

Statewide Trends in EL Data in Fiscal Year 2018

Kim Shinault
Arizona Department of Education

How We Visualize Statewide EL Data

- ELSTAR software program created for generating graphs of EL assessment data
- Used by state agencies to support data-based decision making for English learners and accountability systems
- The English Learner State Accountability Resource (ELSTAR)
- Created in 2018 by Slama, Lee, Goldschmidt and August*
- Partnership with the U.S. DoE and the American Institutes for Research

*Slama, R., Lee, M., Goldschmidt, P., & August, D. (2018). *English Learner State Accountability Resource (ELSTAR)*. American Institutes for Research: Washington, DC.

Graphs Available in the ELSTAR Program

- Graph Options Available:
 - Current EL status – Overall AZELLA performance
 - Initial EL status – Overall AZELLA performance
 - Performance on the separate AZELLA assessment domains
- Variables for Making Comparisons:
 - Grade
 - Gender
 - Some disability categories
 - Free/Reduced lunch
 - Ethnicity
 - Parent withdrawal

What We Will See Today

Current EL Status

- All Students
- Parent Withdrawn
- FRL
- Gender

Initial EL Status

- All Students
- Parent Withdrawn
- FRL
- Gender

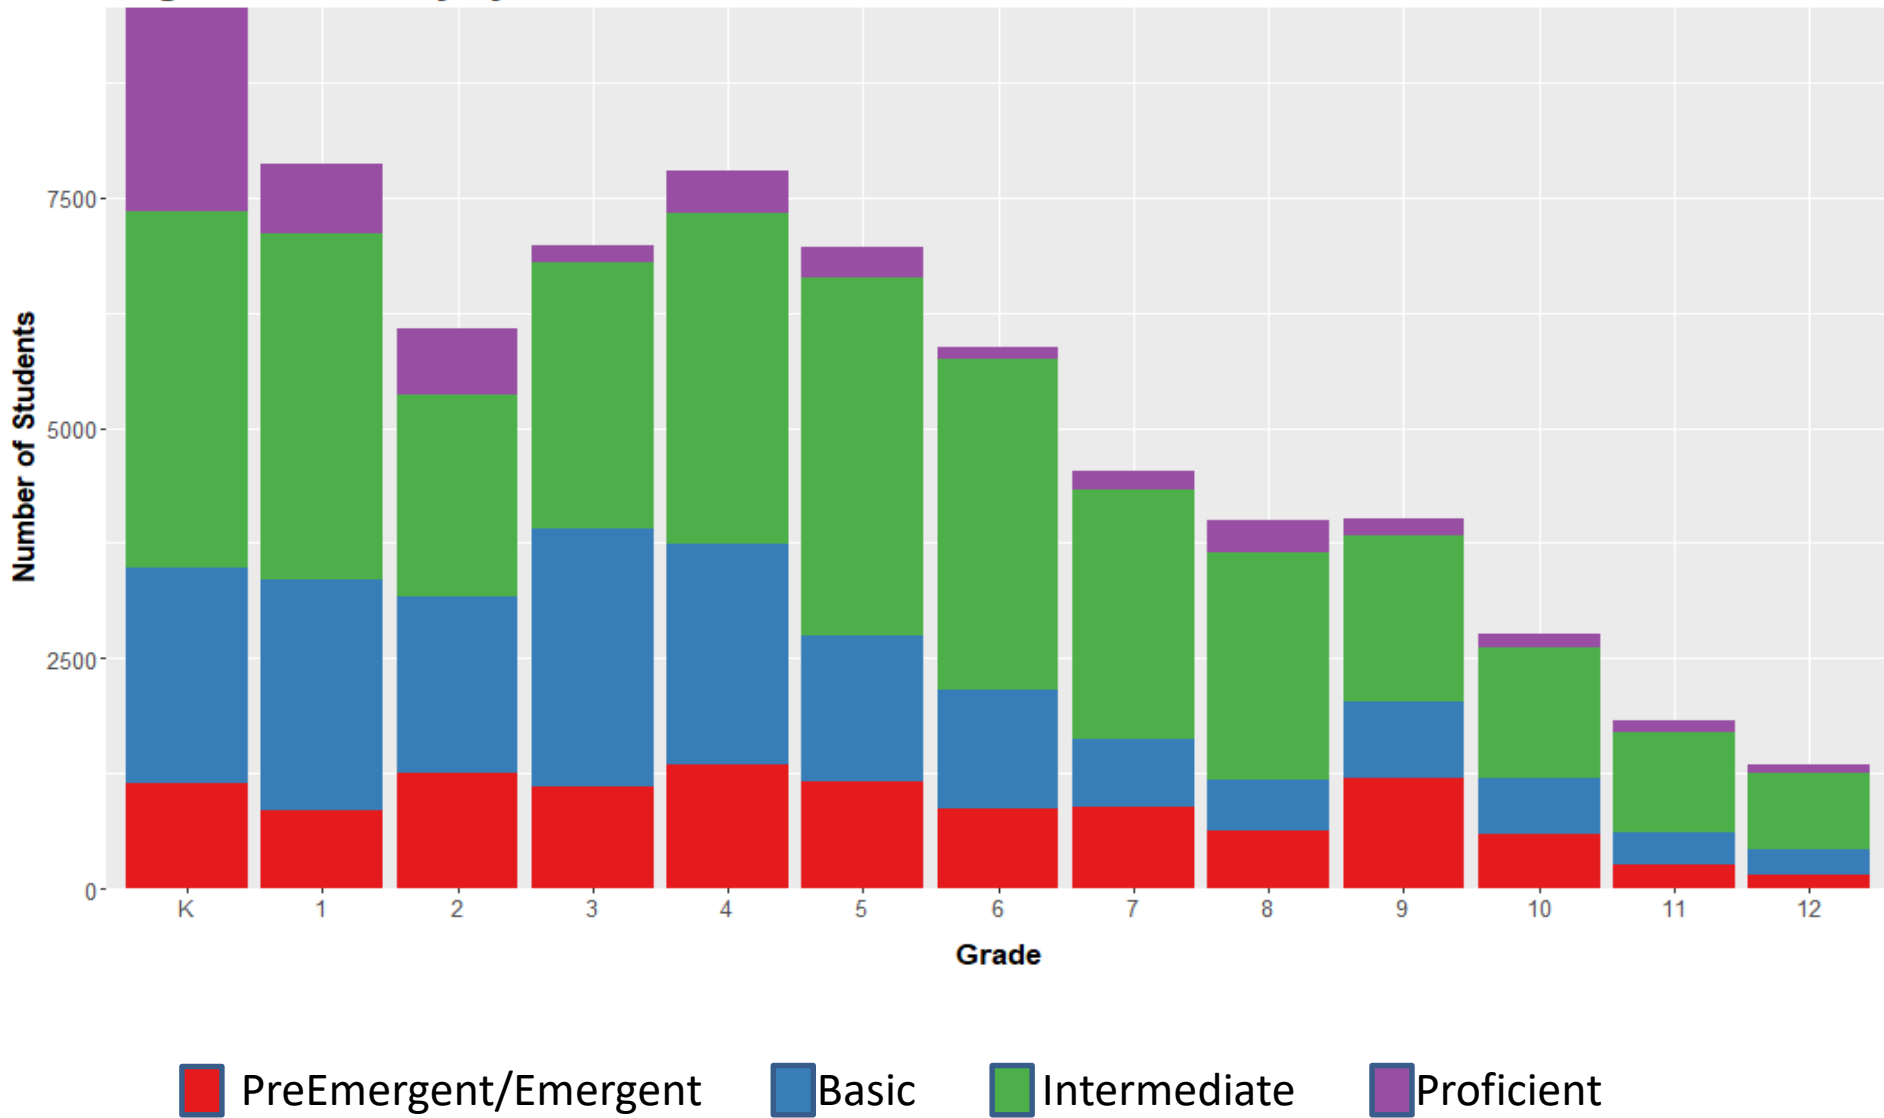

Performance on the AZELLA Assessment Domains

- All Students
- Parent Withdrawn
- FRL
- Gender

Current EL Status – All EL Students

English Proficiency by Grade Level

Current EL Status – Parent Withdrawn - Counts

Parent Withdrawn

English Proficiency by Grade Level

Not Parent Withdrawn

English Proficiency by Grade Level

Female

English Proficiency by Grade Level

Trends in Current EL Status

Trends we see in EL Students

- Decrease in number with increasing grade
- Parent withdrawals peak in the middle grades
- Parent withdrawals are mostly intermediate on overall AZELLA
- More FRL EL students than Non-FRL
- Performance patterns similar for FRL Non-FRL students, may be fewer PreEmergent/Emergent FRL
- Performance patterns similar for male and female students

Group Discussion

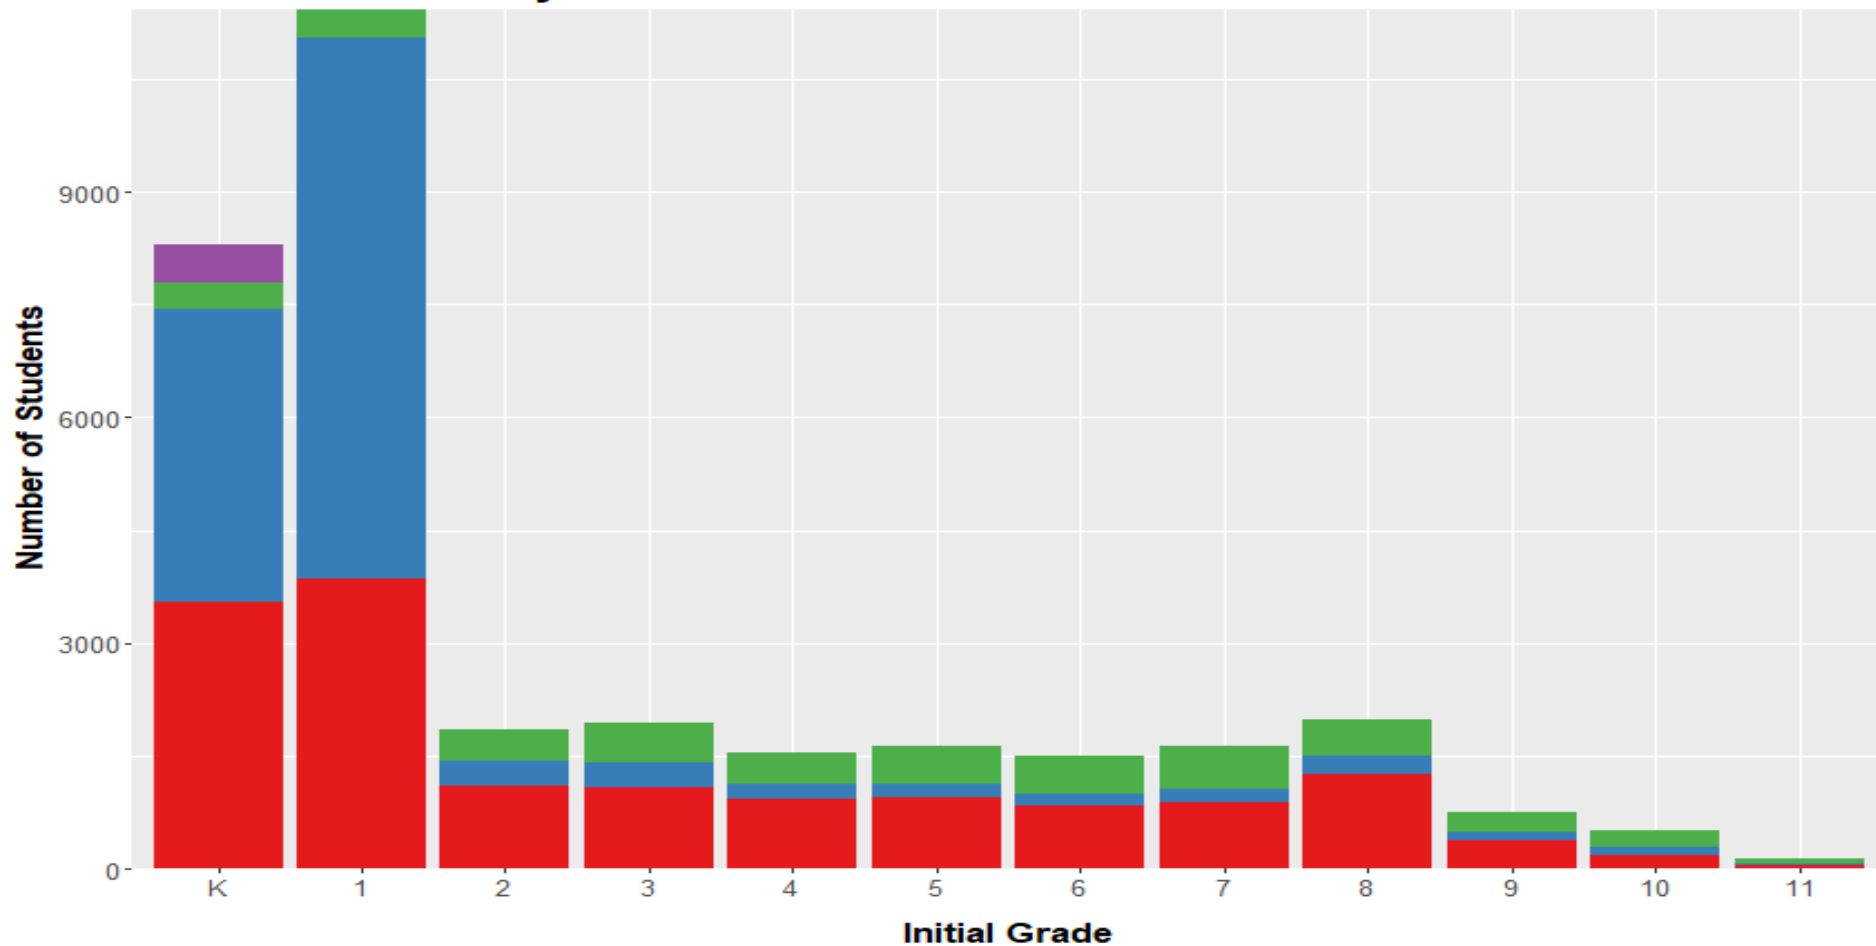

Discussion Question:

What relationships do you see between parent withdrawn EL students and their English language proficiency?

Initial EL Status – All Students

Initial ELP Level by Initial Grade

Initial ELP Level by Initial Grade

Female

Initial ELP Level by Initial Grade

PreEmergent/Emergent

Basic/Basic Intermediate

Intermediate

Proficient

Trends in Initial EL Status

Trends we see in Newly Identified EL Students

- Many EL students are initially pre-emergent/emergent except kindergarten and first-grade students who tend to be basic/basic intermediate
- Parent withdrawn often are initially intermediate unless they are kindergarten or first-grade
- Similar patterns between FRL groups and gender groups

Group Discussion

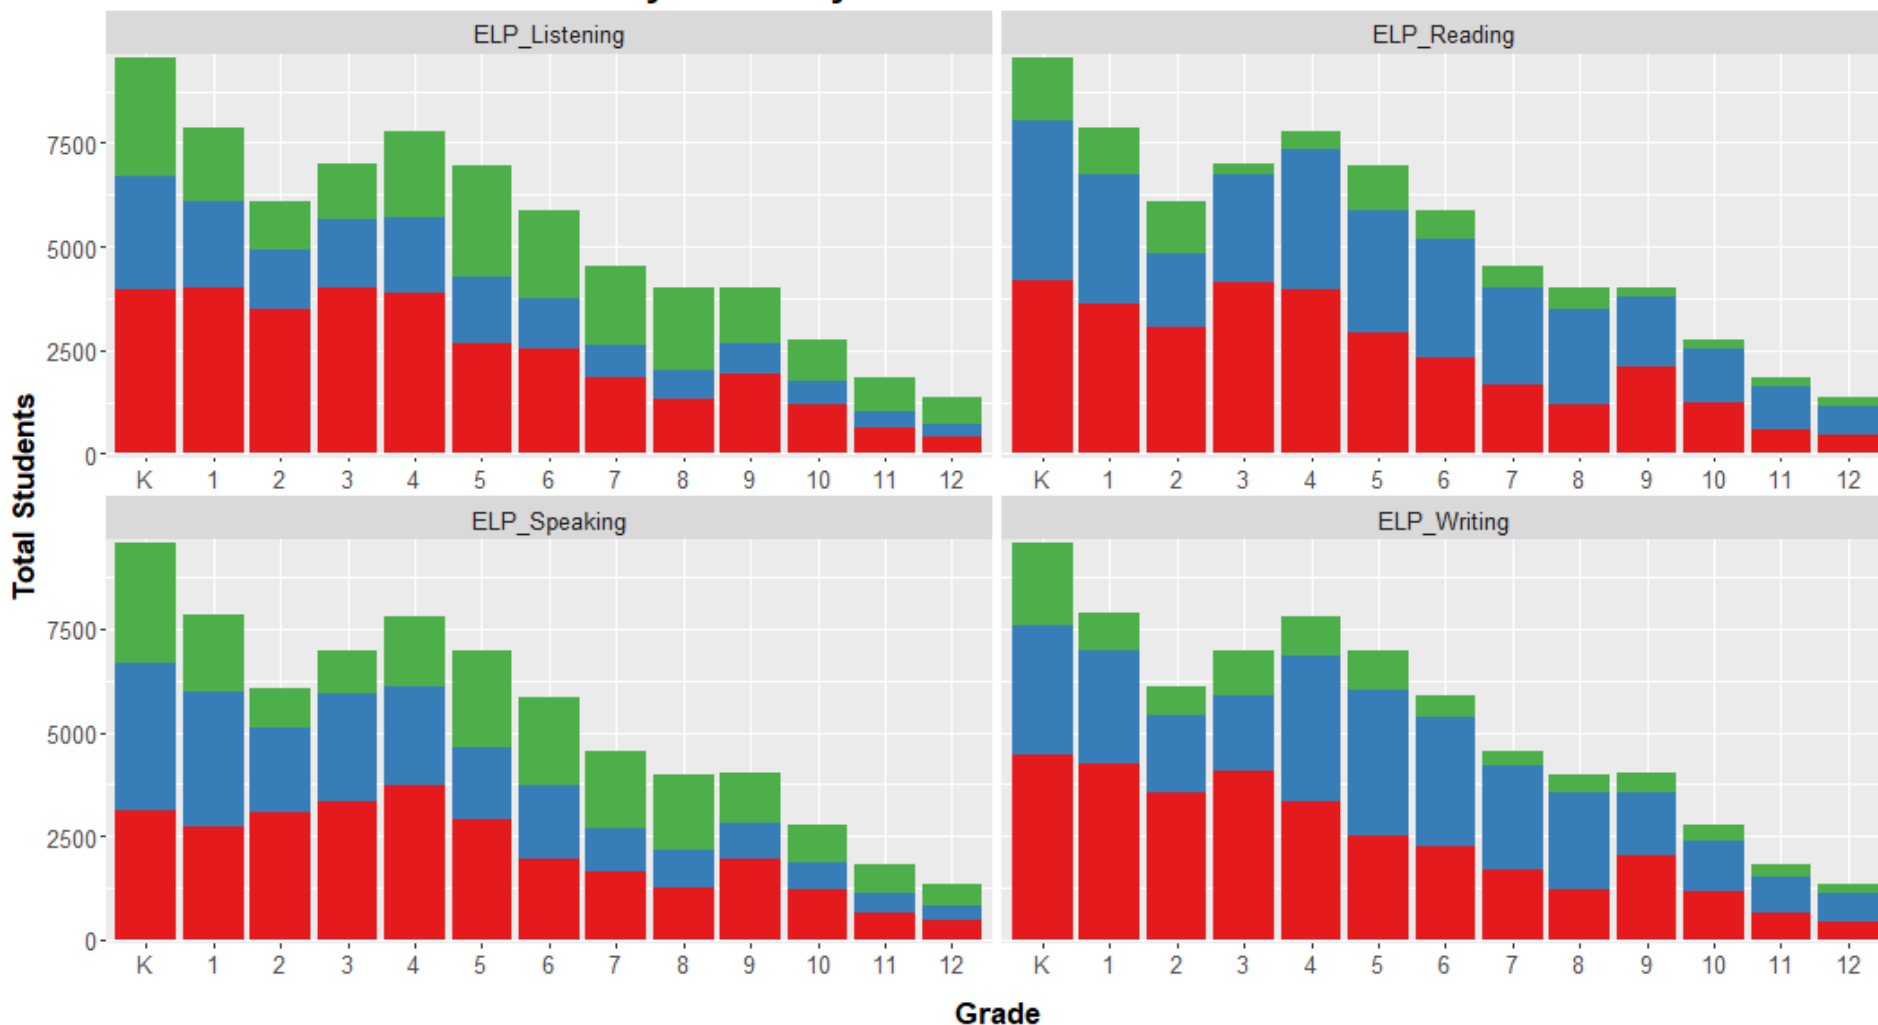

Discussion Question:

Do you see differences in English language proficiency or learning stages between male and female students in your classrooms or schools?

PreEmergent/Emergent/Basic

Intermediate

Proficient

Trends in AZELLA Domain Scores

Trends we see in AZELLA Subtest Performance

- More proficient scores on the listening and speaking domains but there is not a direct relationship between these proficiencies and overall proficiency
- Parent withdrawn EL students tend to score higher on all domains but highest on listening and speaking
- Similar patterns for FRL and gender

Questions
