montessori instructional technique and the traditional classroom technique. Content covers number sense, measurement. Concepts are presented with concrete materials like checker board, decimal board, fraction material, division board, division tubes, bead chains, constructive triangles, binomial cube, trinomial cube, power of two, area triangles etc. for deeper understanding of concepts. Once the concepts are understood students move to abstract work and use traditional books to practice skills. Application skills are emphasized in all areas of study.

AZ52061 - Integrated Math—Multiyear Equivalent

Description:	Integrated Math courses emphasize the teaching of mathematics as problem solving, communication, and reasoning, and emphasize the connections among mathematical topics and between mathematics and other disciplines. The multiperiod sequence of Integrated Math replaces the traditional Algebra I–Geometry–Algebra II sequence of courses, and usually covers the following topics during a 3- or 4-year sequence: algebra, functions, geometry from both synthetic and algebraic perspectives, trigonometry, statistics and probability, discrete mathematics, the conceptual underpinnings of calculus, and mathematical structure.

AZ53055 - Montessori MS Life Sciences A

Description: The life science curriculum includes the study of Connections (Cells and Living Things), Exploration (Virus, Monera, Protista, and Fungi), Identity (Genetics), Systems (Animal Systems), and Interdependence (Ecosystems and Future Visions). Botany is part of the curriculum during the Land Lab. Students do personal work and group work in these themes. The focus is on asking large questions and looking for patterns in science and integrating this information into all disciplines. Students develop creative projects and make presentations. Outdoor education experiences and the use of tools and machinery are also part of this study.

SCED Course Mapping:

Subject Area:	53 - Life and Physical Sciences (prior-to-secondary)				
Course:	53203 - IB Sciences, Middle Years Program				

Description:	International Baccalaureate (IB) Sciences, Middle Years Program courses provide to students a body of knowledge and an understanding of the scientific approach to problem solving. It may be organized as biology, chemistry, and physics, or as an integrated sciences course. The course requires students to formulate hypotheses, design and carry out experiments to test them, and evaluate results.

AZ53250 - STEM Course/Laboratory

Description:	This is a science, technology, engineering and mathematics (STEM) course that involves at least two of the STEM disciplines. Instruction is delivered in a technology based, inquiry-based, project-based format. STEM in 21st Century Community Learning Centers is designed to serve the "Excitement" and "Awareness" levels with a variety of topics. Family involvement and field trips are also components designed to sustain the interest in STEM. The course is designed so that students gain confidence in their own abilities to learn and widen their choice of careers.

Course:	54434 - Social Studies (grade 4)				
Description:	Social Studies (grade 4) courses continue to develop skills in history, geography, civics and government, and economics. Although the four disciplines are typically integrated, these courses may take a more discipline-specific approach, such as concentrating on U.S. history, state-specific history, or civic engagement for periods of time. Specific content depends upon state standards for grade 4.

AZ54506 - Montessori MS Social Studies A

Description:	This course includes geography and history. All research and inquiry is based on integrating multiple perspectives of history. The geography curriculum includes the study of the themes of location, place, movements, regions, and interaction of people and their environment. The history curriculum focuses on the history of people and the following topics: Connections (Native Americans), Exploration and Perspectives, Identity (Immigration), Systems (Economics and Economic Systems), Interdependence (Ecology and Future Visions). Students do personal and group work in these themes. The focus is on asking large questions and looking for patterns in history and integrating this information into all disciplines. Students develop creative projects and make presentations.

AZ54507 - Montessori MS Social Studies B

Description:	This course includes geography and history. All research and inquiry is based on integrating multiple perspectives of history. The geography curriculum includes the study of the themes of location, place, movements, regions, and the interaction between people and their environment. The history curriculum focuses on the progress of people and the following topics: Structures (Governments and US Government), Forces (Revolutions), Power (Human Rights Movement), Changes (Industrial Revolution), and Balance (Peace Education and Future Vision). Students do personal and group work in these themes. The focus is on asking large questions and looking for patterns in history and integrating this information into all disciplines. Students develop creative projects and make presentations.

AZ55051 - Introduction to the Theater

Description:	Introduction to the Theater courses provide an overview of the art, conventions, and history of the theater. Although the courses sometimes include experiential exercises, they emphasize learning about the theater rather than performance. Students learn about one or more of the following topics: basic techniques in acting, major developments in dramatic literature, major playwrights, the formation of theater as a cultural tradition, and critical appreciation of the art.

SCED Course Mapping:					
Subject Area:	55 - Fine and Performing Arts (prior-to-secondary)				
Course:	55051 - Introduction to the Theater				
Description:	Introduction to the Theater courses provide an overview of the art, conventions, and history of the theater. Although the courses sometimes include experiential exercises, they emphasize learning about the theater rather than performance. Students learn about one or more of the following topics: basic techniques in acting, major developments in dramatic literature, major playwrights, the formation of theater as a cultural tradition, and critical appreciation of the art.

AZ55052 - Theatre Arts

Description:	Theatre arts courses focus on the study and performance of drama, including musical theatre. These courses review a wide range of scripted materials, such as plays, screenplays, teleplays, readers' theatre scripts, dramatic criticism, creation of original dramatic works, and the role of dramatic arts in society. In addition, students work collaboratively on performances.

AZ55053 - Drama—Comprehensive

Description:	Drama—Comprehensive courses are intended to help develop students' experience and skill in one or more aspects of theatrical production. Initial courses are usually introductory in nature, providing an overview of the features of drama, such as acting, set design, stage management, and so on. The more advanced courses concentrate on improving technique, expanding students' exposure to different types of theatrical techniques and traditions, and increasing their chances of participating in public productions. These courses may also provide a discussion of career opportunities in the theater.

AZ55154 - Creative Art—Comprehensive

Description:	Creative Art—Comprehensive courses provide to students the knowledge and opportunity to explore an art form and to create individual works of art. These courses may also provide a discussion and exploration of career opportunities in the art world. Initial courses cover the language, materials, and processes of a particular art form and the design elements and principles supporting a work of art. As students advance and become more adept, the instruction regarding the creative process becomes more refined, and students are encouraged to develop their own artistic styles. Although Creative Art courses focus on creation, they may also include the study of major artists, art movements, and styles.

Subject Area:	55 - Fine and Performing Arts (prior-to-secondary)				
Course:	55181 - Art (grade 1)				
Description:	Art (grade 1) courses provide to students activities that foster creative expression, communication through artistic endeavor, and appreciation of culture and heritage. Activities may include those that enable students to refine their technique, increase their artistic vocabulary, and strengthen their critical abilities. Although the art form typically involves visual arts (drawing, painting, sculpture, crafts, and the like), students may also explore other forms of art such as dance, music, and theater. Specific course content conforms to any existing state standards for grade 1.				
AP:	False	IB:	False		
Elementary Mapping:	True	Secondary Mapping:	False	Other Mapping:	False

AZ55182 - Art (grade 2)

Description:	Art (grade 2) courses provide to students activities that foster creative expression, communication through artistic endeavor, and appreciation of culture and heritage. Activities may include those that enable students to refine their technique, increase their artistic vocabulary, and strengthen their critical abilities. Although the art form typically involves visual arts (drawing, painting, sculpture, crafts, and the like), students may also explore other forms of art such as dance, music, and theater. Specific course content conforms to any existing state standards for grade 2.

AZ55191 - Montessori MS Fine Arts A

Description:	Fine art is integrated throughout the curriculum, focusing mainly on Social World and Natural World. Each cycle the Middle School curriculum has a different theme. The themes are cross-curricular. The Middle School uses the art series entitled: Art21 via PBS.org. The art lessons and projects are created using national and state benchmarks. The students will create art projects during theme testing week. A video, discussion and brainstorming lesson will precede each new project. Projects will be displayed with an informational poster on the series used for the project. Students will receive ½ credit each year for fine arts.

AZ55201 - Integrated Fine Arts

Description:	Integrated Fine Arts courses explore self-expression across the fine arts: any subset or all of the visual arts, music, drama, theater, and literature may be included in the curriculum for these courses. Students both study and critique the works of others and participate in or produce art themselves. These courses often include comparative study of various art forms over time—i.e., the interrelationship of literature, music, and the performing arts of a particular time period and culture.

AZ56100 - Spanish

Description:	Spanish courses introduce and then extend students' skills in speaking, reading, writing, and comprehending the Spanish language and students' knowledge of Spanish-speaking cultures. Initial courses emphasize grammar and syntax, vocabulary, and the spoken accent so that students have an understanding of the language and its rules. Later courses advance students' knowledge and ability to express themselves beyond basic communication (and understand others, either in a written or verbal format), seeking to enable students to express more complex concepts, in different tenses, and to do so more easily. Students usually explore the customs, history, and art forms of Spanish-speaking people to deepen their understanding of the culture(s).

Initial courses emphasize grammar and syntax, vocabulary, and vocal tones so that students have an understanding of the language and its rules. Later courses advance students' knowledge and ability to express themselves beyond basic communication (and to understand others, either in a written or verbal format), seeking to enable students to express more complex concepts, in different tenses, and to do so more easily. Students usually explore the customs, history, and art forms of Korean-speaking people to deepen their understanding of the culture(s).

- Montessori MS Physical Education and Health A					
Description:	The physical education class focuses on team sports, individual sports and aerobic activities. Sports include volleyball, soccer, basketball, tennis and rock climbing, etc. Students also participate in cooperative games. All students are included in all activities. Health is the study of issues pertinent to the needs of early adolescents. Students focus on The 7 Habits of Highly Effective Teens (Year A), and The Heroic Journey (Year B). This program has several purposes. Students explore topics such as belonging, friendships, adolescent development, stress management, self-esteem, peer pressure, drug education, nutrition, and balanced living. There is a time each day in which students spend in personal reflection for development of their intrapersonal skills.

AZ72202 - Food and Nutrition

Description:	Food and Nutrition courses provide an understanding of food's role in society, instruction in how to plan and prepare meals, experience in the proper use of equipment and utensils, and background on the nutritional needs and requirements for healthy living. Some classes place a heavier emphasis on the nutritional components of a balanced diet, while others concentrate on specific types of food preparation. Although these courses may present career opportunities in the food service industry, their emphasis is not career related.

AZ72271 - Montessori MS Outdoor Education A

Description:	Students learn to work on and with the land. In September, students go to a R.O.P.E.S. course for three days. This includes activities such as trust activities, group initiatives, individual challenges, personal reflection, as well as classes in orienteering, nature studies, ecological studies, and arts and crafts. At the school location, students do various environmental and horticultural projects. At the end of every five-week cycle, students live away from home during our Immersion Week for 5 days (Monday-Friday). Students work together on projects that integrate academic work into real-life experiences. An emphasis is place on working on the land and instruction is based in learning how to be stewards of the earth. In May there is an adventure trip to continue study of one of the science areas more in-depth.
