What is a Language Development Approach?

A set of underlying assumptions (best thinking made explicit) about how we will develop language, literacy, and learning in all subject areas for all EL students throughout the system.
Why a Language Development Approach?

- It makes explicit the ways in which learning for English Learners will be designed and enacted throughout the system.

- It connects the language, literacy and learning practices in all subjects and all instructional models that are critical to effective instruction and student learning.

- It communicates how you expect practitioners to design and enact language, literacy and learning practices in all subject matters for diverse English Learners.

How language development is conceptualized influences how learning experiences are designed and enacted.
Arizona’s Language Development Approach

All educators share the responsibility for promoting the success of English learners.

- Asset-Based Behaviors and Expectations
- Integrated Instruction in Disciplinary Language and Content
- Targeted and Explicit Language Instruction
- Assessment, Monitoring, and Feedback

  o What questions do I need to ask or be ready to answer?
  o What connections can I make to what we are already doing?
  o What is important and why?
  o What do I already understand?

• Respond and share with a partner
  • On page _____, I annotated using a _______, because...
  • Another part of the text that I marked was....
  • One annotation mark I used was a ______. I felt...
  • Something I ...

What Model(s) Might Make Sense?

• What is your mission and vision for English Learners in your district?
• Consider your district’s current context:
  • What might you implement NEXT YEAR?
  • What evidence can you collect to ensure implementation?
  • What will it look like?
• How will you start?
Thank you
