# Arizona Standard Setting for the ACT <br> June 6, 2019 <br> Technical Report 

Prepared June, 2019
Joann Moore \& Wayne Camara

## Introduction

ACT staff conducted an empirical standard setting at the request of the Arizona Department of Education (ADE) on June 6, 2019. The process resulted in three recommended cut scores (Level 2, Level 3, and Level 4) on the ACT, defining four performance levels (Level 1, Level 2, Level 3, and Level 4) for three subject areas: Mathematics, English+Reading, ${ }^{1}$ and Science. Following the standard setting meeting, the cut score recommendations were provided to the Arizona State Board of Education for review and approval. The final cut scores have not been approved at the time this report was prepared. The cut scores are intended to be applied to results from the spring 2019 administration of the ACT for the Menu of Assessments (MOA).

## Context for New Cut Scores

In 2016, the Arizona state legislature passed a law providing flexibility in testing for Local Education Agencies (LEAs) at the high school level. ${ }^{2}$ Beginning in the 2018-2019 school year, LEAs can choose to administer a high school assessment from the MOA in lieu of the AzMERIT statewide assessment, including the ACT and SAT. The law requires that an assessment on the MOA must meet or exceed the level of rigor of the state academic standards and result in comparable student performance levels.

The ADE requested that ACT conduct a standard setting to establish cut scores on the ACT for their state accountability system. The resulting cut scores can then be used in conjunction with the ACT-SAT concordance tables to find comparable cut scores on the SAT. The purpose of the standard setting was not to satisfy federal accountability requirements of the Every Student Succeeds Act (ESSA), but to establish performance levels for the state accountability system.

## Methodology

Recommended cut scores for the ACT were determined using an empirical standard setting process, rather than a traditional content-based standard setting. In a content-based standard setting, like that used to establish AzMERIT cut scores and performance level descriptors, cut scores and performance levels are established based on test content and content standards, and they are described in that context. In an empirical standard setting, panelists make judgments based on established relationships between test scores and a variety of educational outcomes. To inform the selection of ACT cut scores for Arizona $11^{\text {th }}$ graders, panelists viewed comparative evidence from the ACT, AzMERIT, AIMS Science, and NAEP, impact on the percentages of

[^0]students classified in different performance levels for several ACT-tested student populations, and impact on college success outcomes. This evidence is described in detail in the Orientation, Context, and Discussion section below.

Empirical standard setting approaches have been the primary method used to establish cut scores and benchmarks on admissions tests for several reasons. The primary purpose of college admissions tests is to identify students who are likely to succeed in postsecondary academic environments. Such assessments are used for admissions, placement, recruitment, and talent identification because they predict GPA and grades in specific college courses. Educators in secondary schools use the tests to determine if students are on track to being college ready at the end of high school, to identify academic weaknesses that can be addressed, and to aid in postsecondary planning for students. This type of evidence prioritizes the empirical relationship between test scores and outcomes such as postsecondary enrollment, course grades, GPA, and retention. College readiness benchmarks for the ACT and SAT have been established exclusively on such empirical relationships (e.g., $50 \%$ chance of a B or higher in college algebra), and ACT has employed empirical standard setting methods when assisting states to set upper and lower cut scores, as well as validating or establishing their own College Readiness Benchmarks.

To determine the cut scores for use in the Stat Accountability System, ACT and ADE collaborated and decided to use a modified Empirical Standard Setting Approach. This approach was reviewed by ADE's Technical Advisory Committee (TAC) Chair. Much of the same information was presented to panelists; the main difference was in the size and makeup of the panel and the amount of time allotted to the standard setting process. A typical panel consists of $8-12$ participants per subject area, including a mix of teachers, administrators, and higher education faculty. Panelists are selected to represent the state in terms of the variety of school districts (including large and small, urban and rural) and panelist expertise including content, special education, and English language learners. Typically, the standard setting meeting lasts two days and involves multiple rounds of ratings.

The modified standard setting approach for Arizona included four panelists, selected for their experience and expertise working with the state accountability system and familiarity with assessment data. Panelists were presented with relevant information about the ACT and other assessments, discussed the evidence, and participated in three rounds of ratings, resulting in their final recommended cut scores.

## ACT College Readiness Benchmarks

The primary evidentiary sources for standard setting on the ACT are the ACT College Readiness Benchmarks and the probabilities of earning a grade of C or higher, B or higher, or A in firstyear college courses derived in the research undergirding the development of the Benchmarks.

In 2005, ACT established College Readiness Benchmarks reflecting the ACT assessment scores of students in $11^{\text {th }}$ and $12^{\text {th }}$ grade associated with a $50 \%$ chance of earning a B or higher grade in common first-year credit-bearing courses at a typical postsecondary institution (Allen \& Sconing, 2005). The Benchmarks also correspond to an approximate $75 \%$ chance of earning a C or higher grade in these courses. The first-year credit-bearing courses studied were English Composition, College Algebra, Social Science courses (including American History, Other History, Psychology, Sociology, Political Science, and Economics), and Biology. The original

Benchmarks corresponded to scores of 18 on the English test, 22 in Mathematics, 21 in Reading, and 24 in Science.

The Benchmarks were updated in fall 2013 (Allen, 2013) to address possible changes in college grading standards, student performance, course taking patterns of first-year college students, and alignment between secondary and postsecondary course content that transpired since the original benchmarks were established. Using a large sample of first-year students attending two- and four-year institutions, the study detected no changes in the English and Mathematics
Benchmarks (18 and 22, respectively), the Reading Benchmark increased from 21 to 22, and the Science Benchmark decreased from 24 to 23.

The Benchmark development sample included more institutions in states that typically enroll higher proportions of ACT-tested students (i.e., states in the South and Midwest) and fewer institutions from states that typically enroll fewer ACT-tested students (i.e., states on the East and West coasts). Compared to ACT-tested students nationally who enroll in college, students in the course samples were more likely to be female, less likely to be Hispanic or African American, less likely to have extreme ACT Composite scores, and more likely to have higher high school GPAs. Moreover, fewer students in the samples enrolled at selective and highly selective institutions. To address this issue, the samples were adjusted statistically to make results approximate what would be observed with a nationally representative sample of ACTtested college-going students. Table 1 summarizes the characteristics of the institutions used in the 2013 study.

Table 1
Institutional Samples Used in Benchmark Development

| Characteristic | College course |  |  |  |
| :--- | :---: | :---: | :---: | :---: |
|  | English <br> Composition I | College <br> Algebra | Social <br> Science | Biology |
|  | 136 | 125 | 129 | 90 |
| N (Students) | 96,583 | 70,461 | 130,954 | 41,651 |
| Type: |  |  |  |  |
| 2-year | $50 \%$ | $42 \%$ | $42 \%$ | $44 \%$ |
| Less selective 4-year | $43 \%$ | $48 \%$ | $49 \%$ | $46 \%$ |
| More selective 4-year | $7 \%$ | $10 \%$ | $9 \%$ | $10 \%$ |
| Control: |  |  |  |  |
| Public | $88 \%$ | $92 \%$ | $92 \%$ | $87 \%$ |
| Private | $13 \%$ | $8 \%$ | $8 \%$ | $13 \%$ |

Table 2 illustrates the overall success rates by course, which ranged from $47 \%$ in Biology (ACT Science benchmark) to 59\% in English Composition I (ACT English benchmark) for the B or
higher criterion and from $72 \%$ in College Algebra (ACT Math benchmark) to $81 \%$ in English Composition I for the C or higher criterion. Across all courses, B was the modal course grade. For additional details about the regression models, see Allen (2013).

Table 2
Success Rates by Course

| College <br> course type | Percentage of course grades |  |  |  | Success <br> criteria |  |  |
| :--- | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | A | B | C | D | F | $\geq$ B | $\geq$ C |
|  | $27 \%$ | $32 \%$ | $22 \%$ | $7 \%$ | $13 \%$ | $59 \%$ | $81 \%$ |
| College <br> Algebra | $24 \%$ | $25 \%$ | $23 \%$ | $11 \%$ | $18 \%$ | $49 \%$ | $72 \%$ |
| Social Science | $25 \%$ | $27 \%$ | $23 \%$ | $10 \%$ | $14 \%$ | $53 \%$ | $76 \%$ |
| Biology | $20 \%$ | $27 \%$ | $26 \%$ | $12 \%$ | $16 \%$ | $47 \%$ | $73 \%$ |

ACT uses the B or higher grade criterion for the benchmarks for several reasons. First, the statistical models used to develop the benchmarks are affected by courses and institutions where grades below a C are uncommon. In particular, courses in English and the social sciences frequently have $80 \%$ to $90 \%$ of students earning grades of C or higher. In addition, establishing a policy wherein students with only a $50 \%$ chance of earning a C or higher are placed into a class could be problematic because students would also have a $50 \%$ chance of earning a D or F . Moreover, the B or higher criterion best reproduces the original grade distribution.

In 2015, ACT began reporting an English Language Arts (ELA) score, which is the average of the ACT English, Reading, and Writing scores (after the Writing score is transformed from a $2-$ 12 scale to a $1-36$ scale). Students must take the ACT Writing test to obtain an ELA score. In 2017, ACT developed an ELA Benchmark (Radunzel, Westrick, Bassiri, \& Li, 2017). The methodology used to develop the ELA Benchmark was similar to that used to develop the benchmarks for the four ACT subject tests. The ELA Benchmark is the score associated with a $50 \%$ chance of earning a B or higher grade in English Composition I, American History, Other History, Psychology, Sociology, Political Science, and Economics courses (the same courses used to develop the English and Reading Benchmarks, respectively). The ELA Benchmark also corresponds to an approximate $75 \%$ chance of earning a C or higher grade in these courses. The resulting ELA Benchmark is a score of 20. Table 3 contains a summary of the institutional samples used to develop the ELA Benchmark. The institutions represented in ACT research used to set the benchmarks approximately reflected the composition of colleges and universities in the U.S. in terms of selectivity and 2-year vs. 4-year institutions. It should be noted that few differences have been detected between 2 -year and 4 -year institutions in setting college readiness benchmarks (e.g., Steedle, Radunzel, \& Mattern, 2019).

For the Arizona standard setting, an English+Reading score was used instead of the ACT ELA score. The English+Reading score is a sum of the ACT English and reading subject area tests (not including writing), on a 2-72 scale. The English+Reading score was used for the ACT-SAT concordance study (https://www.act.org/content/act/en/products-and-services/the-act/scores/act-sat-concordance.html) and can be used to convert scores on the ACT to the SAT scale and vice versa. The same data sample used to develop the ACT ELA Benchmark was used to calculate the probabilities of success associated with first-year college grades for the English+Reading score. The English+Reading score associated with a $50 \%$ chance of earning a B or higher was a 41 .

Table 3
Institutional Samples Used in ELA Benchmark Development

| Characteristic | College course |  |  |
| :--- | :---: | :---: | :---: |
|  | English <br> Composition I | Combined <br> Social <br> Science | Total <br> Sample |
|  | 200 | 154 | 233 |
| N (Students) | 107,142 | 91,133 | 198,275 |
| Type | $42 \%$ | $43 \%$ | $40 \%$ |
| 2-year | $51 \%$ | $50 \%$ | $53 \%$ |
| Less selective 4-year | $7 \%$ | $7 \%$ | $7 \%$ |
| More selective 4-year |  |  |  |
| Control | $89 \%$ | $94 \%$ | $88 \%$ |
| Public | $11 \%$ | $6 \%$ | $12 \%$ |
| Private |  |  |  |

Table 4 shows the overall success rates by course in the ELA benchmark study. Across all courses, B was the modal grade. The overall percentage of students earning a B or higher was approximately $52 \%$, and the overall percentage of students earning a C or higher was approximately $77 \%$.

Table 4
Success Rates by Course

| College <br> course type | Percentage of course grades |  |  |  |  | Success <br> criteria |  |
| :--- | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | A | B | C | D | F | $\geq \mathbf{B}$ | $\geq$ C |
|  | $20 \%$ | $35 \%$ | $26 \%$ | $7 \%$ | $12 \%$ | $55 \%$ | $81 \%$ |
| Social Science | $21 \%$ | $28 \%$ | $25 \%$ | $11 \%$ | $16 \%$ | $49 \%$ | $73 \%$ |
| Total Sample | $20 \%$ | $32 \%$ | $25 \%$ | $9 \%$ | $14 \%$ | $52 \%$ | $77 \%$ |

## ACT Performance in Arizona

Figure 1 shows a comparison of the percentages of students in the 2018 ACT-tested high school graduating cohort ${ }^{3}$ who met or exceeded the Benchmarks in Arizona and the nation. Sixty-six percent of Arizona's 2018 graduates took the ACT. Arizona's average performance was lower than the national average. Note that the Arizona-specific graduating cohort results included the most recent test scores of all students completing the ACT ( $n=45,468$ ), not just students testing in $11^{\text {th }}$ grade. This distinction is important to consider when comparing the 2018 Arizona high school graduates to students testing in $11^{\text {th }}$ grade in 2018. The Condition of College \& Career Readiness 2018 state report contains additional information about how Arizona graduates performed on the ACT (ACT, 2018).

[^1]
## Percent of 2018 ACT-Tested High School Graduates Meeting

 ACT College Readiness Benchmarks by Subject

Figure 1. Percentages of 2018 Arizona and national ACT-tested high school graduates meeting ACT's College Readiness Benchmarks by subject.

## Panelists

The ADE was responsible for all logistical details such as identifying panelists, communicating with panelists about the event, stipends and travel reimbursements, and meeting coordination. Panelists were invited via email to participate during the spring of 2019. This process provided four panelists, including district/LEA representatives and an Arizona Technical Advisory Committee (TAC) member. A second TAC member participated in the standard setting process and discussions but did not provide ratings. Both TAC members participated via Webex. Seven observers from the Arizona State Department of Education and Board of Education also attended; they provided clarifying information but did not provide ratings. A list of panelists, participants, and observers can be found in the Appendix.

In terms of demographics, the panel was $75 \%$ male and $100 \%$ non-Hispanic White. The panel was highly educated, with all panelists having a Ph.D., and all panelists had 16+ years of experience working in education. The background questionnaire and summary of results can be found in the Appendix.

## Process

The standard setting process was structured as follows:

- Context for standard setting (MOA)
- Empirical standard setting methodology
- ACT College Readiness Benchmarks and probabilities of success in first-year college courses
- Training to identify borderline achievement in terms of probability of success
- Ratings Round 1: Level 3 (College ready)
- Results of Round 1 ratings
- Impact and comparative impact data (percent at/above each score point on the ACT, AzMERIT, AIMS Science, and NAEP assessments)
- Discussion
- Definitions of Level 2 (lower cut) and Level 4 (upper cut)
- Discussion
- Ratings Round 2: Level 2 and Level 4
- Review results of Round 2 ratings
- Discussion
- Final ratings for all 3 cut scores
- Present final results
- Final discussion, concluding comments

An agenda, slides, and other reference materials presented during the standard setting can be found in the Appendix.

## Orientation, Context, and Discussion

The standard setting meeting began with introductions of the key organizations and staff, followed by panelist introductions. The purpose and context of the meeting was summarized by ADE staff, as described above. ACT staff described the empirical standard setting methodology and information about the ACT test and the standard setting task.

ACT staff presented several sources of information to provide context about why college readiness is important, including the percentages of ACT-tested 2018 high school graduates enrolled in college in Arizona (53\%) and nationally (65\%). Additional evidence included median earnings of students who completed high school $(\$ 30,500)$ or attained associate $(\$ 36,900)$, bachelor's $(\$ 50,000)$, or a master's degree or higher $(\$ 60,000)$, obtained from The Condition of Education 2017 report from the National Center for Education Statistics (McFarland, Hussar, de Brey, Snyder, Wang, Wilkinson-Flicker, Gebrekristos, Zhang, Rathbun, Barmer, Bullock Mann, and Hinz, 2017), and remedial coursework rates in college ( $25 \%$ of students at 4 -year colleges and $61 \%$ of students at 2-year colleges), obtained from The Condition of Education 2004 report (U.S. Department of Education, National Center for Education Statistics, 2004) and a research report from ACT (Noble and Sawyer, 2013). Bureau of Labor Statistics information was also provided, showing larger projected growth in employment for occupations requiring at least some postsecondary education as compared to occupations requiring a high school diploma or less, ${ }^{4}$ and showing the positive relationship between educational attainment and median earnings and the negative relationship between educational attainment and unemployment rates. ${ }^{5}$

ACT provided a summary of the ACT scores used for postsecondary course placement, both nationally and in a sample of Arizona colleges. The national data were obtained from a published study (Fields \& Parsad, 2012) in which 23\% of institutions reported using ACT Math scores for

[^2]placement, and $16 \%$ reported using ACT Reading scores for placement. Arizona-specific data were gathered by searching the websites of postsecondary institutions in Arizona using the terms "ACT" and "placement." Five institutions were found that reported the ACT scores used for first-year course placement. The sample included two large community college systems and three four-year public institutions. The results indicate that College Algebra placement scores are typically close to the ACT College Readiness Benchmark of 22 in math, while lower scores of 18-21could place a student into lower level credit-bearing math courses. In English, placement scores for first-year Composition were close to or higher than the ACT College Readiness Benchmarks of 18 in English. It should be noted that the Arizona-specific data were a small convenience sample of all of Arizona's 2-year and 4-year colleges and may not be representative of all Arizona postsecondary institutions.

ACT also summarized a study conducted by AIR to link AzMERIT scores to ACT scores. ${ }^{6}$ Data included a large sample of students who took grade 11 AzMERIT ELA and Algebra II tests in spring 2015 and took the ACT "at an appropriate time for graduation in 2016." An equipercentile approach was used to link scores on the ACT to the AzMERIT scale. Table 5 and Table 6 contain the ACT scores in reading and math corresponding to the AzMERIT grade 11 ELA and high school Algebra II cut scores. ${ }^{7}$ The ACT reading score associated with the AzMERIT Level 3 cut score in ELA was at the ACT reading benchmark of 22, and the ACT math score associated with the AzMERIT Level 3 cut score in Algebra II was 21, which was one point below the ACT math benchmark of 22 .

Table 5
AzMERIT $11^{\text {th }}$ Grade ELA Scores Linked to ACT Reading

| Performance Level | AzMERIT 11th Grade ELA | ACT Reading |
| :--- | :---: | :---: |
| Level 4 | $2608-2675$ | $29-36$ |
| Level 3 | $2585-2607$ | $22-28$ |
| Level 2 | $2569-2584$ | $19-21$ |
| Level 1 | $2465-2568$ | $1-18$ |

Table 6
AzMERIT Algebra II Scores Linked to ACT Math

| Performance Level | AzMERIT 11th Grade Algebra <br> II | ACT Math |
| :--- | :---: | :---: |
| Level 4 | $3751-3839$ | $26-36$ |
| Level 3 | $3711-3750$ | $21-25$ |
| Level 2 | $3690-3710$ | $18-20$ |
| Level 1 | $3629-3689$ | $5-17$ |

ACT staff presented background information to the panelists about the ACT College Readiness Benchmarks, as described above. ACT staff then presented the probabilities of earning a grade of

[^3]A, B or higher, or C or higher in first-year credit-bearing mathematics, science, and English and social science courses. The probabilities for math and science were developed as part of the Benchmark update study (Allen, 2013), and a subsequent analysis calculated the probabilities for English+Reading using the same sample used to develop the ACT ELA Benchmark (Radunzel, Westrick, Bassiri, \& Li, 2017). Slides were presented focusing on the distinction between the probabilities of success and the impact data because an understanding of these elements is vital to the standard setting task.

## Round 1 Rating

Instructions were given for the first round of making cut score judgments. Table 7 contains an excerpt from the Round 1 Rating Form for math; the full form and corresponding forms for English+Reading and science can be found in the Appendix. Panelists were instructed to think about their conception of a minimally Level 3 (proficient or college ready) student in each subject area and to highlight the row of corresponding probabilities. After the panelists made their judgements, the session ended and the panelists broke for lunch. The first rating task was completed without access to how the probabilities of success correspond to ACT scores or impact data. ACT feels it is important to have initial ratings based on grades and probabilities of success to ensure that initial ratings are not overly influenced by rater's perceptions about the meaning of specific ACT scores or the impact data.

Table 7
Sample from Round 1 Rating Sheet: Mathematics

| Probabilities of Success |  |  |
| :--- | :--- | :--- |
| ACT Subject: Mathematics |  |  |
| College Course: Algebra |  |  |
| Probability of Success |  |  |
|  B or higher <br> prob  |  |  |
| $\mathbf{A}$ prob | C or <br> higher prob |  |
| $\mathbf{0 . 2 9}$ | 0.60 | 0.79 |
| $\mathbf{0 . 2 7}$ | 0.58 | 0.78 |
| $\mathbf{0 . 2 5}$ | 0.56 | 0.77 |
| $\mathbf{0 . 2 4}$ | 0.54 | 0.76 |
| $\mathbf{0 . 2 2}$ | 0.52 | 0.74 |
| $\mathbf{0 . 2 0}$ | $\mathbf{0 . 5 0}$ | $\mathbf{0 . 7 3}$ |
| $\mathbf{0 . 1 9}$ | 0.48 | 0.72 |
| $\mathbf{0 . 1 7}$ | 0.46 | 0.71 |
| $\mathbf{0 . 1 6}$ | 0.44 | 0.69 |
| $\mathbf{0 . 1 5}$ | 0.42 | 0.68 |
| $\mathbf{0 . 1 3}$ | 0.40 | 0.67 |

## Round 1 Results and Discussion

The afternoon session began with a review of the Round 1 results, followed by a review of the subject area-specific comparative and impact evidence. Figure 1 and Table 8 show the results of the first round of ratings. Median probability ratings were calculated within subject areas, and in the case of a tie, the higher value was used. The resulting medians reflected some variability across subject areas. The median probability of earning a B or higher grade was .48 for Mathematics, .48 for Science, and .54 for English+Reading. Probabilities of earning an A or C or higher grade were also provided in the data books (see Table 7 or the Appendix), and panelists were instructed to use the probabilities that made the most sense to them when making judgements. Because panelists were instructed to highlight the entire row on the rating form, it ultimately did not matter in terms of the medians which probability ( $\mathrm{A}, \mathrm{B}$ or higher, or C or higher) was their focus.

Figure 1. Round 1 Level 3 ratings by B or higher grade probabilities.

Table 8 shows the median Round 1 ratings, the ACT scores associated with those ratings, and impact data for several ACT-tested populations. All evidence presented after the Round 1 ratings was anchored to ACT scores rather than the success probabilities because the ultimate objective was to choose ACT cut scores for to the Approaching, On Track, and Exceeding achievement levels.

Table 8
Round 1 Level 3 Ratings with ACT Scores and Impact Data

Data books were provided to panelists after the Round 1 rating. The data books contained impact evidence by subject area and ACT test score, as well as descriptive information about the impact data samples, and comparative impact on the AzMERIT, AIMS Science, and NAEP assessments. The data books contained secure information and panelists were not allowed to remove them from the meeting rooms, but they could reference them and take notes in them throughout the standard setting process. Complete data books are included in the Appendix.

The ACT impact data samples were based on several ACT-tested student populations of interest:

- 2018 ACT-tested juniors in Arizona (census tested schools/districts)
- 2018 and 2017 all ACT-tested juniors in Arizona (national, district, and state testing)
- 2018 ACT-tested juniors in census-tested states ${ }^{8}$
- 2018 national ACT-tested graduate cohort

Table 9 contains descriptive statistics for the impact data samples, including demographics, percent meeting the ACT Benchmarks, and average ACT scores. The 2018 ACT-tested juniors in Arizona (census tested schools/districts) was a population of primary interest since this was likely to be most similar to the data that will be reported for state accountability purposes. Sixteen percent of Arizona juniors took the ACT as part of state testing in 2018. Those students represented urban and rural, small and large, disadvantaged and affluent schools and districts. However, the extent to which this sample is representative of the total population of Arizona juniors is unknown.

Impact for all ACT-tested Arizona juniors in 2017 and 2018 were also provided for comparison. This sample included all students who tested in $11^{\text {th }}$ grade in 2017 or 2018, as part of state, district, or national testing. In 2018, 59\% of Arizona juniors took the ACT, up from $49 \%$ in 2017. Multiple years of data were provided to illustrate how impact data can fluctuate from year

[^4]to year due to differences in the student cohorts and to prevent panelists from overly focusing on a specific percentage. Table 9 shows that performance of the Arizona state-tested juniors was similar to the performance of all Arizona juniors in 2018 and 2017, despite some differences in student demographics. However, because these samples comprised approximately one-half to one-third of the full population of Arizona juniors, they may not be representative of the full population.

Table 9

## Summary of Demographic and Test Results by Student Population

|  |  | AZ <br> Juniors <br> State | All AZ <br> Juniors | All AZ <br> Juniors | Census <br> State <br> Juniors | National <br> Grad <br> Class |
| :--- | :--- | :---: | :---: | :---: | :---: | :---: |
|  | $\mathbf{2 0 1 8}$ | $\mathbf{2 0 1 8}$ | $\mathbf{2 0 1 7}$ | $\mathbf{2 0 1 8}$ | $\mathbf{2 0 1 8}$ |  |
| N | Count | 13,136 | 47,150 | 40,514 | 305,299 | $1,914,460$ |
| Participation Rate |  | $16 \%$ | $57 \%$ | $49 \%$ | $100 \%$ | $55 \%$ |
| Tested 11th Grade |  | $100 \%$ | $100 \%$ | $100 \%$ | $100 \%$ | $53 \%$ |

| American Indian | $3 \%$ | $3 \%$ | $3 \%$ | $1 \%$ | $1 \%$ |  |
| White | Percent | $29 \%$ | $46 \%$ | $49 \%$ | $13 \%$ | $17 \%$ |
| Hispanic/Latino |  | $3 \%$ | $3 \%$ | $3 \%$ | $3 \%$ | $5 \%$ |
| Asian |  | $4 \%$ | $4 \%$ | $5 \%$ | $5 \%$ |  |
| Two or more races |  | $44 \%$ | $43 \%$ | $44 \%$ | $45 \%$ | $60 \%$ |
| Met ACT English Benchmark |  | $32 \%$ | $31 \%$ | $31 \%$ | $29 \%$ | $46 \%$ |
| Met ACT Reading Benchmark |  | $30 \%$ | $29 \%$ | $29 \%$ | $24 \%$ | $40 \%$ |
| Met ACT Math Benchmark |  | $25 \%$ | $23 \%$ | $25 \%$ | $23 \%$ | $36 \%$ |
| Met ACT Science Benchmark |  | 18.8 | 18.7 | 18.8 | 18.5 | 20.8 |
| ACT Composite (1-36) |  | 17.6 | 17.5 | 17.6 | 17.8 | 20.2 |
| ACT English (1-36) |  | 19.1 | 19.0 | 19.0 | 18.7 | 21.3 |
| ACT Reading (1-36) |  | 19.1 | 19.0 | 19.1 | 18.4 | 20.5 |
| ACT Math (1-36) |  | 18.9 | 18.8 | 18.9 | 18.7 | 20.7 |
| ACT Science (1-36) |  | 36.7 | 36.5 | 36.6 | 36.5 | 41.5 |

Another comparison group was ACT-tested juniors from census-tested states. This sample comprised $11^{\text {th }}$ grade students in nine states that administered the ACT to virtually all juniors in 2018. While Arizona was not included, this comparison group provided an estimate of statewide performance on the ACT for states that administer the test statewide. Table 9 shows that the average performance of students in the census-tested states was slightly lower than the performance of the Arizona juniors samples.

Finally, the 2018 ACT-tested national graduate cohort (or "grad class") was presented as another comparison group. This sample included all ACT-tested high school graduates of 2018, and it
reflected their most recent test scores if they took the ACT more than once. Fifty-five percent of the national 2018 graduate cohort was included in this sample. The graduate cohort was not an ideal comparison sample as it tends to include more able, college-bound students such as those from states with low ACT participation rates where only higher achieving students typically take the ACT. However, the graduation cohort may be more familiar to the public since it is described by ACT's annual Condition of College and Career Readiness reports (ACT, 2018). Table 9 shows that the grad class sample was indeed higher performing than the other impact data samples.

Panelists reviewed impact data from AzMERIT, including the percentages of students scoring at or above each cut score in grade 8 in math and in high school Algebra I, Geometry, and Algebra II in 2017 and 2018, as well as grades 8 and 11 in ELA in 2017 and 2018. Impact for AIMS Science in grades 8 and high school in 2017 and 2018 was also provided. It was noted that in the 2020 cohort, students who tested in 2017 were likely a smaller sample of high achieving $9^{\text {th }}$ grade students, whereas students in the 2020 cohort who tested in 2018 were a larger, more representative sample of $10^{\text {th }}$ grade students. NAEP impact data for math, science, and reading was also provided, including Arizona grade 8 students in 2017, national grade 8 students in 2017, and national $12^{\text {th }}$ grade students in 2015. The impact data from AzMERIT, AIMS Science, and NAEP can be found in the Appendix.

After the comparative and impact evidence were presented, panelists were given the opportunity to discuss their ratings and the evidence. Panelists were instructed to focus their discussion on how their cut score judgements compared to others in a given subject area and across subject areas, how the impact information may cause them to reconsider their initial cut score judgements, and which information is the most important in deciding the Level 3 cut score.

After the discussion, panelists were told that they would have an opportunity to provide another rating for Level 3 at the end of the standard setting meeting. In a typical standard setting, panelists would provide a second round of ratings on the Proficient/College Ready cut score before proceeding to the upper and lower cuts, but this round was eliminated due to time constraints of the modified standard setting.

## Round 2: Level 2 and Level 4—Identifying Borderline Achievement by Probability of Success and ACT Score

After discussion of the Round 1 ratings, the meeting transitioned to setting the upper (Level 4) and lower (Level 2) cut scores. Similar to setting the first round of cut scores, panelists were asked to consider what it means to be at the borderline between levels with respect to their probabilities of success in first-year credit-bearing college courses.

The Round 2 ratings process followed the same general procedure as the Round 1 ratings with panelists highlighting two rows of scores and their associated probabilities on the rating sheet, one for the Level 2 cut score and one for the Level 4 cut score. The rating sheets for Round 2 differed from the rating sheets for Round 1 in that each row represented a unique ACT score, with the probabilities of success and percentages at or above anchored to the ACT scores. Impact data were also included for each of the five ACT data samples. An excerpt from the Round 2 math rating sheet can be seen in Table 10, and the full rating sheets for Round 2 can be found in the Appendix.

Table 10

| 18 | 0.09 | 0.30 | 0.60 | 48 | 47 | 48 | 41 | 60 |

## Round 2 Results and Discussion

Panelists reviewed the Round 2 results as shown in Figure 2 and Table 11. Panelists reached consensus on the Level 2 cuts for math and science, and near consensus on the Level 4 cuts for math and science. Ratings were less consistent on English+Reading.

Figure 2. Round 2 Level 2 and Level 4 ratings by ACT score.
Table 11
Probabilities of Success and Impact Data associated with Round 1 and Round 2 Cut Scores

|  |  | Probability |  |  | Percentage At or Above |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | ACT Score | A | B or higher | C or higher | AZ Juniors State 2018 | All AZ Juniors 2018 | All AZ Juniors 2017 | Census States Juniors 2018 | National Grad Class 2018 |
|  |  | Mathematics |  |  |  |  |  |  |  |
| Level 4 | 25 | 0.34 | 0.64 | 0.80 | 18 | 18 | 17 | 14 | 26 |
| Level 3 (R1) | 22 | 0.19 | 0.48 | 0.72 | 31 | 30 | 30 | 25 | 40 |
| Level 2 | 18 | 0.09 | 0.30 | 0.60 | 48 | 47 | 48 | 41 | 60 |
|  |  | Science |  |  |  |  |  |  |  |
| Level 4 | 26 | 0.30 | 0.64 | 0.86 | 10 | 10 | 10 | 9 | 18 |
| Level 3 (R1) | 23 | 0.17 | 0.48 | 0.76 | 27 | 25 | 26 | 24 | 38 |
| Level 2 | 19 | 0.08 | 0.31 | 0.65 | 51 | 48 | 49 | 48 | 63 |
|  |  | ELA |  |  |  |  |  |  |  |
| Level 4 | 50 | 0.32 | 0.66 | 0.83 | 14 | 15 | 16 | 14 | 27 |
| Level 3 (R1) | 43 | 0.16 | 0.54 | 0.79 | 27 | 27 | 28 | 27 | 43 |
| Level 2 | 28 | 0.09 | 0.31 | 0.60 | 77 | 74 | 73 | 75 | 84 |

Panelists discussed how their ratings compared within and across subject areas, how the impact data influenced their ratings, and which data were most influential in making their ratings. An important consideration to the panelists was the requirement in state law that assessments used in the MOA result in comparable student performance levels. This requirement reflects concern that if the impact is not comparable across assessments, it may incentivize schools or districts to select an assessment based on impact, rather than the merits of the assessment. The performance levels will be one criteria used to assign schools an A-F letter grade, but students will not see their individual performance levels; therefore, students would not receive conflicting information from ACT if the ACT Benchmarks were not selected as the Level 3 cut scores. Panelists also acknowledged that the cut scores would need to be reevaluated in a few years to satisfy federal accountability requirements.

## Final Ratings and Results

After discussion, ACT staff gave instructions for the final round of ratings, where panelists would provide their recommendations for ACT cut scores for all three levels in each subject area. The rating sheets for Round 3 were identical to those used for Round 2 and can be found in the Appendix. Panelists were instructed to highlight three rows: one for their Level 2 rating, one for their Level 3 rating, and one for their Level 4 rating.

Figure 3 shows the distributions of the final ratings. Complete consensus was reached in math for all three cut scores. Near consensus was reached in science, with $75 \%$ consensus for each cut score. There was less consensus for English+Reading, with $50 \%$ consensus for Levels 2 and 3, and $0 \%$ consensus for Level 4, although the cut score ratings were generally within one or two points.

Figure 3. Final Level 2, Level 3, and Level 4 ratings by ACT score.

Table 12 contains the final recommended cut scores, based on the median rating. For math, the Level 2 cut score did not change, the Level 3 cut score dropped by one point, from 22 in the first round of ratings to 21 in the final round, and the Level 4 cut score increased by one point, from 25 to 26 . The cut scores for science did not change from the earlier rounds of ratings. For English+Reading, the Level 2 cut increased by 7 points, from 28 to 35, and the Level 4 cut score increased by 3 points, from 50 to 53 . The Level 3 cut score did not change. The recommended cut scores result in similar percentages of students performing at or above each performance level across the ACT and AzMERIT and AIMS Science assessments. After presenting the final results, panelists were given an opportunity to voice any comments or concerns prior to adjourning the meeting. Panelists indicated that they were satisfied with the final recommendations.

Table 12
Final Cut Score Recommendations

|  |  | Probability |  |  | Percentage At or Above |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | ACT Score | A | B or higher | C or higher | AZ Juniors State 2018 | All AZ Juniors 2018 | All AZ Juniors 2017 | Census States Juniors 2018 | National Grad Class 2018 |
|  |  | Mathematics |  |  |  |  |  |  |  |
| Level 4 | 26 | 0.39 | 0.69 | 0.83 | 12 | 13 | 14 | 10 | 21 |

| Level 2 | 18 | 0.09 | 0.30 | 0.60 | 48 | 47 | 48 | 41 | 60 |
|  |  | Science |  |  |  |  |  |  |  |
| Level 4 | 26 | 0.30 | 0.64 | 0.86 | 10 | 10 | 10 | 9 | 18 |
| Level 3 | 23 | 0.18 | 0.51 | 0.79 | 25 | 23 | 25 | 23 | 36 |
| Level 2 | 19 | 0.08 | 0.31 | 0.65 | 51 | 48 | 49 | 48 | 63 |
|  |  | ELA |  |  |  |  |  |  |  |
| Level 4 | 53 | 0.37 | 0.70 | 0.85 | 10 | 11 | 12 | 10 | 22 |
| Level 3 | 43 | 0.22 | 0.54 | 0.77 | 28 | 28 | 29 | 28 | 44 |
| Level 2 | 35 | 0.13 | 0.41 | 0.69 | 52 | 49 | 50 | 50 | 65 |

## Process Evaluation Questionnaire Results

After completing the final round of ratings, all panelists completed a Process Evaluation Questionnaire. This questionnaire was intended to gauge the level of understanding of panelists, evaluate the standard setting process, and gather feedback that can be used to improve the process in future studies. Panelists responded to the questionnaire items on a $1-5$ scale. In general, panelists reported that they understood the purpose and the process, and most found the resulting cut scores to be defensible and reasonable. A copy of the evaluation form and full results can be found in the Appendix.

## Adoption of Cut Scores

The recommended cut scores were approved by the Arizona State Board of Education on June 24, 2019.

## Summary and Conclusions

ACT conducted a standard setting for Arizona on June 6, 2019, to set recommended cut scores on the ACT for use in the state's accountability system. Four panelists participated in the standard setting and reviewed information about the ACT, including probabilities of success in first-year, credit-bearing college courses and impact data for several samples of ACT-tested students in Arizona and nationally. Comparative impact data were also considered for the AzMERIT, AIMS Science, and NAEP assessments. Panelists provided recommendations for three cut scores defining four performance levels in math, science, and English+Reading. The recommended cut scores were selected to be generally comparable with respect to the percentage of students performing at or above each performance level on AzMERIT and AIMS Science, and were approved by the Arizona State Board of Education on June 24, 2019.

## List of Participants

Facilitators:

- Wayne Camara - ACT
- Joann Moore - ACT

District/LEA Representatives:

- Robert Hagstrom (panelist) -- Flagstaff Unified School District
- Matt Strom (panelist) -- Queen Creek Unified School District
- Harriet Caruso (panelist) -- Charter School Representative

TAC Members:

- Jerry D'Agostino (panelist) -- Ohio State University
- Derek Briggs (participant) -- University of Colorado at Boulder

Observers:

- Audra Ahumada -- ADE Deputy Associate Superintendent of Assessment
- Callie Kozlak -- ADE Associate Superintendent of Policy and Government Relations
- Lisa Oliver -- ADE -- Achievement Assessment Developer -- Math
- Niharika Yennum -- ADE -- Director of Psychometrics
- Xiaoyuan Tan-ADE -- Senior Research Scientist
- Catcher Baden -- State Board of Education Deputy Director
- Alicia William -- State Board of Education Executive Director

## Background Questionnaire Arizona Standard Setting 6/6/2019

| Question | 1 | 2 | 3 | 4 | 5 | 6 | N |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| 1. What is your gender? | $\begin{gathered} \text { Female } \\ 1 \\ 25 \% \end{gathered}$ | $\begin{gathered} \text { Male } \\ 3 \\ 75 \% \\ \hline \end{gathered}$ | Prefer not to respond 0 |  |  |  | $\begin{gathered} 4 \\ 100 \% \\ \hline \end{gathered}$ |
| 2. What is your ethnicity? | ```Hispanic or Latino 0 0%``` | ```Not Hispanic or Latino 4 100%``` | Prefer not to respond 0 $0 \%$ |  |  |  | $\begin{gathered} 4 \\ 100 \% \\ \hline \end{gathered}$ |

## Process Evaluation Questionnaire

| Question | 5 | 4 | 3 | 2 | 1 | Mean Score | SD | N |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| 1. How adequate were the advance communications you received for preparing you to fulfill your role in this meeting? | Extremely adequate 2 | Very adequate 1 | Moderately adequate 1 | Slightly adequate 0 | Not at all adequate 0 | 4.25 | 0.96 | 4 |
| 2. How well did you understand the purpose of this meeting? | $\begin{gathered} \text { Extremely } \\ \text { well } \\ 3 \end{gathered}$ | Very well 1 | Moderately well 0 | Slightly well 0 | Not at all well 0 | 4.75 | 0.50 | 4 |
| 3. How clear were the instructions on what you were to do during each round? | Extremely clear 3 | Very clear 0 | Moderately clear 1 | Slightly clear <br> 0 | Not at All clear 0 | 4.50 | 1.00 | 4 |
| 4. How well did you understand the tasks you were to accomplish during each round? | Extremely well 3 | Very well 0 | Moderately well 1 | Slightly well 0 | Not at all well 0 | 4.50 | 1.00 | 4 |
| 5. How well did you understand the difference between borderline performance and typical performance within an achievement level? | Extremely well 3 | Very well 1 | Moderately well 0 | Slightly well 0 | Not at all well 0 | 4.75 | 0.50 | 4 |
| 6. How comfortable were you using the concept of performance at the lower borderline of Level 2? | Extremely comfortable 3 | Very comfortable 1 | Moderately comfortable 0 | Slightly comfortable 0 | Not at all comfortable 0 | 4.75 | 0.50 | 4 |
| 7. How comfortable were you using the concept of performance at the lower borderline of Level 3? | Extremely comfortable 3 | Very comfortable 1 | Moderately comfortable 0 | Slightly comfortable 0 | Not at all comfortable 0 | 4.75 | 0.50 | 4 |
| 8. How comfortable were you using the concept of performance at the lower borderline of Level 4? | Extremely comfortable 3 | Very comfortable 1 | Moderately comfortable 0 | Slightly comfortable 0 | Not at all comfortable 0 | 4.75 | 0.50 | 4 |
| 9. How confident were you in the cut score recommendations you provided? | Extremely confident 3 | Very confident 1 | Moderately confident 0 | Slightly confident 0 | Not at all confident 0 | 4.75 | 0.50 | 4 |
| 10. How well did you understand the median cut scores? | Extremely well 4 | Very well 0 | Moderately well 0 | Slightly well 0 | Not at all well 0 | 5.00 | 0.00 | 4 |
| 11. How well did you understand the concept of using a first-year credit-bearing college course to help set cut scores? | Extremely well 3 | Very well 1 | Moderately well 0 | Slightly well 0 | Not at all well 0 | 4.75 | 0.50 | 4 |
| 12. How well did you understand probabilities of success? | Extremely well 4 | Very well 0 | Moderately well 0 | Slightly well <br> 0 | Not at all well 0 | 5.00 | 0.00 | 4 |
| 13. How well did you understand the difference between probability of success and percent at or above? | Extremely well 4 | Very well 0 | Moderately well 0 | Slightly well 0 | Not at all well 0 | 5.00 | 0.00 | 4 |

| Question | 5 | 4 | 3 | 2 | 1 | Mean Score | SD | N |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| 14. How comfortable were you using the impact data provided to evaluate the reasonableness of the cut scores? | Extremely comfortable 3 | Very comfortable 1 | Moderately comfortable 0 | Slightly comfortable 0 | Not at all comfortable 0 | 4.75 | 0.50 | 4 |
| 15. How would you describe the effectiveness of the performance level setting method? | Extremely effective 3 | Very effective 0 | Moderately effective 1 | Slightly effective $0$ | Not at all effective 0 | 4.50 | 1.00 | 4 |
| 16. How did you feel about the amount of time allotted for explanation and discussion during Round 1 (Level 3)? | Far Too Long 0 | $\begin{gathered} \text { Somewhat } \\ \text { long } \\ 2 \end{gathered}$ | About Right 2 | $\begin{gathered} \text { Somewhat } \\ \text { short } \\ 0 \end{gathered}$ | Far 100 Short 0 | 3.50 | 0.58 | 4 |
| 17. How did you feel about the amount of time allotted for explanation and discussion during Round 2 (Level 2 \& Level 4)? | Far Too Long 0 | Somewhat long 2 | About Right $2$ | Somewhat short 0 | Far 100 Short 0 | 3.50 | 0.58 | 4 |
| 18. How did you feel about the amount of time allotted for explanation and discussion during Round 3 (Levels 2, 3, and 4)? | Far Too Long 0 | $\begin{gathered} \text { Somewhat } \\ \text { long } \\ 2 \end{gathered}$ | About Right 2 | $\begin{gathered} \text { Somewhat } \\ \text { short } \\ 0 \end{gathered}$ | Far 100 Short 0 | 3.50 | 0.58 | 4 |
| 19. To what extent was your input valued and considered by others in your group? | Extremely valued 2 | Very valued $2$ | Moderately valued 0 | Stightly valued 0 | $\begin{gathered} \text { Not at all } \\ \text { valued } \\ 0 \end{gathered}$ | 4.50 | 0.58 | 4 |
| 20. Did you feel pressured by others in your group to make your cut score recommendations agree with theirs? | Extremely pressured 0 | Very pressured 0 | Moderately pressured 0 | Stightly pressured <br> 0 | Not at all pressured $4$ | 1.00 | 0.00 | 4 |
| 21. Did you feel pressured by staff to make cut score recommendations higher or lower? | Extremely pressured $0$ | Very pressured $0$ | Moderately pressured $0$ | Slightly pressured $0$ | Not at all pressured $4$ | 1.00 | 0.00 | 4 |
| 22. Did you feel pressured by staff to keep your cut score recommendations the same? | Extremely pressured $0$ | Very pressured <br> 0 | Moderately pressured $0$ | Slightly pressured <br> 0 | Not at all pressured $4$ | 1.00 | 0.00 | 4 |
| 23. How well did this standard setting process provide you an opportunity to use your best judgment to recommend cut scores? | Extremely well 1 | Very well $3$ | Moderately well 0 | Slightly well 0 | Not at all well 0 | 4.25 | 0.50 | 4 |
| 24. How defensible do you feel are the cut scores produced by this standard setting process? | Extremely defensible 2 | Very defensible 1 | Moderately defensible 1 | Slightly defensible 0 | $\begin{gathered} \text { Not at all } \\ \text { defensible } \\ 0 \end{gathered}$ | 4.25 | 0.96 | 4 |
| 25. How reasonable do you feel will the cut scores produced by this standard setting be considered? | Extremely reasonable $2$ | Very reasonable 1 | Moderately reasonable 1 | $\begin{gathered} \text { Slightly } \\ \text { reasonable } \\ 0 \end{gathered}$ | Not at all reasonable 0 | 4.25 | 0.96 | 4 |

| ACT \& ADE staff debrief; summarize process and results | 4:15 PM | 1:00 | ACT/ADE |  |

## PANELISTS

- Panelists include district/LEA representatives and TAC members.
- Brief panelist introductions
- Modified and abbreviated empirical standard setting approach

## PURPOSE OF THE MEETING

- To recommend 3 cut scores defining four performance levels on the ACT Math, Science, and English+Reading assessments
- Level 4 (Advanced)
- Level 3 (Proficient)
- Level 2 (Basic)
- Level 1 (Below Basic)

6

## SCHEDULE FOR THIS MEETING

- Review
- ACT College Readiness Benchmarks
- Probability of Success
- Identify Borderline Achievement
- Training for Setting Recommended Cut Scores
- Round 1 Cut Scores for College Readiness (Level 3)
- Review Impact and Additional Evidence
- Round 2 Upper (Level 4) and Lower (Level 2) Cut Scores
- Discussion
- Final cut score recommendations for Levels 2, 3, and 4

## INTRODUCTION \& BACKGROUND

## ARIZONA DEPARTMENT OF EDUCATION

## GENERAL GUIDELINES

1. Secure materials should never leave the room. (WebEx participants to securely destroy)
2. Please hold questions until the end of each section, unless they are critical to the presentation or the associated activity.
3. Return all materials at the end of the day for staff to collect.
4. If you finish a task before others, sit quietly until everyone has completed the task.

## MENU OF ASSESSMENTS (MOA)

- Arizona legislature passed a law that would provide LEAs flexibility in testing. 2018-2019 is the first year for MOA and is allowed at the high school level only.
- Arizona Academic Standards were most recently adopted in 2016 for ELA and Mathematics.
- Cut Scores are needed for the MOA (ACT and SAT) for State Accountability.
- About 16 LEAs (Districts and Charter)/56 Schools and about 13,500 students participated in the MOA for the 2018-2019 school year. These students were not administered AzMERIT.

## TYPES OF STANDARDS

Content Standards: Content standards define the knowledge, concepts, and skills that students should acquire at each grade level.
Performance Standards: Performance standards specify how much understanding of content students need at each performance level (e.g., basic, proficient, advanced), relative to the content standards.
In an empirical standard-setting process, we use data to describe outcomes for students in various score ranges.

## ACT BENCHMARKS

The ACT College Readiness Benchmarks are the ACT College Readiness Assessment scores associated with a $50 \%$ chance of earning a B or higher grade in typical, first-year, credit-bearing college courses.

The Benchmarks also correspond to an Secondary approximate $75 \%$ chance of earning a C or higher grade in these courses.

## WHY COLLEGE READINESS?

- $69 \%$ of recent high school graduates enrolled in college
- Median earnings of 25-34 year olds who
- Completed HS: \$30,500
- Attained an associate's degree: $\$ 36,900$
- Attained bachelor's degree: $\$ 50,000$
- Attained a master's or higher: $\$ 60,000$

NCES Condition of Education 2017: https:///nces.ed.gov/pubs2017/2017144.pdf
ACT

## GOALS OF STANDARD SETTING

The goal of this meeting is to recommend three sets of performance standards:

## WHY COLLEGE READINESS?

- Nationally, 65\% of ACT-tested 2018 high school graduates enrolled in college.
- In Arizona, 53\% of ACT-tested 2018 high school graduates enrolled in college.
- In Arizona, 73\% of ACT-tested 2018 high school graduates aspired to postsecondary education.

## WHY COLLEGE READINESS?

- Nationally, only about 1 in 4 first-year college students are college ready

${ }^{1}{ }^{1}$ www.act.ora/content/act/en/research/pds//ccr-2018--briefing-Arizona.html ${ }_{2}$ The National Center for Public Policy and Higher- Edscationd the
2 The National Center for Public Policy and Higher Education and the Southern Regional Education Board Beyond the Rhetoric: Improving College Readiness Through Coherent State Policy. (2010).
ACT

## ACT COURSE PLACEMENT SCORES

- Some postsecondary institutions in Arizona use ACT scores for course placement.
- In Math, College Algebra placement scores were generally near the ACT College Readiness Benchmark (22), and lower scores (18-21) could place a student into lower-level creditbearing courses (e.g., Intermediate Algebra).
- In English, placement scores for first-year Composition were close to or higher than the ACT College Readiness Benchmark (18-20).
- Lower scores require students to take a placement test.

## ACT-AZMERIT LINKING STUDY

- Spring 2015
- 58,888 AzMERIT Grade 11 ELA, 32,945 Algebra II
- Also took ACT before HS graduation in 2016
- Equipercentile equating
- Close correspondence found between AzMERIT Level 3 cut scores and ACT College Readiness Benchmarks
https://cms.azed.gov/home/GetDocumentFile?id=57f689b5aadebf0a04b267c9
https://cms.azed.gov/home/GetDocumentFile?id=5b9bda051dcb260b5c235ee8

## WHY COLLEGE READINESS?

- Remedial Coursework in College:
- Debt without college credit.
$-25 \%$ of students at 4 -year colleges and $61 \%$ of students at 2-year colleges take remedial coursework.
- Students who take remedial coursework are less likely to complete a degree.
- Remedial Coursework: 30-57\%
- No Remedial Coursework: 69\%

| Level 2 | $3690-3710$ | $18-20$ |
| Level 1 | $3629-3689$ | $5--17$ |

24

## ACT MATH COURSE PLACEMENT SCORES

25

## ACT ENGLISH COURSE PLACEMENT SCORES

## ACT BENCHMARKS

 college courses.

The Benchmarks also correspond to an approximate $75 \%$ chance of earning a C or higher grade in these courses.

BENCHMARKS LINK ACT SUBJECT AREA TEST SCORES TO COMMON FIRST-YEAR COURSES

| ACT Subject -Area <br> Test | College Course | Benchmark |
| :--- | :--- | :---: |
| English | English Composition | 18 |
| Mathematics | College Algebra | 22 |
| Reading | Social Science | 22 |
| Science | Biology | 23 |
| ELA |  <br> Social Science | 20 |

Social Science courses: Courses available to a first-year student that typically require a significant amount of reading (American History, Other History, Psychology, Sociology, Political Science, Economics)

INSTITUTIONS IN BENCHMARK DEVELOPMENT SAMPLES

| Characteristic | ELA | Math | Science |
| :--- | :---: | :---: | :---: |
| N (Institutions) | 233 | 125 | 90 |
| N (Students) | 198,275 | 70,461 | 41,651 |
| Type |  |  |  |
| 2-year | $40 \%$ | $42 \%$ | $44 \%$ |
| Less selective 4-year | $53 \%$ | $48 \%$ | $46 \%$ |
| More selective 4-year | $7 \%$ | $10 \%$ | $10 \%$ |
| Control |  |  |  |
| Public | $88 \%$ | $92 \%$ | $87 \%$ |
| Private | $12 \%$ | $8 \%$ | $13 \%$ |

## BENCHMARK DEVELOPMENT SUCCESS RATES BY COURSE

| College <br> Course Type | Percentage of Course Grades |  |  |  |  | Success <br> Criteria |  |
| :--- | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | A | B | C | D | F | $\geq$ B | $\geq$ C |
| English Comp / <br> Social Science | $20 \%$ | $32 \%$ | $25 \%$ | $9 \%$ | $14 \%$ | $52 \%$ | $77 \%$ |
| College Algebra | $24 \%$ | $25 \%$ | $23 \%$ | $11 \%$ | $18 \%$ | $49 \%$ | $72 \%$ |
| Biology | $20 \%$ | $27 \%$ | $26 \%$ | $12 \%$ | $16 \%$ | $47 \%$ | $73 \%$ |

## (1) GRADE <br> WHY B OR HIGHER? (WHAT'S WRONG WITH A GRADE OF C?)

- This criterion seems to reproduce the current grading distribution fairly well.

Policy implications of putting a student with a $50 \%$ chance of earning less than a C grade into a class

- Stability of models is affected by courses/institutions where grades below C are uncommon.

## (2) DISTRIBUTION ACROSS COLLEGES: TYPICAL STUDENT, TYPICAL COLLEGE

The score value for a $50 \%$ chance of a B grade varies from college to college, depending on course rigor and grading standards. In general, the values do not vary considerably

| Subject | 1 $^{\text {st }}$ Quartile | Median | 3 $^{\text {rd }}$ Quartile |
| :--- | :---: | :---: | :---: |
| ELA | 18 | 20 | 22 |
| Mathematics | 21 | 22 | 24 |
| Science | 22 | 23 | 25 |

## TYPICAL STUDENT, TYPICAL COLLEGE

There is little variability in the ACT score associated with a $50 \%$ chance of earning a B or higher across institution types.

| Subject | 2 Year | $\mathbf{4}$ Year, Less <br> Selective | $\mathbf{4}$ Year, More <br> Selective |
| :--- | :---: | :---: | :---: |
| English | 18 | 17 | 17 |
| Mathematics | 23 | 22 | 22 |
| Reading | 22 | 23 | 21 |
| Science | 23 | 23 | 24 |

## ACT COLLEGE READINESS BENCHMARKS

| College Course | ACT Subject- <br> Area Test | The ACT <br> Benchmark |
| :--- | :--- | :---: |
| English Composition <br> \& Social Science | ELA (English, <br>  <br> Writing) | 20 |
| College Algebra | Mathematics | 22 |
| Biology | Science | 23 |

## (3) SCORE PRECISION

Often the standard error of measurement is used to capture a score's imprecision. Sometimes cut scores may be lowered by $.5,1,1.5$ or even 2 SEMS

| Subject | SEM | -1 SEM | Benchmark | +1 SEM |
| :--- | :---: | :---: | :---: | :---: |
| English | 1.71 | 16 | 18 | 20 |
| Reading | 2.16 | 20 | 22 | 24 |
| E \& R | 2.76 | 37 | 40 | 43 |
| Mathematics | 1.55 | 20 | 22 | 22 |
| Science | 2.01 | 21 | 23 | 25 |

## ACT BENCHMARKS FOR MEETS/COLLEGE READY?

Advantages

- ACT score reports show College Readiness levels, and scores will be reported in terms of ACT's benchmarks.
- Continuity across AZ and ACT reports, across states, and trend data.
- Facilitates comparisons across state lines.

Disadvantages

- Panelists are given no input in cut score.
- Cut score impact may be significantly different than in the past or in gr. 3-8.
- Reduces the opportunity to smooth or reconcile impact across grades.
- ACT resets benchmarks every 5-7 years.
- Reflects national impact, not just AZ.

## ACT'

## SUCCESS PROBABILITIES

## SUCCESS PROBABILITIES

|  | Probability of First-Year Course <br> B or higher <br> Mathematics |  |  |  | C or higher |

43

## 15 MINUTE BREAK

## IDENTIFYING BORDERLINE ACHIEVEMENT

## LEVEL 3 ACHIEVEMENT LEVEL

First, we will focus on the lower borderline of the Level 3 achievement level.

47

## ESTABLISHING CUT SCORES FOR FOUR LEVELS OF ACHIEVEMENT

To divide the achievement scale into Level 1, Level 2, Level 3, and Level 4, we will focus on the lower borderline of each achievement level.

## LEVEL 3 ACHIEVEMENT LEVEL

First, we will focus on the lower borderline of the Level 3 achievement level.

48

## EMPIRICALLY-BASED PERFORMANCE LEVEL DESCRIPTORS

- Set cut scores corresponding to relevant empirical data or outcomes.
- ACT Benchmarks are based on established relationships between test scores and actual first-year college course outcomes.
- Probabilities of succeeding in first-year college courses.
- Does not necessarily reflect specific knowledge and skills in a particular subject area.

## EMPIRICALLY-BASED PERFORMANCE LEVEL DESCRIPTORS

Example of an empirically-based PLD for college readiness:
Students performing at this level meet academic expectations for the knowledge, skills, and practices assessed at grade 11. They are very likely to engage successfully ( 0.75 probability of earning a grade of C or higher) in entry-level, credit-bearing courses in the corresponding content area or in technical courses requiring college-level skills. Students performing at this level are exempt from having to take and pass placement tests in two- and fouryear public institutions of higher education designed to determine whether they are academically prepared for such courses without need for remediation.

## ADE POLICY PLDS FOR STATEWIDE ASSESSMENTS FOR ELA AND MATHEMATICS

## EMPIRICALLY-BASED PERFORMANCE LEVEL DESCRIPTORS

Other relevant data may be considered in setting the collegeready level, such as

- Percentage of students college ready on ACT
- Percentage of students proficient on NAEP
- Percentage of students enrolling in 2-year or 4 -year colleges
- Other

## EMPIRICALLY-BASED <br> PERFORMANCE LEVEL DESCRIPTORS

AZ college ready Performance Level Descriptor: Students performing at Level 3 are
???
ADE currently uses this language on student reports: For each content area, student performance is also reported as one of four performance levels: Level 1, Level 2, Level 3, and Level 4 . Students who score at Level 1 or Level 2 are likely to need support to be ready for the next grade or course. Students who score at Level 3 or Level 4 are proficient and likely to be ready for the next grade or course.

ROUND 1 LEVEL 3 RATING FORM FOR MATH

## SETTING A LEVEL 3 ACHIEVEMENT LEVEL IN MATH

Task:

- Think about minimally Level 3 students in math.
- Think about their likelihood of success in first-year, entrylevel, college course in math (e.g., College Algebra).
- Highlight the one row on the rating sheet that best reflects what you see as their probability of achieving an A, B, or C grade.
- Ratings should reflect your individual judgment.

ROUND 1 LEVEL 3 RATING FORM FOR SCIENCE

| Probability of Success |  |  |
| :---: | :---: | :---: |
| A prob | B or higher prob | C or <br> higher prob |

## ROUND 1 RATING AND LUNCH BREAK

Highlight the one row on the rating sheet for each subject area that best reflects what you see as their probability of achieving an A, B, or C grade.

- Ratings should reflect your individual judgment.
- When finished, hand in the rating sheet to your facilitator and break for lunch.
- Return to this room for the afternoon session in one hour.

## DATA SOURCES

AZ Juniors Statewide, 2018

- In-school ACT testing in $11^{\text {th }}$ grade
- $16 \%$ of total statewide juniors

All ACT-tested AZ Juniors, 2017 and 2018

- Includes state testing, district testing, and national testing
- 57\% of total statewide juniors in 2018, $49 \%$ in 2017

## DATA SOURCES

Census-tested states, 2018

- In-school census testing in $11^{\text {th }}$ grade
- 9 states ( 13 total; 5 have student data privacy use restrictions)

ACT-Tested Graduating Class of 2018 (Grad. Cohort)

- All U.S. ACT-Tested high school graduates
- Each student's most recent scores
- $53 \%$ most recently tested as juniors

WHAT DOES IT
MEAN TO BE
LEVEL 2 OR
LEVEL 4?

## BASIC AND ADVANCED DESCRIPTORS - NAEP

NAEP Basic Achievement Level:
This level denotes partial mastery of prerequisite knowledge and skills that are fundamental for proficient work at each grade.

NAEP Advanced Achievement Level:
This level signifies superior performance beyond proficient.

## DISCUSSION

- How did your initial ratings compare with those of others?
- How did ratings in each subject area compare with those in the other subject areas?
- How does the additional impact information provided influence your initial ratings of the Level 3 cut score?
Which information is the most important in making your choice of Level 3 cut scores?
- Math
- Science
- English + Reading

There will be an opportunity to make a final Level 3 rating

## ESTABLISHING CUT SCORES FOR FOUR LEVELS OF ACHIEVEMENT

To divide the achievement scale into Level 1, Level 2, Level 3, and Level 4, we will focus on the lower borderline of each achievement level.

82

## LEVEL 2 AND LEVEL 4 DESCRIPTORS - AZ

AZ college ready Level 2 Descriptor: Students performing at Level 2 are
???

AZ college ready Level 4 Descriptor: Students performing at Level 4 are ???

## SUCCESS PROBABILITIES

## WHAT DOES IT MEAN TO BE MINIMALLY LEVEL 2 IN MATH?

- What should a student who is minimally at Level 2 know and be able to do?
- What's the chance that student will get a B?
- What's the chance that student will get a C ?
- Of students who get a B grade in a first-year college course, - Would you find a Level 2 student among them?
- Of students who get a C grade in a first-year college course,
- What would a minimally Level 2 student know? Where
would that minimally Level 2 student rank among them?
- What differentiates a minimally Level 2 student from a Level 1 student? At which score?

## WHAT DOES IT MEAN TO BE MINIMALLY LEVEL 2 IN ENGLISH AND READING?

- What should a student who is minimally at Level 2 know and be able to do?
- What's the chance that student will get a B?
- What's the chance that student will get a C ?
- Of students who get a B grade in a first-year college course, Would you find a Level 2 student among them?
- Of students who get a C grade in a first-year college course,
- What would a minimally Level 2 student know? Where
would that minimally Level 2 student rank among them?
- What differentiates a minimally Level 2 student from a Level 1 student? At which score?

## SUCCESS PROBABILITIES

## WHAT DOES IT MEAN TO BE MINIMALLY LEVEL 2 IN SCIENCE?

What should a student who is minimally at Level 2 know and be able to do?

- What's the chance that student will get a B ?
- What's the chance that student will get a C ?
- Of students who get a B grade in a first-year college course, - Would you find a Level 2 student among them?
- Of students who get a C grade in a first-year college course
- What would a minimally Level 2 student know? Where would that minimally Level 2 student rank among them?
- What differentiates a minimally Level 2 student from a Level 1 student? At which score?

## WHAT DOES IT MEAN TO BE MINIMALLY LEVEL 4 IN MATH?

What should a student who is minimally at Level 4 know and be able to do?

- What's the chance that student will get a B ?
- What's the chance that student will get a C ?
- Of students who get a B grade in a first-year college course, - Would you find a Level 4 student among them?
- Of students who get a C grade in a first-year college course,
- What would a minimally Level 4 student know? Where would that minimally Level 4 student rank among them?
- What differentiates a minimally Level 4 student from a Level 3 student? At which score?

## WHAT DOES IT MEAN TO BE MINIMALLY LEVEL 4 IN SCIENCE?

What should a student who is minimally at Level 4 know and be able to do?

- What's the chance that student will get a $B$ ?
- What's the chance that student will get a C ?
- Of students who get a B grade in a first-year college course, Would you find a Level 4 student among them?
- Of students who get a C grade in a first-year college course, What would a minimally Level 4 student know? Where would that minimally Level 4 student rank among them? - What differentiates a minimally Level 4 student from a Level 3 student? At which score?

## WHAT DOES IT MEAN TO BE MINIMALLY LEVEL 4 IN ENGLISH AND READING?

What should a student who is minimally at Level 4 know and be able to do?

- What's the chance that student will get a B ?
- What's the chance that student will get a C ?
- Of students who get a B grade in a first-year college course, Would you find a Level 4 student among them?
- Of students who get a C grade in a first-year college course What would a minimally Level 4 student know? Where would that minimally Level 4 student rank among them?
- What differentiates a minimally Level 4 student from a Level 3 student? At which score?

## SETTING LEVEL 2 AND LEVEL 4 ACHIEVEMENT LEVELS

Task:

- Think about minimally Level 2 and a minimally Level 4 students in each subject area.
- Think about their likely success in their first-year, entrylevel college course in that subject area (College Algebra, Social Science course, or College Biology).
- Highlight the one row for Level 2 and the one row for Level 4 on the rating sheet that best reflect what you see as their probabilities of achieving an $\mathrm{A}, \mathrm{B}$, or C grade.
- Ratings should reflect your individual judgment.

ROUND 2 LEVEL 2 AND LEVEL 4 RATING FORM IN MATH

## COHERENCE OF CUT SCORES ACROSS 3 LEVELS

- How did your ratings in each subject area compare with ratings in other subject areas?
- Is it important to have similar probabilities of success for each cut score in each subject area? Why or why not?
- Do you have any additional questions or concerns before making your final cut score recommendations?

## DISCUSSION

- How did your ratings compare with those of others?
- How did ratings in each subject area compare with ratings of the other subject areas?
- How does the additional impact information provided influence your ratings of the three cut scores?
- Which information is the most important in making your choice of cut scores?
- Math
- Science
- English \& Reading

## NEXT STEPS

- We will shortly complete the final round of ratings, followed by an evaluation, during which time we will tally the final recommended cut scores.
- After briefly reporting the final recommendations we will conclude the standard setting.
- After this meeting, ACT will deliver a report and recommendations to ADE.
- The Arizona Board of Education will determine the final cut scores.
- THANK YOU for participating!

## INSTRUCTIONS FOR SETTING FINAL CUT SCORES

## SETTING LEVEL 2, 3, AND 4 ACHIEVEMENT LEVELS

Task:

- Think about students minimally at Level 2,3 , and 4 in each subject area.
- Think about their likelihood of success in their first-year, entry-level college course in each subject area (College Algebra, English and Social Science courses, or College Biology).
- Highlight the one row for Level 2, one row for Level 3, and one row for Level 4 on the rating sheet that best reflect what you see as their probabilities of achieving an $\mathrm{A}, \mathrm{B}$, or C grade.
- When finished, hand the rating sheets to the facilitators and complete the evaluation form.

## NEXT STEPS

- 15 minute break

Please complete the final round of ratings and hand in the rating sheets to the facilitators.

- Please complete the evaluation form.
- After briefly reporting the final recommendations we will conclude the standard setting.
- THANK YOU for participating!

## MATH RATINGS FOR LEVELS 2,

 3, AND 4

## SCIENCE RATINGS FOR LEVELS

 2, 3, AND 4

## NEXT STEPS

- After this meeting, ACT will deliver a report and your recommendations to the Arizona Department of Education.
- The Arizona Department of Education will determine the final cut scores.
- THANK YOU for participating!

[^0]:    ${ }^{1}$ ACT's ELA score is a combination of the ACT English, reading, and writing scores. The ADE opted to use the English+Reading score equal to the sum of the ACT English and reading tests on a 2-72 scale. This score allows the ADE to use the concordance between the ACT and SAT (https://www.act.org/content/act/en/products-and-services/the-act/scores/act-sat-concordance.html).
    ${ }^{2}$ https://www.azleg.gov/ars/15/00741-02.htm

[^1]:    ${ }^{3}$ The graduation cohort represents all students in a state or the nation who completed the ACT at any point during high school. This includes students attending private or public high schools. The last (most recent) ACT test score is used when reporting results for cohorts. Therefore, results from the Arizona graduating cohort differ from results reported for all juniors who tested in public schools as part of the MOA.

[^2]:    ${ }^{4}$ https://www.bls.gov/opub/ted/2017/37-percent-of-may-2016-employment-in-occupations
    -typically-requiring-postsecondary-education.htm
    ${ }^{5}$ https://www.bls.gov/emp/chart-unemployment-earnings-education.htm

[^3]:    ${ }^{6}$ https://cms.azed.gov/home/GetDocumentFile?id=57f689b5aadebf0a04b267c9
    ${ }^{7}$ https://cms.azed.gov/home/GetDocumentFile?id=5b9bda051dcb260b5c235ee8

[^4]:    ${ }^{8}$ This included nine states that administered the ACT to virtually all $11^{\text {th }}$ grade students in the state (Alabama, Arkansas, Louisiana, Mississippi, Nebraska, Nevada, North Dakota, Wisconsin, and Wyoming).

[^5]:    * Departments of Educational Psychology, Mathematics, and Quantitative Research Methods
