

Eligibility Policy for Students to Take and Retake the Technical Skills Assessment (TSA)

1. **In a traditional or block schedule**, a student should take the test when completing two courses worth one credit each in a single CTE program or when completing three courses worth one credit each in a single CTE program.
2. **If a district adds courses** to a program beyond the state's designated course sequence in a single CTE program, it will be the district's decision as to when the student will take the test, that is, after the 2nd, 3rd, or 4th course.
3. **If a student fails the test** and retakes a course, takes an additional course, or participates in a work-based learning opportunity in a single CTE program, the student can retake the test in the next school year prior to graduation through special arrangements with ADE/CTE.
4. **If an IEP or 504 plan states that the student can take the test more than one time**, the student can retake the test in the current or next school year prior to graduation through special arrangements with ADE/CTE. The student must be currently enrolled in the program in which they would like to retest. The last test score counts.

Note: Through special arrangements with ADE/CTE, mentioned in policy statements 3 and 4, refers to the completion, submission, and final approval of the Change Request form found on the TSA dashboard.
