

Improving Student Achievement with Targeted Investments

Presenters: Mattie Lord and Raquel Alvara, ADE

LEAs are required to reserve funds for family and community engagement activities and to provide supports and services to students experiencing homelessness. Why would Congress require these “set asides” of our public schools when there are so many competing priorities? How can these funds be used to improve student achievement? Join us for an interactive, thought-provoking journey through the law, student and family needs, research-based strategies, and a flurry of ideas and possibilities.

Intended Audience: School Administrators, Federal Grant Administrators, Other District Level Employees, Governing Board Members
