Oral Reading Fluency (ORF) is made up of two components – Expressiveness and Words Correct Per Minute (WCPM). Each of these components has a separate rubric and contributes 50% to the student score.

**Oral Reading**

**Oral Reading Fluency – Component 1 - Expressiveness**

AZELLA Holistic Rubric | Stages I - V: 0-3 points (ORF-E)

Expressiveness in Oral Reading Fluency is characterized by smooth, rapid reading evidenced by ease of decoding and appropriate use of phrasing, pausing, and expression to convey meaning.

Students who demonstrate competency in this skill have the ability to access information in the mainstream classroom. An incorrect response or no response earns a score point 0. Students who struggle with this skill require more instruction to access information presented in the mainstream classroom.

<tr>
<td>3</td>
<td>Reads primarily in larger, meaningful phrase groups fluently. Most, or all, of the story is appropriately-paced. Consistently uses organizational features and contextual clues to read with expressive interpretation. (Rating equates to “Proficient.”)</td>
</tr>
<tr>
<td>2</td>
<td>Reads primarily in three- or four-word phrase groups. Some smaller groupings may be present. The phrasing is mostly appropriate. Some pausing and staccato rhythm may be apparent. Use of organizational features or contextual clues to create expressive interpretation is inconsistent. (Rating equates to “Intermediate.”)</td>
</tr>
<tr>
<td>1</td>
<td>Reads primarily word-by-word or in two-word phrases. Some larger word groupings may be present. Word groupings seem awkward and unrelated to the larger context of the sentence or passage. Reading is laborious and little or no expressive interpretation is present. The student’s fluency may impede the listener’s comprehension. (Rating equates to “Pre-Emergent/Emergent/Basic.”)</td>

| 0      | • Response meets one or more of the following conditions:  
• Unintelligible speech or foreign language  
• Response is 5 words or less (silent)  
• Response is off-topic (Student is speaking in English, but not reading the passage.) |
Oral Reading Fluency (ORF) is made up of two components – Expressiveness and Words Correct Per Minute (WCPM). Each of these components has a separate rubric and contributes 50% to the student score.

Oral Reading

Oral Reading Fluency – Component 2 - Words Correct Per Minute

AZELLA Holistic Rubric | Stages I - V: 0-3 points (ORF-WCPM)

WCPM: The number of words correctly read per minute. WCPM is calculated using a pro-rating formula by which the number of words read correctly is divided by the duration of the reading (in seconds) and multiplied by 60. In cases where the student reads for the entire minute, the words read correctly is the WCPM; in cases where the student reads for less than the entire minute, a WCPM score is extrapolated.

For each score point, 0-3, each AZELLA item has a specific performance range of WCPM which is based on the difficulty of the item. The ranges shown below reflect the AVERAGE range for all items at a Stage.

Students who demonstrate competency in this skill have the ability to access information in the mainstream classroom. An incorrect response or no response earns a score point 0. Students who struggle with this skill require more instruction to access information presented in the mainstream classroom.
