

Reflective Pause: Leadership

Presenter: Dr. Anthony Perkins, Gila Bend Unified School District #24

An airplane needs four components to occur precisely in order to leave the ground and fly. These four components are: lift, weight, thrust, and drag. Let's take a REFLECTIVE PAUSE and apply this notion to leadership. How can we LIFT people up in our organization? Are you a leader that carries positive WEIGHT? What are you doing to THRUST your leadership forward? How will you eliminate people in your organization that DRAG it down? Let's have fun with this highly engaging message. Are you ready?

Intended Audience: Teachers, School Administrators, Federal Grants Administrators, Governing Board Members, Human Resources, Business Office/Finance, Other District Level Employees
