

Transforming your STEM to STEAM through Arts Integration

Presenter: David Simmons, The UBU Project

This engaging, interactive and creative STEM to STEAM session will lead participants through the process of identifying a specific Core/STEM curriculum topic and exploring the storytelling, structure and process of creating an original song based upon that topic. The process and acquired skills, in addition to the song itself, will further support and enhance the work already being done in the classrooms for all who attend and participate as they continue to teach to, and beyond, the standards.

Intended Audience: Teachers, School Administrators, STEM/STEAM Coordinators, Federal Grants Administrators, Arts Education Leaders
